CERATOTHECA triloba Broadly tubular flowers with a lower lip marked with fine, dark lines, looking suspiciously like a runway for pollinating insects. A real knockout in our gardens last summer. Responds well to pinching otherwise its heavy flower stalk will need support. Offered in mauve and white. Full sun, average soil. 2-4', Rare, Heirloom

CERINTHE major purpurescens 'Kiwi' Silvery, blue-green foliage provides the perfect backdrop for unique flowers. At the tips of arching stems, dangle deep purple flowers surrounded by bright blue bracts. Prefers to be shaded from the afternoon sun and moist soil. Very cold hardy and often reseeds. 12-24", Heirloom

Annuals

CESTRUM nochnum 'Night Blooming Jasmine' Intensely Fragrant! A medium-sized, tender shrub with arching branches to 3 feet. Covered with greenish, yellow, tubular-shaped flowers that are most fragrant during the evening. Prefers sun.

CHRYSANTHEMUM paludosum 'Snowland' Well-branched bushy plants produce an abundance of single, white, daisy like flowers all summer. Full sun, average soil. Compact habit. H 7"

CHRYSOCEPHALUM apiculatum 'Flambe Yellow' (Common Everlasting) Beautiful, small, rounded, vibrant golden-yellow pearl-like blooms that sit on wonderful silver-gray foliage, also known as a strawflower because of its papery like texture. These blooms cover the bright foliage all season. Very drought tolerant. Full or part sun. 8-14"

CLEOME The Spider Plant is striking with its tall, upright stems, palmate leaves, and spidery clusters of flowers. New flowers form as old ones mature to long attractive pods. Cleome doesn't mind the heat and often reseeds for the following year. Short lived cut flower. Full sun, average soil.

senorita series Sterile flowers, thornless and odorless foliage. Grown from cuttings. Available are 'Rosalita', lavender pink flowers and 'Blanca', silvery white in warm temperatures, but under cool conditions, the flowers will be a pale pink. Great in containers. H 24-28".

spinosa queen series Available in cherry, violet and white. 4-5', Heirloom

CLERODENDROM ugandense 'Blue Wings' (Butterfly Bush) This variety has shrubby well branched foliage carrying the most attractive blue flowers. Each butterfly shaped blossom has a violet blue upper lobe and a pale blue lower lobe. Very elegant! Full sun. 3'

COLEUS (aka Solenostemon) Brightly colored foliage plants to brighten partial shade. Great accent plants in the ground or in mixed containers. Most of these varieties can go in full sun or full shade or anywhere in between.

'Big Red Judy' Big, bold, dark reddish burgundy foliage dappled with orange. 3'

'Dark Star' One of the darkest varieties available with purple-black leaves and stems. Compact, upright habit. 10-12"

'Dipt in Wine' Glowing ochre heart of each leaf with wide burgundy dipped edges. Slightly scalloped sun lit edges. 20-24"

'Electric Slide' With a strong, canary-yellow background, shocking red veins and a ruffled emerald edge, naturally neat and compact. Trailing, 23" x 36" W. Part to full shade.

'Fiona' 'Fiona' is a low-spreading beauty with long red leaves with jagged margins. Great self-branching habit. Slow to bloom. Part shade/full shade. 9" X 30".

'Fishnet Stockings' Wide, bright green leaves with sharply contrasting deep purple veining. Unusual and dramatic, this coleus is always a favorite! H 14-22"

flame thrower series The new series features bold new colors with a compact habit. This striking new coleus is ideal in smaller pots and mixed combos. Great garden performance in sun or shade. H 18-24".

'Chili Pepper' Rich burgundy foliage with a purple and chartreuse edge.

'Chipolte' Spiky green-gold leaves with a smoky mahogany center and a compact habit. Tolerates sun. H 18-22"

'Habanero' Warm orange leaves with a jagged edge. A compact habit and sun tolerant. H 12-18"

'Flying Carpet Shocker' A bright, lime-gold background with a showy red center. H 24" x 28" W. Mounds, spreads and trails. Part-full shade.

Annuals

- 'French Quarter'** Pink, magenta and green leaves. Slow to flower, it is a vigorous grower and sun tolerant. H 18-36"
- 'Great Falls Angel'** New trailing coleus. Minute, heart-shaped leaves have magenta centers highlighted with green trim. Shade and heat tolerant. H. 6-10" x 12-18" W.
- 'Inferno'** Juicy red-orange serrated foliage makes a red-hot impression in full sun or shade. H 14-28"
- 'Inky Fingers'** Fingered leaves are a dark burgundy with bright green scalloped edges. 10-12"
- 'Japanese Giant'** A very large and upright coleus. Large red and purple leaves have a bright green center. Sunshine will bring out yellow and pink highlights that make this large coleus glow! Sun tolerant. H 48"
- 'Kingswood Torch'** Hot pink leaves are edged in rich, dark burgundy. 2-3'
- 'Lemon Sunsatation'** Lacy golden lemon colored foliage thinly edged in blood red. Sun loving. H 2-3'
- 'Limon Blush'** Beautiful yellow, pink and chartreuse serrated leaves. H 24-36"
- 'Merlins Magic'** Small, mounding and deeply lobed. Fantasy type leaves are bright green and yellow with a thin purple border. Ferny effect that will lend textural contrast to planters. 10-15", Mounding, Sun or shade.
- 'Mount Washington'** Deep purple leaves with magenta ribs generously flecked in and edged with yellow green. 30-36"
- 'Pineapple'** Bright golden foliage with pointed leaves accented with burgundy. Heat tolerant. Can be grown in sun or shade. 2'
- 'Ruby Slippers'** Bright leaves that are similar to 'Big Red Judy' but more compact. Sun to shade. H 14-24"
- 'Sedona'** Apricot-orange leaves with some pink blushing. 24-36"
- 'Smallwoods Driveway'** Medium sized leaves with curled deeply scalloped edges, with a base color of cream and a slight green hue, marbled with pink and burgundy. H 14". Choice!
- under the sea series** From Hort Couture comes this fun, colorful, eye-catching new breed of coleus. With 'crustacean' type foliage and names like the following, they grow compact, are sun tolerant and can be placed in both the sun and the shade. 15-18"
- 'Bonefish'** Deeply dissected leaves of bright fuchsia with chartreuse margins. Delicate feathery appearance.
- 'Fish Net'** The sea-green leaves of Fish Net have purple veining, but the filigreed edge is what sets it apart from the similarly colored standard coleus 'Fishnet Stockings'. Mounding, H 15-18".
- 'King Crab'** Wide, red leaves with a golden edge, claw-like fringed leaf center has a darker red flare. Very vigorous grower.
- 'Urchin Copper'** A tight ball of thread-like, copper-orange leaves with darker edges. Sun to Shade. 12"
- 'Wasabi'** Serrated chartreuse leaves. Holds brilliant color without fading or spotting. Sun or shade. 18-28"
- 'Wedding Train'** Trailing habit! Burgundy leaves edged in lime. Sun tolerant. H 12-18"
- wizard series** Compact and uniform, a great series for bedding. 12-14"
- 'Mix'** A lovely mix of greens, yellow, rose and orange colors.
- 'Sunset'** This tough and versatile variety does best in part shade as full sun may scorch the beautiful bronze leaves. Compact and bushy plants. 12-14"

COLOCASIA esculenta (Elephant Ears) Add a punch of tropical lushness to your

Annuals

containers, beds or water gardens with these enormous and very dramatic foliage plants. They require lots of moisture and are happy in 12" of water, preferring partial shade. 3-5'

'Black Magic' Dusty, purple-black 2' leaves in a giant clump. A bold display. 5-6'

'Black Ruffles' 'Black Ruffles' is a selection from 'Black Magic' with ruffled leaves. The ruffled edges give this selection an elegant look. H 4-5'.

'Diamond Head' This is a real stunner! Jet black leaves with an added sheen on brilliantly large leaves. Picture dark chocolate melting in hot sun!! This 4' clump of chocolately goodness will be a hit wherever you choose to display it. 4'.

'Elena' Growing to a height of 30-36", 'Elena' has chartreuse leaves with violet veins up to 20" long.

'Illustris' Dark green-black leaves with silvery veins. Very vigorous. 3-4'

'Jet Black Wonder' Very large exotic looking leaves of the deepest burgundy black. Big bold leaves easily grow 2' wide by 3' long.

'Mojito' Large spearmint green leaves mottled and splashed with hints of black. An eye catcher. 2-3'

royal hawaiian series The Royal Hawaiian® Colocasias have been bred to be sturdy garden performers and container specimens. Each is disease resistant with fabulous foliage and stem interest, and a tidy clumping habit.

'Tropical Storm' A compact, but fast clumper that grows to 30" tall, composed of purple-black foliage which is adorned in summer with a prominent central creamy white streak.

'Ruffles' An exciting elephant ear growing to a height of 3-4 feet and having large delicate leaves of medium green that are highly ruffled around the edges.

CONVOLVULUS A morning glory relative with widely flared, funnel shaped flowers. These clumping plants grow only 2' long and are perfect for baskets, barrels or borders. Full sun.

sabatius 'Early Blue' This plant bears small nickel-size, open blooms all summer long on trailing, strong growing stems. Sage green leaves offset its soft blue flowers just perfectly. 4-8"X10-12"

tricolor 'Ensign Blue' This variety has bright blue, 2.5" flowers with a yellow sunburst in the center and a band of white sandwiched in between. 12"X36"

CORDYLINE Long sword-shaped leaves, exceptional plant to use for height and texture in container plantings. Sun to part shade. Bring indoors to overwinter.

'Chocolate Queen' Upright stalks of variegated green leaves striped heavily with cream and white. As leaves matures, they become flushed with chocolate purple and deep red coloring. 18-24"

'Electric Flash' This plant has narrow leaves that have a chocolate colored central stripe and cream colored margins. This species is more clump forming. H 2-4'.

'Electric Pink' Brightly colored pink and purple -striped leaves. A shorter maturing variety. H 2-4'.

'Pink Passion' Bold neon pink leaf margins and grey purple centers. H 2-4'

'Red Star' Deep red Burgundy red sword-like leaves offer great texture and color.

COSMOS Old-fashioned bloomers create airy stands of cheerful flowers. Ideal for butterfly gardens and cottage gardens. Thrives in poor, infertile soil. Over fertilizing results in lots of foliage but few flowers. Full sun.

bipinnatus Broad, open flowers float above fine, airy foliage on sturdy stems.

'Cupcakes Mix' Novel cosmos resemble fluted cupcake wrappers with cup shaped

Annuals

flowers and fused petals. Mix of whites, pinks and some with a dark eye which are single and semi double. H 24-30"

'Double Click' Tall plants with large fully-double and semi-double blooms in shades of carmine, pink and white. 42-46"

'Sensation Mix' Single flowers, mix of rose, red and white. Tall stems. 36-48"

sonata series An exceptional compact series available in carmine, white or a mix of colors. Great garden performance. 20-24"

'Xanthos' This new pastel lemon yellow-colored, dwarf cosmos will make a sunny display. H 10-24"

'Chocamocha' Delicate chocolate-colored flowers held on sturdy stems with fernlike foliage. Loads of cocoa scented flowers. Yummy! 10", Heirloom

sulphureus C. sulphureus generally are smaller plants with deeply cut foliage and smaller flowers in warm "sulphur" tones.

'Bright Lights Mix' Semi-double flowers, mix of yellow, gold and orange. 3'

'Cosmic Mix' Offered in a mix of bright orange, rich red and yellow colors, these plants are stocky, well branched and are loaded with double flowers. H 12"

'Monas Orange' Bright orange, single flowers are often a darker orange around the edge. A real knockout! 36"

CUPHEA (Firecracker Plant) Very heat tolerant plants, originating from South America, which form bushy mounds smothered in dainty colorful flowers. Once a customer discovers that these plants bloom non stop in hot weather even with a little neglect, they are always back for more the next season. Full to part sun.

'David Verity' Deep orange, tubular blooms are small but add a subtle bright spot to mixed containers. A hummingbird favorite! 18-24"

'Flamenco Samba' (Bat faced cuphea) Large, rich, burgundy flowers bloom continuously throughout the season. Deadheading not necessary. H 12-20"

ignea 'Dynamite' (The Cigar Plant) This species is native to Mexico and Jamaica and is characterized by long tubular scarlet flowers with dark tips, resembling a lit cigar. Compact plants that blooms all summer. 8-10"

laevis (Twinkle Pink) Hot pink tubes flare to purple and white, blooms continually throughout the season. H 18"

'Lavender Lace' Delicate, lavender-pink flowers cover shrubby, rounded mounds from late spring to Oct. Unbelievable flower power, 6-10"

purpurea 'Firefly' Numerous large 1" wide cherry-red flowers are produced on long, lax, sprawling 15" stems. H 10". Perfect loud show stopper along border edge!

ramosissima 'Fairy Dust' Add a little magic to mixed combos with this dainty cuphea. An airy cloud of delicate, pink flowers fill the voids in mixed containers and garden plantings. Heat and drought tolerant. H 10-16"

CYMBALARIA muralis (Kenilworth Ivy) Kenilworth Ivy is a hardy, shade loving creeper with light green foliage and masses of tiny, lilac-white flowers all summer. Nice cascading habit for containers. Keep moist. Trails 8-12". May overwinter.

CYNARA cardunculus (Cardoon) Large, showy ornamental with woolly, gray-green leaves. Looks dramatic in urns or in the landscape. Edible root and stalks. Tender perennial. (Zone 6) 2' foliage, 5' in flower (if season is long enough - purple, thistle-like blooms) Full sun, average soil.

DAHLBERG DAISY thynophylla tenuiloba Charming and dainty plant. Small, golden

Annuals

yellow daisies cover aromatic, thread-like foliage. Lovely tumbling over pots and window boxes. Full to part sun. 4-6"

DAHLIA pinnata Large, brilliantly colored blooms overlook a mound of leathery green leaves. A good bedding plant for a very sunny location. Attracts butterflies.

'Bishop of Canterbury' Vibrant rosy-purple with dark foliage. 4'

'Bishop of Llandaff' A knockout with its single, bright red, 4" flowers contrasting against dark purple foliage. 4'

'Bishop of Oxford' Coppery orange flowers with dark foliage. 4'

'Bishops Children' Hot neon blooms against black foliage. A warm toned mix of solid and bi-color shades of red, orange, yellow, pink and purple. Both single and semi-double peony flowers. Informal bushy plant reaches 2 1/2 to 3' tall and about 1' wide.

'Cactus Tahiti Sunrise' A primrose yellow center and bright magenta tips give this cactus dahlia a warm glow. The 5 to 6" blooms are always a highlight in mixed bouquets. H 2-3'

'Dahlightful Crushed Crimson' Dissected, chocolate foliage and velvety burgundy-crimson semi-double flowers. Continuous blooms all summer. Heat tolerant and excellent mildew tolerance. H 24-36"

dalaya series An early flowering, medium sized Dahlia, powdery mildew tolerant. Excellent branching and repeat bloomers. Available in cream & pink, pink stripes & yellow centers, pink with dark center and lemon yellow. H 16-18".

dinner plate varieties Fully double, huge sized flowers. Truly as big as a dinner plate! All very floriferous varieties that produce color from early summer into fall.

'Fernleaf Inspiration' Beautiful, 7" lavender flowers with bluish tones at the edges. Sturdy stems. H 36-40".

'Kelvin Floodgate' If you like yellow, you'll love the classic, butter-colored flowers that arrive dinner plate-sized, at up to 10" across. H 36-40".

'Manhattan Island' 8" red flowers changing yellow towards the center. Sturdy stems. H 34"

'Myrtles Folly' Narrow twisted petals of peach, pink and yellow. Huge, 8", long lasting flowers. H 36"

'Ottos Thrill' An eye-catching 3-4' Dahlia with magnificent double pink flowers, up to 8-10" wide. Are not top heavy and will not fall over in rain.

'Summer Sunset' This Dahlia boasts flowers 6-9" across with masses of vibrant orange petals lightly touched with yellow. H 3-4'

'Vancouver' Purple flowers, 8", with a lighter center. H 36".

'Fascination' A unique offering with outstanding purple-magenta blooms against dark purple foliage. 3'

'Figaro Mix' Double blooms, mix of bright colors on slightly taller plants. 14"

karma series More lovely colors of Dahlias, each growing 2-3 feet tall. 'Corona', a blend of salmon, yellow and bronze cactus-type blooms and 'Fuchsiana', fuchsia pink, waterlily form. Long vase life. New for 2018, 'Chocolate', deep burgundy chocolate blooms, 'Prospero', pale pink with deep pink center and dark foliage, 'Serena', white blooms and 'Sunlady', a bright yellow.

mystic series Fluffy eye catching blooms above contrasting dark velvety foliage. Available in apricot, raspberry w/ eye, red and yellow. H 20-24"

'Onesta' Lovely salmon-pink. 2-4'

'Park Princess' A cactus-flowered Dahlia with huge blooms made up of many tightly rolled, pink petals. 24-30"

'Purple Gem' A cactus-type Dahlia with deep purple blooms. 2-3'

Annuals

'**Romeo Mix**' A dwarf variety with single flowers in a mix of colors. 10"

'**Starsister Yellow Stripes**' Full double blooms of yellow with white edges. H 12-24"

'**Worton Blue Streak**' These 4" bluish lavender blossoms are as close to blue as any dahlia on the market. Semi-cactus. H 3-4'

xxl series Strong stalks and colorful blooms, are the traits that make these great cut flowers, along with good branching and enormous double flowers. 20" X 18". Available colors are burgundy-red, orange w/ yellow center, intense pink, pink, yellow and white.

DAISY See Dahlberg and Marguerite.

DATURA innoxia (Angels Trumpets) Angel Trumpets are bold, upright, large leaved bushes with huge trumpets. Sweetly scented flowers open in the evening, until the following morning and all day when cloudy. Decorative seed pods add interest. The richer and moister the soil, and the hotter the summer, the larger these plants will grow. Full sun. Reseeds freely! All parts of this plant are poisonous!

ballerina series Characterized by fully double blooms. Offered in 'Purple' with deep purple-red stems and frilly blooms with pale purple interiors and dark purple exteriors. Also, a sunny soft 'Yellow'. 8-10"

ssp. quinquecupida (white) Fragrant, 8", white flowers with lavender tinges. Grey green leaves. Very prickly seed pods. 3-4' tall, 3-4' wide.

DELPHINIUM grandiflorum 'Summer Nights' Tender perennial Delphinium, loved for the dwarf size and elegant spikes of indigo blue flowers. Bloom strongest in June. Full sun. Fertilize regularly. 12"-18".

DIANTHUS barbatus (Sweet William) Technically a biennial, this classic, old-fashioned cottage garden plant is great in annual borders. Extra strong and long stems for cutting gardens Should reseed. Nice cut flower. Deadhead to prolong blooming. Sun, well-drained soil. 2-3'

'**Jolt Pink**' A blaze of showy, bright-pink, fringy blooms, non-stop from spring to fall. H 16-20"

'**Jolt Pink Magic**' Three inch white flowers magically deepen into darker shades of pink as they mature, making a beautiful spray of color. Plants are all-season performers that tolerate all sorts of weather. H 16-20"

'**Rainbow Loveliness Mix**' Uniquely lacy blooms loaded with fragrance. Deeply cut, lacy flowers in shades of rosy pink, lilac, white, purple and red on long stems. H 12-14"

'**Sweet Mix**' Large fragrant flower heads that bloom uniformly across all colors. Mixture of coral, purple, red w/white eye and white. H 18-39"

DICHONDRA argentea 'Silver Falls' An exceptional component plant with brilliantly silver foliage. Many long, trailing stems are clothed in small, roundish leaves. Trails 1-3'. Truly stunning in mixed containers. Sometimes, if lucky, they reseed into dry cracks and crevices of walkways or stonewalls. Keep on the dry side. Full sun.

DIDISCUS AKA TRACHYMENE caerulea 'Lacy Blue' (Blue Lace Flower) This old-fashioned garden plant produces lacy umbels of sky blue flowers upon graceful stems. The fine textured blooms make a delightful cut flower in small bouquets. Full to part sun. 24", Heirloom

DIGIPLEXIS Best New Plant Award at the Chelsea Flower Show and Greenhouse Growers 2013 Award of Excellence! This new hybrid foxglove is a cross between Digitalis and its relative Isoplexis. Digiplexis® are hardy in zones 8 and higher, although the longevity of the

Annuals

blooms makes this tender perennial a must have for every climate gardener. Blooms from spring until fall. Will not self-sow. Full to part sun, average soil.

'Berry Canary' The flower spikes contain hot pink flowers with creme throats speckled with dark wine dots that line the whole stem. Prolific bloomer, 24" x 20"

'Illumination Flame' Upright flowers stems support tubular flowers that look like illuminated flames. The spectacular colors range from the outer petals being a fuchsia hue, while the throats transition between red, orange and pale yellow. Up to 36" X 18"

DIGITALIS purpurea 'Foxy' (Foxglove) An annual Foxglove which blooms all summer in full sun or partial shade. This All America Winner produces racemes of thimble shaped flowers in cream, yellow, and purplish-rose shades. 2-3', Heirloom

DRACAENA cordylena (Spikes) Spikes are traditional accent plants with long, sword-like leaves. They are often used in the center of planters to add height and textured foliage. Sun or shade. 2'

DURANTA (Skyflower) This member of the Verbena family is a large evergreen shrub in its native South American location, where it grows 15-18'. In our climate it grows 1-2' in height and makes a beautiful container specimen. Full sun.

aurea 'Gold Edge' One of those rare chartreuse foliage plants for full sun. Glossy green leaves are thickly edged in bright gold. A great accent plant of mixed containers.

erecta 'Sapphire Showers' An upright form with gorgeous violet blue flowers bearing a white picotee edge on flared petal tips. Winter indoors, gets even better with age.

DUSTY MILLER senecio cineraria Traditional silver foliaged accent plants that endure hot, dry conditions. Serrated silver leaves add texture and contrast in the garden. Cold hardy annuals last late in the fall. Full to part sun, average soil. 8"

'Cirrus' Large, round, broad silver leaves are produced on compact plants. Known for excellent weather resistance. 8"X20"

'Silver Dust' Showy, finely lobed silvery-white foliage on uniform plants. H 10-12", 10-12" spread.

EMILIA coccinea 'Scarlet Magic' (Tassel Flower) Vivid red button flowers are held up on slender stems. These attractive fluffy flowers gently sway in a breeze, resembling a artist's tassels, giving the common name of tassel flower. A nice filler plant with striking color. Full sun to part shade and average soil. 16", Heirloom

ERIGERON karvinskianis 'Profusion' Masses of tiny daisies cover low, spreading plants all summer long. The flowers open white and mature to pale pink, creating a delightful pastel mix for borders and containers. Full to part sun. 5"

EUCALYPTUS gunii 'Silver Drop' Small, silver-green leaves on well-branched stems are ideal for fresh or dried bouquets. A tender evergreen tree, native to southern Australia that makes an excellent foliage accent in our colder climate. Minty aroma. Full to part sun. H 24-36"

EUCOMIS (Pineapple Lily) This fragrant South African native has tropical-looking, fleshy leaves with flower spikes that appear to be miniature "pineapples" at the top of each stem. Full sun preferred, it is perfectly normal for leaves to "wilt" a bit during the hot midday, but don't worry, they perk up again the next morning.

'Freckles' This dwarf pineapple lily has it all – a vigorously clumping habit, spotted leaves, wavy margins, and attractive rose red flowers. H 8-10"

'Sparkling Burgundy' Dark burgundy leaves that slowly change to olive green, and then

Annuals

revert back dramatically as the flowers fade. The flowers form on 20-30" stalks bearing bottle-brush-like wands of tight, smokey pink florets.

EUPHORBIA A large genus characterized by flamboyant foliage containing milky white sap. Extremely heat and drought tolerant. Full sun, average soil.

'Diamond Frost' Deep green, lance-shaped foliage cloaked in clouds of airy, white blooms on long stems. 10-14"

'Flame Leaf' An exceptional component plant for mixed containers in sun or part shade. Dark burgundy foliage edged in chartreuse. 8"

EVOLVULUS 'Blue My Mind' Delicate, petite, true blue flowers cover the silvery foliage. A heat loving plant that will be covered with blooms from spring to fall. Mounding/trailing habit that will make an excellent addition to containers or as a ground cover. Sun. H 6-12", spread 12-24".

FELICIA A member of the daisy family, Felicia does best in full sun and well-drained soil, deadhead throughout the summer to keep up appearances and they will bloom right into late fall.

amelloides 'Variegata' Small bright blue daisy shaped flowers with green and white variegated foliage. H 10-12".

'Cape Town Blue' A old fashioned favorite with charming, free flowering, periwinkle blue blooms held amongst egg-shaped leaves. Cool weather annual - may take a flowering break in the heat of summer. 8-12"

FERNS Fabulous foliage components integral to your gardens or containers; within this selection of ferns you'll find the addition you need: either lacy, delicate, small, bold, or large. All can be overwintered as house plants. They need lots of humidity, indirect light and should never dry out.

ADIANTUM (Maidenhair Ferns) The Maidenhair Ferns are finely foliated evergreen plants. There are over 200 species.

caudatum (Trailing Maidenhair) A caudatum is unusual for a maidenhair fern as it has long narrow cascading fronds. New growth emerges pink then matures to a apple green. Fronds will cascade 12-16", adding an elegant flowing quality to shade planters.

fragrantissimum (Fragrens) Light airy fronds, triangular shaped foliage on glossy black stems make this a popular variety for containers. Easy to maintain as a houseplant.

hispidulum 'Rosy Leaf' An interesting maidenhair fern cultivar having delicate red tinted new growth.

microphyllum 'Little Lady' A dwarf maidenhair, compact and charming. Adding an ephemeral quality to mixed shade containers.

peruvianum 'Silver Dollar' A bold strong grower with large leaflets of silvery-green. Adds a nice course texture to mixed containers. 18" X 12"

raddianum Commonly called Delta maidenhair fern, and its perhaps the most commonly grown of the non-winter hardy maidenhair ferns. Triangular, 3- or 4-pinnate fronds with dark stalks.

ARACHNOIDES simplicior 'Variegata' (East India Holly Fern) This charming fern is evergreen with dark green leaves and bright yellow variegation down the midrib. Will grow up to 2'

ASPARAGUS Not of the vegetable variety or a true member of the fern family, these so called ferns are a lovely addition to home plants. They are, believe it or not, a member of the lily family. You can often find them used in window boxes and hanging baskets, in coordination with mixed flowers. They like humid conditions with filtered sunlight.

Annuals

setaceus (Plumosa Fern) Rich green delicate foliage, with thin wiry stems that form to create soft feather-like patterns across long twinning stems. Great filler for arrangements. Prefers full light but will tolerate low light conditions.

ASPLENIUM This popular group of ferns is prized for its frond symmetry, frond texture and sheen and great growth habit.

antiquum 'Victoria' (Japanese Birds Nest) Long, leathery, glossy apple green leaves emerge from the center of the crown, with wavy edges. Long lived house plant that gets additional character with age. Very showy. 20"

bulbiferum (Mother Fern) A beautiful tender fern with lacy foliage of light green. A great textural and color accent for shade gardens.

dimorphum 'Austral Gem Fern' Growing to a height of 20" tall and about 24" across. The thick yet delicate fronds are so glossy that they look fake!

nidus (Common Birds Nest Fern) This Fern will give you lots of naturally glossy leaves arranged in a circular pattern which resemble a bird's nest (hence the common name for these houseplants).

BLECHNUM brasiliense crispin (Red Leaf Tree Fern) New central growth on this tree fern is bright red, as leaves mature they fade to light green. 3'

DAVALLIA fejeensis (Rabbit Foot Fern) Finely textured foliage with creeping furry rhizomes. Grows quite large (1x2') over time. Looks really neat as a hanging plant.

MICROLEPIA strigosa (Lace Fern) Bright green lacy fronds, 15-20" long, that arch gracefully making it a good choice for hanging baskets or specimen containers.

NEPHROLEPIS This Genus of about 30 species of evergreen ferns. The most common being the Boston Fern.

cordifolia 'Duffi' (Lemon Button Fern) This fern produces cute golden-green fronds with a rounded edge, thus giving it a button-like appearance. Smells slightly like lemons. A compact grower, will grow to 12" tall and wide.

exaltata 'Ritas Gold' Vibrant golden yellow foliage adorns this boston fern family member. Fronds grow to about 18" and make nice foliage accents in deep shade.

obliterata 'Australian Sword Fern' Upright growing from 2 - 4 feet. Great vertical accent plant withstanding sunny dry conditions.

PELLAEA roundifolia (Button Fern) An low-growing fern with small rounded, button-like leaves that line its wiry, burgundy-red stems. Makes a beautiful accent. Enjoys filtered sunlight. Up to 10".

PTERIS cretica 'Albo Lineata' (Silver Lace Pteris) Small delicate fern with silver margins on its gray-green fronds.

FOUR OCLOCKS (Mirabilis) An old-fashioned favorite whose flowers open in the late afternoon, as the common name suggests, and not at all on cloudy days. Funnel shape flowers are pollinated by moths and other insects during the night. Sun

'Limelight Rose' This is an old fashion, rediscovered variety with startling contrast of hot pink flowers and chartreuse foliage. 2'

'Marbles Mix' Heavy bloomer! A mixture of multicolor cultivars in a wide range of bicolors that include pink, yellow and white. Offers a summer filled with color. 24" X 14"

'Salmon Sunset' True salmon-colored trumpets with a pale pink star at the center of each flower. H 2-3'

FUCHSIA Shade lovers with intricate blossoms. The blooms consist of upward arching sepals (outer petals) and single or double corollas (inner petals) from which dangle long stamens. Each bloom looks like a dancing fairy. All prefer a cool, moist spot. Keep

Annuals

well-watered and fertilized during the heat of summer. Part shade to shade, though some listed like more sun and will say so.

trailing types Trailing foliage and dangling blooms create a showy display for hanging baskets. Loved by hummingbirds.

'Ballerina Dreams' Magenta corolla crowned with rose pink sepals.

'Blacky' Dangerously dark black corollas with fuchsia sepals. Semi trailing

'Dark Eyes' Double violet-blue corollas surrounded by rose-pink sepals.

magellanica This hardy fuchsia is known for its colorful foliage.

'Aurea' Crimson flowers and small, golden, yellow leaves on arching reddish stems. A striking component plant for mixed containers and window boxes. Sun or shade, although the foliage is brighter in sun.

'Versicolor' Grey green leaves edged in white. New growth is tinted pink providing a lovely accent. Delicate red flowers, shade or part sun.

'Swingtime' Double white corollas surrounded by rose-pink sepals.

upright types Well-branched plants for beds and containers.

'Autumnal' Cascading branches clothed in bright rush colored foliage and brilliant red flowers all summer. Mounding habit. 18-24"

'Ballerina Blue' Double, deep purple corollas surrounded by cerise sepals. Flowers all summer.

'Firecracker' Fabulous green and cream variegated foliage with bright salmon orange flowers. Part shade to sun. 15"

'Gartenmeister Bonstedt' Smooth burgundy veined leaves with purple undersides. Clusters of showy, deep apricot flowers all summer. This vigorous ever-bloomer is tolerant of sun and heat. 12-18"

sunbeam series A mini Fuchsia! This series offers smaller, single flowers in various shades of pink held above the bushy, small-leaved foliage. Blooms all summer. Available in Bright Pink ('Paloma'), Dark Fuschia Pink ('Lambada') and Rose/White ('Ernie'). H 4-8", spread 8-12".

windchimes series Upward, large double, brilliantly colored flowers with compact growth that never becomes straggly and keeps blooming even in the heat of the summer. 10-16". Available in 'Lilac Rose' and 'White & White'.

GAILLARDIA pulchella 'Red Plume' Fluffy, very double flowers of brick red. All American Award winner. Showy daisy-shaped blooms on compact, bushy plants with incredible tolerance of drought, heat, and poor soil. Great garden performance all summer. An excellent choice for massing in annual borders. Full sun. 12"-14"

GAURA lindheimeri belleza series (Bee Blossom) A native of North America, Guara gives the garden a wonderful informality with its long, wispy stems and butterfly-like flowers. Does well in hot, dry sites. Commonly listed as a perennial, we have found it not to be reliably hardy in our gardens. Flowers from summer until a hard frost. Use in containers and borders. Full sun, average soil. Try 'Belleza White' or 'Belleza Dark Pink', with dark leaves. H 12-18"

GAZANIA new day series Bright, showy flowers, open in full sun but close at night and on cloudy days. An African native, this daisy is very heat and drought tolerant. Full sun, average soil. This series is more compact, has larger 3" blooms. Available in Pink ('Pink Strawberry Shortcake Mix') and a Bright Mix. 6-8"

GERANIUMS pelargonium Long standing favorite annuals with a plethora of uses. Full to part sun, average soil.

Annuals

calliope series As a result of breeding regular zonal geraniums with ivy geraniums, you get an upright yet spreading plant with great flower power. These plants are covered with large flower clusters, making them ideal for hanging baskets, patio pots or garden beds. Available in Burgundy, Crimson Flame, Lavender Rose, Hot Pink, Pink Flame and Dark Red and White. 12" X 12-16"

fancy leaf hybrid forms Foliage plants have become an integral addition to perennial beds and more importantly container gardens. This type of geranium is grown for its variations in both leaf and color variegations. Often with single blooms, the foliage is where the attraction lies.

'Brocade Cherry Night' Chocolate leaves with a narrow green margin topped with truly cherry colored blossoms. H 10-12"

'Brocade Fire' Unique bicolor foliage with a nonstop display of semi-double orange flowers. Holds its foliage color and brilliant blooms throughout the hot summers.

bullseye series Unique dark chocolate foliage, edged in light green, creating a nice contrast to the large 4 to 5" flowers on multiple stems. Available in Cherry and Light pink.

'Contrast' Green leaves generously edged in cream and sandwiched in between is a broad band of red, with small bright red flowers. 10-18"

'Crystal Palace Gem' Bright yellow leaves have splashes of dark green and provide a striking contrast to the bright magenta-orange flowers. Heirloom

'Frank Headley' A dwarf, compact, showy plant that is in constant bloom with single, salmon flowers. Clean white edged green foliage.

'Gitterati Ice Queen' The stunning bright white and green foliage is a standout on its own. The bright red blooms are the icing on the cake, or geranium, in this case. Spreading habit.

'Indian Dunes' Rounded chartreuse leaves with deep rust central markings and hot fuschia red flowers.

'Mrs. Peters' Mrs. Peters' bears single, bright-pink flowers amidst its green and cream variegated leaves on mounding plants that remain shorter than 14 inches.

'Persian Queen' Single magenta flowers above bright lime-green foliage. Striking color combination.

sidoedes A unique clump growing Geranium packed with small, felted grey leaves. Deep maroon flower clusters are held on fine stems.

'Vancouver Centennial' Decorative foliage is lobed and pointed, marked with burgundy against an almost chartreuse background. This fantastic contrast is highlighted by bright orange-red flowers. 12-14"

'Wilhelm Langguth' Intense red flowers appear over green foliage splashed with cream, lovely variegation. Grows to 12".

ivy series (Peltatum) Cascading plants with glossy, ruffled, ivy shaped leaves. Loose clusters of colorful flowers bloom amongst the foliage. Wonderful in planters.

grand idols series A waterfall of color! Early bloomers with an abundance of mini flowers clusters. Available in Dark Red and Pink. 12-18"

royal series Heat tolerant, vigorous ivies that have self-cleaning single flowers. A spreading habit and maintenance-free flowers make this series ideal for beds and containers. Offered in Blue, Burgundy, Dark Red, Lavender, Light Pink, Salmon, Scarlet Red and White/Red Eye.

scented geraniums Totally undemanding plants that thrive on neglect. All they need is a sunny spot and an occasional watering and they will reward you with fragrance and flowers

Annuals

all season. Certain to turn any brown thumbs to green. Delightful in the herb garden, pots, or as houseplants.

'**Attar of Roses**' Upright habit, with large rose scented leaves. 24"

'**Citronella**' Deeply cut foliage with a powerful lemon scent. 18-22"

'**Lady Plymouth**' Deeply cut rose scented leaves with a soft sage green edged in yellow coloring. Delicate lavender pink flowers. 14-20"

'**Spearmint**' Very large, soft, fuzzy leaves with a fresh minty scent. Pale lavender flowers. A vigorous grower.

zonal Traditional bedding Geraniums with good garden performance. Large, double blooms. Available in apple blossom, purple, shocking pink, dark red, salmon, strawberry, and white.

GERBERA 'Mega Revolution Select Mix' (African Daisy) An elegant long season display of big, bold, daisy-like flowers set on well shaped plants with crisp dark foliage. The largest of flower sizes in 12 different colors. Grow in moist, but well-drained soil, in full sun. Attracts butterflies like crazy! H 16"

GILIA capitata 'Super Bee' A native California flower with ferny foliage and lavender blue globe flowers that act as beacons to bees and butterflies in the garden. 12-15", Heirloom. Circa 1826

GOMPHRENA Globe Amaranth has long been treasured in everlasting arrangements with its papery, clover-like blooms. Likes well-drained, even dry soil and full sun.

'**Fireworks**' Intense, hot pink flowers carried on tall, scaffolding stems. 36-48"

globosa 'Cosmic Flare' An all summer, shockingly beautiful 'Cosmic Flare' will brighten up any border or container with its spectacular chartreuse foliage and magenta blooms. H 15-24" x 20-24".

las vegas series This new series provides bright colors, excitement and heat tolerance. Available in Purple and Pink. 20"Hx20"W.

'**Qis Red**' Bright and bold shade of red. 24-26"

GOSSYPIUM herbaceum 'Nigra' (Black Cotton) Ornamental Cotton. Hibiscus-like burgundy flowers followed by walnut size seedpods. In early fall, with a little luck, the seedpods will open into fluffy white ball of cotton. Dark foliage and stems. Full sun, average soil. H 18-30".

GRASSES Ornamental Grasses have been gaining popularity with each passing year, understandably so. They make wonderful statements in any garden with their strong linear shape and their inflorescence gracefully swaying in the breeze. Sun

ARUNDO donax 'Peppermint Stick' (Giant Reed Grass) With its striking, green and white variegation, this grass will certainly stand out in the garden. Use for screening or as a specimen where a large drought-tolerant plant is needed. Plants spread through underground rhizomes forming large clumps. H 8-10'

CAREX 'Frosted Curls' Finely textured grass with light green edged in darker green. Its pendant, cascading habit has a softening effect. H 10-14", Prefers moist conditions.

CYPERUS Native to the tropical and temperate regions of the world, these sedges are aquatic plants that grow in still or slow moving water. Great as a focal component in water gardens or ornamental containers. Part sun to sun.

'**Baby tut**' 'Baby Tut' is a smaller version of 'King Tut'. A water garden friendly-grass that can be planted in the landscape or mixed containers, as well. 18-24"

'**King Tut**' This dwarf form of Giant Papyrus has pendulous greenish leaves and greenish flower spikelets atop tall upright stems. An exotic looking beauty. 48-72"

Annuals

'Prince Tut' A nice compact form, about half the height of King Tut, but with the same large poms on the ends of the stems. 30-48"

ISOLEPSIS cernus 'Live Wire' Fiber-optic Grass has a dense mop-like tuft of fine green foliage that is tipped by tiny flowers. Looks poignant as the sole specimen in an elevated pot where its graceful, pendulous form can be displayed.

JUNCUS Juncus rushes have leaves which are either thin or round and contain a spongy pith. There are many species, the following ornamental rushes are well suited for annual beds and mixed containers, with their unusual and different, stiff upright foliage.

effusus 'Big Twister' Wow! Deep green cylindrical foliage twirls in bold, upright spirals, creating a modern look. Height 18-24"

fuseables 'Twisted Arrows' A combination of straight 'Blue Arrows' and 'Curly'(effusus spiralis) Juncus creating a species with a blue-green color contrast, along with an arresting plant habit of straight and twisted. Recommended for mixed and single containers. H 18-36", spread 12-18".

inflexus 'Blue Arrows' Linear blue foliage and strong vertical habit makes this a reliable accent in container plantings. This low maintenance rush tolerates full sun and drought, yet can be used as a pond plant. 3'

LAGURUS ovatus 'Bunny Tails' Perfectly named because the cream colored 2" oblong flower heads are as fluffy as a bunny's tail. Excellent for containers, borders and dried flower arrangements. H 20".

MELINIS nervigulmis 'Savannah' (Ornamental Ruby Grass) This variety has showy pink, feathery 'flowers' above the slender blue-green foliage in the summer and fall, yet stays attractive into the winter months. Clumps of Ruby Grass are very dense, mounded and absolutely stunning when in 'flower'. H 18-24"

PENNISETUM Annual grasses are much underused garden plants. Amidst flowering bedding plants, they make unique accents with their feathery wands and flowing foliage. Heat and drought tolerant.

glaucum (Ornamental Millet) Upright mounds of decorative, wide blades with showy wand-like flowering spikes arriving in the summer.

'Jade Princess' Upright fountains of chartreuse-lime foliage all summer, topped by burgundy wands. 3-4'

'Jester' A millet with beautiful foliage changes as season progresses from lemon green to bronze purple. 3-4'

setaceum (Fountain Grass) Fountain Grass produces arching, feathery inflorescence in a lovely greenish purple which age to a golden brown in Fall. A loosely gathered circle of narrow blades forms a graceful mound. 2-3'

advena A hybrid of fountain grass which bears slightly wider, arching blades

'Cherry Sparkler' Yet another spectacular 'Rubrum' sport! Pink blush overtakes the white and green striped leaves as light levels increase. Red/burgundy plumes. Height 2'

'Fireworks' 'Rubrum' with a flair! A variegated purple fountain grass with mid-veins of burgundy and hot pink margins. Simply fabulous!

'Rubrum' (Purple Fountain Grass) Deep burgundy foliage is topped by dramatic purple-red plumes all summer. 3-4'

'Skyrocket' Bright green and pristine white foliage with plumes. A morphological sport of 'Fireworks'. 20-30"

x 'Regal Princess' Similar to 'Princess', with improved purple color and enhanced disease resistance. The blades grow ever-deeper purple in the heat of the summer and will

Annuals

not fade. H 3' X 3-4'

x. 'First Knight' The newest noble boasts the deepest, darkest, blackest purple of them all. A sword thrust of very upright leaves in center, arching around the edges. Hail! H 48-54"

STIPA tenuissima aka nassella ten. 'Pony Tails' Mexican Feather Grass is a very fine textured grass which forms a wispy fountain bordered by creamy silver inflorescence. A cool season grower which maintains its beauty all summer. Lovely swaying in a breeze. May over-winter. Prefers dry conditions. 18-24"

GYPSOPHILA muralis gypsy series Compact mounds of foliage are covered by clouds of tiny, papery blooms. Heat tolerant. Forms neat mounds that are 8-10" tall and wide. May reseed. Full to part sun, average soil. Offered in 'Deep Rose' and New for 2018, 'White'.

HELICHRYSUM Great foliage plants to add textural interest or to cool down hot colors. These multi-branched plants are ideal accents in the garden or large planters. Heat tolerant but heavy drinkers. Full to part sun.

augustifolium 'Icicles' Dense, upright clumps of bright silver, needle-like foliage. A nice foliar accent which is also edible!

petiolare Trailing, well-branched plants with soft, rounded leaves. Excellent weaving amongst taller plants. Excellent companions to hybrid vegetative petunias.

'Licorice' Soft, silver leaves. Extremely vigorous grower, spreading habit.

'Licorice Lemon' Lime green foliage on plants preferring partial shade.

'Licorice Splash' Gray green leaves variegated with greenish yellow. Compact.

minus 'Silver Mist' With small, bright silver, fuzzy foliage and a more polite growth habit, this is truly superb component trailing plant. 6-8"

HELIOTROPE heliotropium arborescens Large, dense clusters of deep purple blossoms rise above dark green, deeply ridged, purple tinged foliage. The blossoms have a sweet vanilla aroma and are a nice cut flower. Plenty of fertilizer and water will produce luscious growth and large flowers all summer. Attracts butterflies. Sun

'Alba' Large umbels of pure white flowers. Tremendously fragrant! H 12-18"

'Fragrant Delight' An immensely fragrant, vegetatively propagated variety. Deep purple blooms. 12"

'Marine' Giant umbels of deep purple flowers. 12-18"

HEUCHERA little cutie series Colorful foliage plants in a variety of colors. This series is just the right size for mixed containers, also perfect for fairy gardens and rock gardens. H 6-10", Zone 4-10

'Peppermint' This bright green miniature is heavily veiled with silver. Spikes of bright pink flowers bloom all season.

'Sugar Berry' Berry-violet with dark veins and sugary pink flowers spikes on short stems.

'Sweet Tart' Very tangy, lime colored foliage in a tight mound with taller dark stems of bi-colored cerise and hot pink blooms.

HIBISCUS A tropical plant, having large, showy variously colored flowers. They like indirect sunlight and good drainage, important because they do not like wet feet! Hibiscus will live a long time if you overwinter them indoors.

'Mahogany Splendor' A thriller in containers adding some awesome color and dramatic height. Resembling a mini Japanese maple, this 4-5' tall plant sends up a lovely mahogany screen of maple shape serrated deep burgundy leaves.

rosa sinensis Native to tropical Asia and are among the showiest of flowering shrubs.

Annuals

'Cajun City Slicker' Abundant, 6-6.5" blooms, colors from light pink, purple to red. H 3-5'

'Spin the Bottle' A carnival pinwheel of gorgeous reds, oranges and pinks radiating out to ruffled yellow edges. H 3-5'

tiliaceus 'Variegata - Tricolor' Grown mostly for its fab foliage, will grow to 3-4 feet in one season and form a nice sized shrub. The glossy 6-8 inch oval leaves are generously splashed with green, white, pink and deep red. New growth is a deep delicious burgundy.

trionum 'Simply Love Superior' This variety has pale yellow flowers with maroon centers. Bushy habit and continuous bloom all summer. Marvelously heat tolerant and does well even in poor soils.

HOLLYHOCK 'Queeny Mix' A fantastic dwarf variety that boast 3-4", double blooms in a rich mix of colors. Unlike perennial varieties, these will bloom freely all summer. Prefer full sun. H 2-3'

HOMALOCIADIUM platycladum 'Ribbon Plant' The ribbon plant has flat, segmented leafless stems. Growing to a height of 2 – 3 feet in one season and quite the novelty for combination planters. Grow in sun to part shade. Also does very well as a houseplant.

HYPOESTES phyllostachya 'Hippo Rose' (Polka Dot Plant) Stunning bi color foliage with shades of bright pink and green, features larger leaves and more vigor. Full sun to full shade and adaptable as a houseplant. The upright habit allow this plant to be used as a thriller/filler in combinations. H 16-22" X 14" W

IMPATIENS An ideal annual flower blooming profusely with sparkling color all summer. The flowers drop away cleanly when spent and the plants are self branching. And perhaps most important, although impatiens are succulent plants needing abundant water, they will revive from a severe wilt with no apparent damage.

bedding A beloved flowering plant for full to part shade. Wonderful in beds or containers, Impatiens flower vivaciously all summer in an incredible range of jewel-tones. Very neat plants which drop their spent blooms, and form compact mounds. Best in ordinary, moist soil. Available in a wide range of colors. 8-10"

big bounce series This new shade alternative offers the habit and flower count of Impatiens walleriana, but they're resistant to downy mildew and thrive in sun and shade. Even better, the well branched plants bounce back like magic after wilt. Offered in a wide variety of colors. 20-30" X 20-36".

double Beautiful double flowers resembling tiny roses are carried upon bushy rounded mounds all summer. Keep amply moist. Drying out causes buds and flowers to drop. Offered in a variety of solids and bicolors. 8-14"

fusion exotic series Tropical 'seashell'-type blooms, stunning 'Heat Coral ' and 'Glow Yellow'. H 14"

new guinea Bushy plants with linear leaves in a variety of shades of green, some with variegation and some with a deep purplish hue. Neat mounded habit results in lovely bedding and container plants. Available in a wide range of colors, including solids and bi-colors, green and burgundy foliage. Does best in average soil with plenty of moisture. Partial shade is best. 8-12"

sunpatiens A cross between traditional New Guinea impatiens and a wild impatiens, this series has slightly thicker leaf wall and strong garden vigor that allow them to grow well in all summer conditions. Compact. Plant in full sun to partial shade. 18-30". Available in several colors.

Annuals

IPOMOEA (Sweet Potato Vine) A varied genus which includes the Morning Glory (See Annual Vines), Cypress Vine (See Annual Vines), as well as the popular "Sweet Potato Vines", which are not known for their flowers, but loved for their foliage.

batatas Decorative foliage and a bushy, sprawling habit ideal for a ground cover or a container plant. Sun or shade.

'Blackie' Burgundy-black palmately lobed foliage.

'Marguerite' Glowing chartreuse foliage. Very robust plants with an effortless cascading habit, ideal for trailing over the edge of containers.

'Sidekick Bronze' A more compact variety, with bronze heart shaped leaves. H 12-14" x 30" W

'South of the Border Chipotle' A hot and spicy filler for containers. Nice contrast of dark wine and lime foliage. Moderately vigorous with a semi-trailing habit.

sweet caroline sweetheart series This is a compact, mounding series that grows 8" tall and will not overpower neighbors. Beautiful heart shaped foliage. Available in 'Red', 'Jet Black' and 'Lime'.

'Tricolor' Lobed foliage of light green with pink and white variegation. Not as vigorous, or shall we say a more polite grower than other varieties.

IPOMOPSIS rubra 'Scarlet Surprise' (Standing Cypress) Hummingbird Nectar! Showy, red, tubular flowers, are arranged in a thick spike. A Southeastern Native. Sun, prefers well drained soil. 2-4'

KALE ORNAMENTAL brassica oleracea 'Nagoya Mix' Rich full color, lacy leaves. Nagoya Mix adds sensational color to the fall and winter garden. "Flower" colors intensify as temperatures drop. Quite often overlooked. These kales are really showy for several seasons of color.

LANTANA Heat loving plants with clusters of brilliantly colored florets, irresistible to butterflies and hummingbirds. Full sun.

camara This plant comes in many combinations of red, yellow, and orange flowers in small clusters. Deadheading spent flowers will encourage additional blooming and will prevent the growth of toxic berries.

bandana series Well branched with large blooms and a nice mounding habit. An early blooming variety that will bloom all summer. Offered in 'Cherry Sunrise', 'Peach' and 'Red'. H 12"

bloomify series Offered in 'Rose', rose-pink and yellow flowers and 'Red', a blend of rose, peach and yellow hues. Sterile varieties, no more deadheading seed pods. Perfect plant to carry you through the summer months in color.

landmark series A nice mounded selection of vividly colored blossoms. Available in 'Citrus', 'Gold', 'Rose Glow', and 'Yellow'. H 15".

'Lucky Lemon Glow' The dark green foliage contrasts beautifully with the bright yellow and white flowers. H 12-16", spread 12-14"

luscious series Brightly colored flower clusters. Available as 'Berry Blend', 'Grape' and 'Marmalade'. New for 2018 'Royal Cosmo', pink-magenta-purple with yellow-orange highlights.

'Samantha' Variegated foliage sports golden blooms. Semi-trailing habit.

montevideensis 'Weeping white' A continuous bloomer, producing small, white flower head clusters. Low, naturally spreading.

LARKSPUR consolida Loving cool weather, this Delphinium relative is best planted early

Annuals

in the season when the days are still cool. For optimum flowering and garden performance add plenty of lime prior to planting. Full sun.

ambigua 'Giant Imperial Mix' Showy spikes of pink, purple, white and lavender. Excellent choice for spring and early summer cut flowers. 24-36", Heirloom

'Blue Cloud' Bushy clouds reminiscent of Baby's Breath producing half inch florets in a rich purple hue. Self cleaning plants. 24"

LAURENTIA The diminutive size of this plant's leaves, flowers and overall height makes it a terrific plant for containers. Multi branched stems bear deeply divided alternate, 1" wide leaves. Delicate star shaped blue flowers appear in profusion all summer long. Full sun.

'Beths Blue' Grown from vegetative cuttings and slightly taller, 10-14"

'Gemini Blue' Single, star shaped blooms on finely cut foliage. Keeps nicely controlled mounding habit in containers. H 8". Easy to grow.

LAVANDULA stoechas (Spanish Lavender) This early-blooming compact shrub bears intriguing pine-cone-shaped flowers that have dark-purple bracts, or "rabbit ears." Bloom appears from late spring to summer. Full sun. This species is a tender perennial and will only over winter in zones 7 and above.

'Bandera Purple' An abundance of spikes with dark purple flowers, and lighter purple flags, that practically cover the entire plant. Holds dense, mounded habit without falling open, perfect for pots. H 10-12"

'Madrid Purple' 'Madrid Purple' will reach a height of 18-24" with large flowers from May to August. Foliage is aromatic and can be used for culinary purposes. This species is a tender perennial will only over winter in zones 7 and above.

LAVATERA trimestris 'Pink Blush' Large, silky cup-shaped blooms of blush pink are produced above sizable light green lobed leaves. A fabulous bushy border plant smothered in flowers until frost. H 28-32"

LEONOTIS Tender perennials native to South America with remarkable flowers and a posh upright stature. Whorls of flowers are carried on leafless stems, each whorl consisting of dozens of lipped flowers. Interesting plants best used in garden beds for a dramatic, quirky look. Full sun and well drained soil.

leonurus (Lions Ear) This lions ear fits nicely into mid to large planters and in mixed garden beds. Vivid orange, velvety, whorled blooms appear in clusters along upright stems. 3-4'

ocymifolia var. raineriana (Dwarf Lions Ear) Bright, velvety orange flowers in dense whorls. Shorter and a more compact appearance. The velvety foliage is gray green. 18-24"

LINUM grandiflorum 'Blue Dress' Stunning border plant, producing tiny sprays with masses of true-blue flowers throughout the summer. Ideal for containers or borders. Full sun, 12-20"

LISIANTHUS eustoma grandiflora Unusual and treasured annual rarely found in the marketplace. Exquisite blossoms reminiscent of a cross between a tulip and a rose carried upon lovely gray green foliage. A breath taking cut flower that endures up to two weeks. Moist, fertile soil with some added lime is a must. Full sun

abc series Double-Flowered Lisianthus. Offered in several beautiful colors: Deep Purple, Rose, Yellow and White. H 24-30"

'Matador Blue' White buds transform into deep blue flowers. Heat tolerant, suitable for the garden or containers. 6-12"

Annuals

LOBELIA erinus A delicate looking little plant ideal for partial to full shade situations. Dainty, spurred flowers absolutely conceal the foliage. There are both mounding and trailing types. Resent drying out.

lucia series 'Dark Blue', a True Blue spiller! A hard to find true blue lobelia with excellent heat tolerance. New for 2018 'Ultra Violet', strong, magenta-purple blooms. H 6-8", trails 24". Self-cleaning.

magadi series A vegetative series bred to perform well in summer heat. Available in Electric Blue, Dark Blue, and White. Cascading habit. New for 2018, Compact Blue.

regatta series These are trailing varieties offered in 'Blue Splash', 'Midnight Blue', 'Sapphire' and 'Sky Blue'.

riviera series A mounding variety, that comes in either 'Sky Blue' or 'Midnight Blue'. 3-4"

LOTUS berethelotti 'Amazon Sunset' (Parrots Beak) Great plant that fills the need for a silver, soft, trailing foliage plant. Unique foliage makes it a welcome addition to mixed containers. Orange flowers produced when night temperature stay below 55-60 degrees. Sun

LYSIMACHIA congestiflora 'Tiger Stripes' Grown for its colorful foliage, golden-yellow stripes over the greenish-brown base, it will bloom from spring into fall. Trails to 12". Partial shade

MARGUERITE DAISY argyranthemum frutescens Cheerful daisies smother compact shrubby plants with long, narrow, finely divided foliage. Most bloom best in cool weather. Full to part sun, average soil.

'Beauty Yellow' This award winning must have, has a long, continuous bloom time that doesn't need deadheading! 16-24"

grandessa series Boasting larger blooms than other marguerite daisies, 'Pink Halo' features large, bright pink blooms with a yellow halo around a dark center, and 'Red' features bright red blooms with a yellow halo around a dark center. Large mounded form covered in blooms. Grows 18-24"

'White Butterfly' The large daisy flowers are a lovely crisp, clean white flower with a bright yellow eye. They thoroughly cover the plants all summer, no deadheading needed. 18-36"

MARIGOLDS tagetes Cheerful, bright flowers which bloom profusely all summer, and a tough, vigorous nature are the attributes which have made Marigolds one of the most popular bedding plants of all time. Full to part sun, average soil.

erecta (African) African Marigolds have large, showy, double blooms.

'French Vanilla' The first hybrid white marigold. A real creamy white, double flowered with long lasting, odorless blooms up to 3" across. H 16-18"

garden joy series High yielding, disease tolerant, tall plants have firm, 5", ball-shaped flowers. H 14-16". Available in Orange and Yellow.

'Lady First' A nice medium-sized plant, 20 inches tall, covered with sunny yellow, fully double flowers 3 1/2 inches across.

patula (French) French Marigolds are bushy, compact plants with good-sized flowers.

'Disco Mix' Early, free flowering plants with large, single blooms. 10-12"

durango series Outstanding performers with 2" flowers. Available in a dark red with yellow undersides or a golden yellow with red tips. 10-12"

'Fireball' This first "true red" marigold with color changing under different weather conditions. Tons of fiery-bronze flowers one day to a dark golden-ember the next as the flowers mature. 10-12" high.

'Janie Flame' Golden flame orange blooms on short plants. 8-10"

Annuals

little hero series Compact plants with double crested blooms. Offered in a mixture of bright colors and solid yellow. 8-10"

safari series Huge, semi-double blooms in tangerine, yellow and a mixture of bright colors. 10-12"

'Strawberry Blonde' A rush of bicolor pastel pink, rose and yellow blooms. Blooms actually change color. When warmer, blooms are yellow-pinks; when cooler: pink-plum tones kick in. Mounded, 8-10" plants.

tenuifolia (Signet) The Signet Marigold produces a bushy mound of lacy foliage covered by small, single, flowers all summer. The flowers and foliage have a fresh citrus scent and the blooms are edible, adding color to salads. Available in 'Lemon Gem' (Heirloom), 'Tangerine Gem' and 'Scarlet-Red Gem'. H 9-12"

MECARDONIA 'Magic Carpet' A low maintenance landscape plant that blooms from May to October! The little-leaved plant hugs the ground and blooms profusely all summer in bright gold. Also, works well as a 'spiller' in baskets or containers. Heat and drought tolerant, Full Sun. 2-5"Hx16"W.

MEDINILLA myriantha (Malaysian Grapes) The flowers start light pink and darken to purple. The blooms last for months! This is an easy to grow shade or house plant. *The berries are NOT edible.* Long lasting blooms resemble a grape cluster. It is an epiphyte in nature, so it needs a porous soil. H 2-4'

MELAMPODIUM paludosum 'Showstar' This vivacious bloomer is the workhorse of your garden! Incredibly heat and drought tolerant. Once you try it you'll never be without. Lush bushy mounds of misty green foliage adorned by multitudes of golden-yellow blooms. Full sun to partial shade. 14-20"

MELIANTHUS major 'Honey Flower' (Honey Bush) Since it will probably not flower in our climate we get to enjoy its fabulous gray green, deeply serrated, foliage. Stunning when used in mixed borders or containers. 2-3' in one year. Full sun to part shade.

MUEHLENBECKIA complexa (Wire Vine) This sprawling component plant has small rounded dark green leaves and wiry twisted stems. A great plant for the edge of a container or spilling down from a hanging basket. It is intriguing and grows well in sun or shade.

NASTURTIUM tropaeolum majus These brightly colored flowers are an essential element of the cottage garden. These cheerful, trailing plants are delightful spilling over walkways and containers. Funnel-shaped flowers make a colorful, peppery addition to salads. All form cascading mounds, 10-12" high, then trailing. Best in full sun to light shade and average to moist soil.

'Alaska Mix' Green and cream variegated foliage sports blooms in gold, orange, and red.

'Empress of India' Blue-green leaves and vermilion-red blooms. Heirloom.

'Jewel Mix' Semi-double blooms in orange, cherry rose, and red.

'Trailing Mix' Flowers in red, rose, orange, and yellow. Perfect for hanging baskets and containers, or even as a ground cover. Will "climb" if tied to upright supports.

'Whirlybird Mix' Cream, tangerine, salmon, gold, mahogany, and scarlet blooms.

NEMESIA fruticans Small, airy, snapdragon-like flowers dangle above glossy green foliage. Full sun to part sun, average soil.

'7th Heaven Mix' A mix of lovely lavender bicolor blossoms that are highly fragrant. Compact and bushy with larger flowers than most. 12-14"

'Nesia Dark Blue' Fragrant, dark blue blooms with yellow eyes. Large blooms and mounded

Annuals

habit are ideal for containers and garden beds. H 12-14"

'SunGlo Yellow Bicolor' First saturated yellow & plum bicolor flowers. Large flowers with heartwarming sunshine yellow lower petals, contrast well with the saturated plum upper petals. Highly scented.

sunsatia series 'Blood Orange", boasting hues of orange in each petal, the blooms appear to change color as sunshine reflects off each petal, and 'Lemon', stunning creamy and bright yellow flowers. Semi-trailing, 6-10"

NICOTIANA A large and varied genus of ornamental tobacco plants with tubular, star-shaped flowers carried above bold, sticky foliage. These tropical looking plants love heat, sun, and moisture.

alata 'Jasmine' White, star shaped tubular flowers open in the early evening, filling the air with warm sweetness. Use in the center of a bed of evening flowers. Self sows, 3-4' tall. Heirloom.

langsдорffii Panicles of lime green, drooping flowers are carried upon upright, branching stems. Very heavy blooming from July until hard frost. 2-3'

perfume series Strongly scented, especially in the evening. Available in a mix, white and deep purple. 16-20"

sylvestris Striking candelabrum of pure white, fragrant blooms. The long, tubular flowers dangle in clusters above tall leafy stems. Breathtaking! 5-6', Heirloom.

NIEREMBERGIA repens Upright stems clothed in finely dissected, needle-like foliage. Loads of small, cup-shaped flowers are held in clusters above the foliage. Very heat tolerant, blooming freely all summer. Compact and spreading. Sun to partial shade and average soil. Available as 'Purple Robe' and 'White Robe'. 8".

NIGELLA damascena 'Persian Oxford Blue' (Love-In-A-Mist) Love-in-a-Mist is an old-fashioned favorite. Airy sky blue flowers float amongst feathery foliage, creating a misty haze treasured in cottage gardens. Flowers mature to papery pods valued in everlasting arrangements. Will re-seed. Full to part sun, average soil. 12-18"

NOLANA Attractive small plants for edging gardens or paths, and their showy flowers are produced in great profusion. Excellent for poor or rocky sites. Characterized by decumbent stems which lie horizontally along the ground but with the tip ascending and almost erect. Full sun to light shade.

humifusa 'Little Bell' Lilac-blue, cup-shaped blooms with a blue throat on thick, glaucous leaves. This little charmer happily carpeted the corner of our herb garden last summer earning it high marks as an annual ground cover. Spreading 12-18", 2-4" height

paradoxa 'Bluebird' True blue, trumpet shaped flowers with white and yellow throats, smile up at you from succulent foliage. The sprawling habit is perfect for containers or beds. The flower closes at night and on cloudy days. 2"h by 12"w.

OREGANO 'Kent Beauty' Scented silvery green foliage against cascading rosy pink bracts creates an elegant display for mixed planters. Combines nicely with pinks and purples. Full sun, average soil. 6"

ORLAYA 'White Lace' This rare, but easy, low-maintenance annual will fill your garden with a sea of large white flowers in umbels above ferny foliage. Similar in appearance to Queen Anne's Lace. Heat and drought tolerant. Full sun. 2'

OSTEOSPERMUM A cool weather annual with showy, daisy-like flowers. Plants flower in spring and fall, but dislike summer's extreme heat. Will give their best performance if

Annuals

deadheaded regularly. Always a favorite here at Andrew's. Full to part sun, average soil. 6-10"

'4-D Berry White' Flowers stay open all the time! Lovely double row of white petals with purple tips and a rosy-lavender center. H 8-12"

'4-D Purple' Masses of violet-purple daisy-like flowers that have an interesting deep purple crested center. Flowers stay open all day and all night. H 8-12"

'Blue Eyed Beauty' This flower features a blue disk in the center surrounded by white, pink or yellow radiating petals.

flower power spider series A novelty! Spider-like flowers, available in purple and white.

'Orange Symphony' Heat tolerant and long blooming plants with beautiful bright orange flowers with violet blue eyes.

serenity series A profusion of bright daisy-like flowers carpet the garden. Excellent for rock gardens and containers. 10-14"

'Dark Purple' Rich, dark purple flowers with an blue eye. Full and mounded.

'Rose Magic' This selection opens bronze-salmon and matures to a deep rose pink.

'White' A profusion of white daisy like flowers.

voltage series Bold colored daisies on well branched, compact plants. Heat tolerant selection which flowers profusely all summer. One of our favorite plants. Available in Yellow and White. 10"-16"

OTOCANTHUS 'Caribbean Blue' (Brazilian Snapdragon) If you can't get enough blue in your garden then you may want to consider this plant. Alternate 2-3" long, serrated, deep green leaves below sky blue flowers with white eyes. Never out of bloom, but heaviest flowering begins in mid summer. Full sun, 12-16"

OXALIS (Shamrocks) Accent plants that may also be used as house plants. Self-cleaning plants with a tidy, mounded growth habit. Full to part shade. Moist, well-drained soil. 6-12"

'Charmed Wine' Burgundy foliage on slender, succulent stems sets a dark stage for contrasting pinkish - white flowers.

'Plum Crazy' Clusters of variegated leaves are highlighted by petite yellow blooms.

vulcanicola 'Molten Lava' Foliage color defines this cutie. Low light the foliage is chartreuse, however, sunny conditions make for additional bright colors of rich oranges.

OXYPETALUM caeruleum 'Heaven Born' Pale azure-blue star flowers amongst hairy, pointed leaves. Bushy, heavily branched plants flower vigorously all summer. Milkweed like seed pods follow in fall, complete with silky floating seeds which add fun for children and fall interest for the garden. Full sun. 14"

PANSIES *viola x wittrockiana* These old-fashioned and charming, pansies bear large blossoms in a wide range of colors. These cool weather bloomers add a splash of color to the spring or fall garden. We grow several varieties in a rainbow of colors some with traditional faces and some without. These true harbingers of spring are a welcome sight after a long winter. Full to part sun.

PENTAS lanceolata starcluster series Pentas is one of the best butterfly-attracting plants around. It blooms all summer, even during the hottest weather, with large clusters of starry blooms that attract butterflies by the dozens as well as hummingbirds. Full sun. 14-18". Colors include Pink, Red, Violet and White.

PERILLA magilla 'Magilla Purple' Even without the catchy name it's hard not to notice this bold colored plant. Leaves are burgundy, painted red down the center and splashed with a metallic green. Like a outrageous new Coleus for the sun! Sun to partial shade and fertile,

Annuals

moist, well-drained soil. 2-3'

PETUNIA Blooming in almost any color imaginable, Petunias deserve a place in everyone's garden. They are long blooming, versatile plants that look nice in both containers and in borders. Full to part sun.

exserta A rare jewel! A profuse bloomer, unusual long tubes open into exotic 2.5" vivid deep crimson flowers from early Summer to Fall. Easy and fast with a 2'x 2' upright, bushy form. Hummingbird pollinated.

hybrids Standard bedding Petunias encompassing grandiflora, floribunda and multiflora types.

floribunda 'Madness Burgundy' Masses of large blooms on compact plants. Great garden performers.

grandiflora Produces the largest flowers of all the petunias.

'Aladdin Orange' This petunia has a nice orange flower that is about 3 1/2" across or bigger, the flowers have a wavy look to them. H 12" x 18" W

'Dreams Rose Morn' 3 1/2", hot rose with a white morn center and yellow throat. This seed produced petunia is noted for its holding ability under hot, humid and rainy conditions. 10-15" X 10-12" spread

pretty grand series Large blooms, with good branching and disease resistance. Will make a tidy basket. Available in Midnight (Royal Blue), Red, Summer (Cherry-Red) and White. H 7-10", spread 8-12".

'Prism Sunshine' An improved yellow with large blooms on compact plants. Winner of the All American Award and Fleuroselect Gold Metal.

'Sophistica Antique Shades' Large, waxy petals with dusty pink outer edges, surrendering to a subtle antique yellow center. 10-15"

'Sophistica Lime Bicolor' Deep rose pink petals swirled and brushed together with pale yellow creating an artistic blend in every flower. H 10-15", spread 10-12".

supercascade series A cascading variety ideal for containers. Available in blue, burgundy, lilac, red and white.

integrifolia 'Magenta' A unique open pollinated species. Not widely available elsewhere. Blooms all summer without deadheading. Neither torrential rains nor tropical heat bothers these beauties. Reseeds freely, to the joy of many a gardener. H 2' x 2'

multiflora Very heavy bloomers on nicely mounded plants.

'Evening Scentsation Blue' True blue All-America Selections winner has a fragrance that gets more alluring as the sun sets, filling your summer evenings with a heavenly hyacinth scent and notes of rose and honey. Brilliant indigo 2" blooms that billow from baskets or patio containers, and are dramatic when planted en masse.

'Good n Plenty Orange' Producing a bouquet of orange-salmon flowers with a tight and uniform habit. H 8-12"

supertunia hybrids Large flowers and a vigorous sprawling habit make these robust, tireless bloomers ideal for containers or as ground covers. Attractive to hummingbirds and butterflies.

'Amour Queen Of Hearts' Five striking red hearts on each bloom. The bright red hearts contrast beautifully with the golden yellow stripes that create a central 'star' on each flower.

'Cascadia Indian Summer' Large, lightly ruffled blooms of varied shades of yellow to rose to pink, lending a terracotta look. Semi-trailing, 10-18"

'Crazytunia Black Mamba' Pure black, velvety, medium to large blossoms grow in a mounding habit with exceptional heat tolerance, never fading or streaking, even as they age.

Annuals

'Daybreak Charm' Vibrant sunshine yellow and watermelon pink flowers are eye-catching and unique. 8-12"

'Headliner Raspberry Swirl' Dramatic color and early flowering makes this trailing, mounding petunia exciting! H 10-16" X 20-30" W

'Honey' Beautiful blooms with a mix of soft oranges, yellows, and pinks. Slightly mounded habit, and used as both a filler and a spiller in containers. 8-12"

'Johnny Flame' This stunning beauty offers rosy-purple blooms with a deeper magenta-purple splash on every petal -- dark, intense, and absolutely irresistible!

'Lime Light' Distinctive compact variety has trumpet shaped blooms in rose with a lime border. Early blooming and highly floriferous with a mounding habit. 12" x 12".

'Limoncello' Bushy, compact and free-flowering, with large wavy blooms in an attractive two tone creamy-yellow bicolor, resembling the delicious Italian liqueur.

'Night Sky' It produces masses of velvety indigo blue flowers with a host of pure white flecks and spots - just like gazing into a far-away galaxy, reminiscent of the constellations viewed above on a clear night.

'Phantom' Velvety almost black petals, with a striking yellow star center. 8-12"

'Really Red' The bold, REALLY red flowers are large and numerous. Blooms all season. 8-12"

'Royal Velvet' Fragrant purple flowering petunia will provide brilliant color in baskets, beds, balconies and combo planters. H 10", trails to 48".

'Starlet Pink Lemonade' Compact and subtle, this rose bicolor has vigor and uniformity. 6-10" X 8-10"

surfinia series This series offers intense color, vigorous growth and tons of flowers. No deadheading required! Surprisingly weather resistant. H 6-10", spread 24".

'Heavenly Blue' This plant has nicely ruffled, deep lavender-blue blossoms with burgundy throats.

'Sky Blue' Cool lavender blue trumpet blooms.

'Vista Bubble Gum' Bubble gum pink flowers, so vigorous and showy that they can be seen from a distant view (vista). In my opinion, the best petunia money can buy! 16-24", spread 2'.

wave series The most popular of the petunias. Super fast growing, easy to care for, they spread and trail. No deadheading! Superb flower-power and unbeatable weather tolerance.

easy wave series Very similar to original Waves, just taller. Spreading 30-39" wide and 6-12" tall. Available in Blue, Burgundy Velour, Neon Rose, Plum Vein, Pink Passion, Red, Rosy Dawn, Violet, White and Yellow.

'Shock Wave Denim' The colors change as the bloom ages creating carpets of lavender, blue, purple, nearly white and every shade in between. Spreading 30-36" wide and 7-10" tall.

'Tidal Wave Cherry' Magenta pink flowers with extra vigorous habit, spreading 30"-60" wide, 16"-22" tall. With proper support will grow upward 2-3'.

'Tidal Wave Red Velour' Tidal Wave Velour Red petunias have masses of 4", dark blood red flowers. Plants spread like a ground cover up to 4'. Height 16-22", 30-60" spread.

PHACELIA campanularia 'Blue Rhythm' California Bluebells produce myriads of gentian blue bellflowers. Reddish, arching stems are clothed in heart-shaped leaves tinged with purple. Best in hot, dry, infertile soil and containers. Full sun. 4-6"

PHLOX '21st Century Mix' Compact plants producing clusters of a brightly colored

Annuals

mixture of blue, crimson, scarlet, salmon and white, flowering throughout the summer. Exceptional vigor, weather tolerance and flower from spring to fall! H 12"

PHORMIUM tenax 'Purple Mountain' (New Zealand Flax) Graceful dark purple blades. Leaves widen with age and feature an electric blue tinge on the undersides, make a bold upright statement. These evergreen, tender perennials are native to New Zealand and related to Agave and Yucca. No pests bother with its tough foliage. Over winter indoors. Sun to shade, Most grow 2-3' in the first year and another foot or more to reach their mature height.

PHYGELIUS (Cape Fuschia) Native to South Africa, cape fuchsia will add vitality to your plantings with vibrant, showy flowers that bloom for months in summer and fall. Their eye catching funnel shaped flowers are attractive to hummingbirds. Four inch, lance shaped, shiny, dark green leaves give the plant a handsome appearance. Full sun. 18-36"

'Devils Tears' Deep red flowers with yellow throats.

rectus Profuse clusters of fuchsia-like flowers, blooming for months. H 24" x 24" W.

'Moonraker' Pale yellow, four-inch-long flowers dangle all around the stems of this evergreen, fuchsia look-alike.

'Salmon Leap' Produces vivid salmon orange flowers in a stunning display from early summer until frost.

'Sunshine' Soft-yellow foliage complemented by clusters of tubular flowers, red with yellow throats.

PLECTRANTHUS We can't say enough about Plectranthus. Its coloring, shape, and habit make it one of the finest accent plants we have ever grown. Sun or shade.

argenteus 'Silver Shield' Velvety-leaved annual with silver-gray color, grown primarily for the foliage. 24-28"

aurea marginata 'Lemon Twist' Scalloped green leaves are edged in chartreuse generating a gorgeous effect. Forms a 12" mound.

coleoides 'White Surf' Fragrant, bright green leaves edged in white with trailing stems up to 2 feet long. A glorious accent plant. 12-16"

'Monas Lavender' Glossy, dark green leaves support a mass of flower spikes in late summer. Rich, lavender flowers are salvia-like and frost tolerant. 12-16"

PLUMBAGO auriculata 'Royal Cape' (cape leadwort) Native to South Africa, when grown in containers in it will grow 1-3' per year. Features clusters of phlox-like clear bright blue flowers with small darker blue star in the center, better color than the species. Water freely and fertilize monthly during the growing season. Full sun.

POPPIES Showy, colorful blooms with papery petals dance upon wiry stems throughout most of the summer. Attractive seed pods add interest in the garden or in arrangements. Plant early in the season while soil is moist and cool. Once established, poppies thrive in hot, sunny, dry locations.

commutatum 'Ladybird' An heirloom favorite and one of the most prolific poppies available, the beautiful 'Ladybird' (a British word for ladybug) is a garden head-turner. Bright red flowers with black spots grows to about 15" tall. Neat foliage bearing 15 or more 3" blooms at a time.

eschscolzia californica 'Jelly Beans' (California Poppy) Famous for intensely vivid colors that please the eye all summer, even in the driest soils. Jelly Beans is a mouth watering mix of large 2" flowers in shades of orange, salmon, rose and gold. 10"

nudicaule 'Champagne Bubbles' (Icelandic Poppy) Single flowered Poppies with a silky, crepe papery look. Great accompaniment to Pansies. A vibrant mix of orange, red, yellow and

Annuals

white. 12"-18"

paeniflorum 'Peony Mix' Full ruffled, 4" wide blooms in shades of deep purple, pale pink, violet, dark pink, scarlet, white and yellow. 2-3', Heirloom

rheas Delicate, tissue-like flowers on wiry stems

'**Double Shirley Mix**' Double blooms in pink, salmon, red, and white. 2-3'

'**Mother of Pearl**' A lovely mixture of misty and subtle shades of grey, lilac, soft orange and white, many stippled with pink. Stunning! 1.5 to 2'.

'**Pandora**' Shades of red to dark burgundy with a slight hint of silver to white on the older petals. With a little deadheading this poppy will bloom June through September. 12-20"

somniferum Stately plants producing bright blooms and large, ornamental seed pods filled with tasty seeds for baking. Blue-grey, cabbage-like leaves. Self sows. H 2-3'.

'**Cherry Glow**' Selected from a collection of heirloom poppies, 'Cherry Glow' has lustrous ruby tulip-shaped blooms and the classic "lettuce leaf" foliage.

'**Imperial Pink**' Rare and exquisite! Pure pink petals with pale lavender marks near the crowned anther of the flower, some are fringed, some tulip-shaped, all bloom in Spring and Summer.

'**Laurens Grape**' Deep burgundy purple blooms with characteristic black spotting.

PORTULACA grandiflora Gloriously colored, papery blooms cover succulent stems and fleshy spike-like leaves. Have a sprawling habit, ideal for edging borders or containers. Thrives in hot, sunny, dry locations.

colorblast series The ColorBlast series provides the best drought tolerance and vibrant color. Wonderful for both beds and containers. H 4-6" X 8-16" W. Larger flowers available in these great colors, 'Grenadine'(Cherry-Red), 'Limon'(Yellow), 'Mango Mojito'(Orange/yellow), 'Tangerine'(Orange) and 'Watermelon'(Raspberry/Rose/Yellow).

happy trails series Ideal bedding flowers in fuchsia, mix, orange, pink and yellow. H 3-5"

RANUNCULUS hybrids The flowers are fully double, jammed with petals held in a whorled pattern like roses, but longer-lasting. The colors include bright shades of red, rose, orange, yellow, pink, and white. Dwarf habit, short stems, but big flowers. H 10-12", part sun.

REHMANNIA angulata (Chinese Foxglove) Magenta, foxglove like blooms with yellow throats. The textured leaves grow in rosettes and turn deep red in the fall, spreading readily by runners. April-June, 18-36"H, Full sun to part shade, rich, well drained soil. Listed in a 1935 book, Heirloom

RUDBECKIA A member of the sunflower family, all are native to North America and many species are cultivated in gardens for their showy yellow or gold flower heads. These tender perennials may overwinter or reseed. Flowering July into October. Pest free. Full sun to light shade.

hirta (Black-Eyed Susan) This species is distinguished by the "hair" that covers its leaves and stems. It is the largest group of Rudbeckia with many hybrids from tall to dwarf. The species is the true Black-eyed Susan but there are many varieties available.

'**Cappuccino**' Extra large, vibrantly colored mahogany and gold flowers, with 4" wide blooms blanket vigorous, bushy plants that reach 18-20" tall.

'**Cherokee Sunset**' Fully double flowers in a mix of red, bronze, orange, and yellow tones. 30"

'**Cherry Brandy**' World's first red flowered Rudbeckia! Robust plants produce masses of cherry red flowers all summer; triumphing over heat, drought and poor soils. 24"

Annuals

'Indian Summer' Large single and semi-double blooms with golden yellow rays and dark brown central disks. 36-42"

'Prairie Sun' Golden yellow petals are tipped with pale yellow surround a light green cone. 30-36"

'Sahara Mix' A beautiful mix of soft colors, amber, copper and soft burnt rose are just three of the shades in the staggering mixture. Mostly double flowers and a gorgeous summer plant. H to 24".

'Toto Mix' Compact, well branched plants with large 2.5" flower and non-stop flowering throughout the summer. A delightful mixture of 'Lemon', 'Rustic' and 'Gold'. 10"

triloba 'Prairie Glow' (Brown- Eyed Susan) Spicy burnt orange red 5" blooms tipped in glowing yellow surround a chocolate disk. Blooms sway on heavily branched burgundy stems. 3-4'

RUELLIA brittoniana Brittoniana is a tall and stately wildflower from Texas with long, linear leaves and large lavender-blue flowers appearing mid-summer into fall. A handsome plant for the pond edge as it doesn't mind wet feet. Reseeds freely. Sun to light shade and consistently moist soil. 3-4'

SALPIGLOSSIS sinuata Graceful airy stems carry small trumpets in rich romantic shades. Each throat is veined in a spider web of contrasting hues, hence the common name Painted Tongue. Elegant summer bloomers, great for cutting. Full sun, average soil. 18-24"

'Kew Blue' Velvety midnight-purple blooms with even darker centers.

'Royale Mix' Lovely, multi-color blooms of chocolate, coral, purple, purple bi-color, red, rose, and yellow.

SALVIA A decorative bedding plant grown for its showy flower spikes flaunting an astonishing array of colors. Upright branching habit. Attractive to hummingbirds and butterflies. Full sun and amply moist, average garden soil.

chamaedryoides Bright, clear blue blooms on densely spreading stems lined with very small grey leaves. Great for mixed containers. 4-6"

chiapensis Brilliant fuchsia, fuzzy blossoms on sturdy spikes. Slightly sprawling habit. Rich, pure color. Great for containers. 2'

coahuilensis 'Purple Ginny' Graceful perennial hybrid sage growing to 2 ft. tall and spreading. A liberal bloomer, with vivid deep purple flowers summer and fall.

coccinea summer jewel series Compact plants stay tidy in containers and gardens. Prolific bloomers from spring through fall. Bright flowers attract hummingbirds; while goldfinches swarm the plant for seeds. 20" tall spiky stalks of 1/2" blooms. Offered in Pink, Red and White.

farinacea Densely packed flower spikes, leafy dark green foliage. Excellent cut flowers. Ideal for drying.

'Blue Bedder' Long stems make it the best for cutting. 3'

sallyfun series (mealcap sage) Spikes of electric blue flaring tubular blooms with a bright white eye on 'Blue Emotion' and lighter blue spikes on 'Sky Blue', both can reach 36", blooms from Spring to Fall.

'Victoria Blue' Indigo blue. 1-2'

guaranitica Showy, tall species, blooming from summer into Fall. Great for late season color. Full sun and good drainage. Tolerates part shade.

'Argentine Skies' (Argentina Blue Sage) Beautiful, light blue flowers. 2-3'

'Black and Bloom' Makes a big impact with a thicker leaf, bigger bloom and darker stem than Black & Blue. Dependable deep blue color against a black stem. 4'

Annuals

interrupta 'Waverly' Spikes of fuzzy, light lavender blooms elegantly rise to 4' above crinkled, sage green leaves. Soft and delicate color.

longispicata x farinacea 'Mystic Spires Blue' If you love 'Indigo Spires' but it is too large a plant for certain spots, this could be just the plant for you. True blue flowers bloom abundantly all season on this somewhat compact salvia growing just 20-30"

microphylla 'Hot Lips' Unique and striking selection with unusual two-toned flowers. An outstanding compact, carefree plant. Fast growing. 3x3'.

microphylla x greggii (Texas Sage) A native to Southwestern U.S.. This salvia is a soft, woody shrub with small dainty aromatic leaves and spikes of trumpet-shaped flowers. A continuous hummingbird treat, they flower heavily in the spring and fall and sporadic through the warm months. Very Drought resistant.

'Heatwave Glimmer' The flowers are a creamy white, almost a very light light yellow, tinged with the slightest amount of pink. This Salvia will bloom and bloom, even in half day shade. H to 2'

mirage series Heat-tolerant series features a full range of intense flower colors, for gardens and containers. More compact than most, H 12-14" x 14-16" W. Offered in 'Cherry-Red', 'Hot Pink' and 'Violet'.

patens (Gentian Sage) Larger flowers than most Salvias, held in loose spikes.

'Blue Angel' Rich true blue flowers appear from early summer into fall. 12-24"

'Patio Deep Blue' Deep true blue flowers on compact plants. 12"

'Patio Sky Blue' Sky blue flowers on a compact plant. 12"

sinaloensis Wonderful purple foliage, bright indigo flowers. 12-16"

splendens Traditionally grown Salvia with large showy flowers

'Bonfire' Tall plants with fire-engine-red, spiky flowers. 14-16"

'Red Hot Sally' Fire-engine red. 8-10"

'Van Houttei' Pronounced burgundy calyces and deep rosy red corollas on a floriferous and fast growing plant. Does best in moist soil and partial shade, but tolerates full sun. Premium! 3-4'. Gorgeous late summer into fall.

'Van Houttei Louies Orange Delight' A loud blooming orange Salvia! Brilliant orange-red bracts and blossoms, flower from June to frost. H 36-48".

'Van Houttei Paul' Happy in partial shade, this Salvia has showy red-purple blossoms and a well-branched, open form. Sun to partial shade. 2'

uliginosa (Bog Sage) Striking spikes of sky blue flowers carried upon long swaying stems reaching 3-5'. Known as Bog Sage because of its liking for moist soil, withstands heat and humidity quite well. Breathtaking for the back border.

wishes collection Free-flowering salvias with irresistible color, no pruning necessary.

'Embers Wish' 'Ember's Wish' has coral blossoms, maroon stems and rusty rose calyces. Long lasting color! 2-3'.

'Love and Wishes' Deep magenta-purple tubular blossoms contrast handsomely with dark stems. H 3-4' x 3' W.

'Wendys Wish' Large, hot pink tubular blooms, complimented by dark green leaves and maroon stems. Stunning! H 3' x 3' W.

x. **'Indigo Spires'** Deep purple spikes reaching 12-18" in length. Stunning in borders or large containers. A wonderful cut flower for large bouquets. 3-5'

x. **'Rockin Deep Purple'** Fragrant, intense purple spikes will create a great focal point for mixed containers and as a thriller in the garden. This continuous blooming Salvia is sterile, which means more flowers for you. H 30-40"

x. **'Silkes Dream'** Spikes of salmon-pink flowers arrive on sturdy 15" tall stems all season.

Annuals

Hummingbird Super Magnet!

SANVITALIA procumbens Creeping Zinnia is a short, sprawling plant whose flowers resemble miniature versions of Black-eyed Susans and are borne in great profusion on trailing hairy stems. Drought tolerant and virtually maintenance free. Looks great tumbling out of window boxes and sprawling in the front border. Full sun

'Mandarin Orange' Orange, double flowers with a contrasting dark center. 6"

'Million Suns' This Fleuroselect Gold Medal winner, with its abundance of perfectly formed, gold yellow flowers with green centers, is sure to find a spot in your garden.

'Sunbini' Half-inch dark yellow orange flowers all summer. 6-10"

SCABIOSA atropurpurea A pretty annual pincushion flower on upright wiry stems. Gently fragrant, making sweet cut flowers for small bouquets. Full to part sun.

'Black Knight' Fully double flower heads which are colored deep burgundy-black. Truly striking in bloom. Honey scented blooms. Heirloom. 36"

'Cut Bright Mix' A colorful mix of lilac, scarlet, red, rose, blue and violet. 12-30"

SCAEVOLA aemula (Fan Flower) Low sprawling mounds decorated with large and substantial fan-shaped blooms over dark green, fleshy foliage. Fantastic in hanging baskets, large containers or right in the ground. Quite heat tolerant, yet a heavy drinker. 4-9" height, 18-24" spread. Full to part sun.

'Scampi Blue' Blue flowers with green eyes from mid spring to late summer. Thrives in hanging baskets and window boxes. H 6" x 24" W

'Suntastic Yellow' Bright yellow centers fade to pale yellow flower tips on a plant with a slightly compact, tight habit.

surdiva series Highly-branched with large-flowers. Offered in 'Blue-Violet', 'Pink Fashion' and 'White'. H 6-8" x 18" W

SCUTELLARIA 'Purple Fountain' (Scullcap) Clusters of fuschia pink, 1 1/2", tubular blooms are borne throughout the season on slightly quilted trailing foliage on arching stems. Attracts Hummingbirds. H 6-12" x 12-24" W

SETCREASEA 'Purple Queen' (aka Tradescantia Purple Heart) Thick, tropical looking, bright stems and leaves adorn this unique accent plant. Great trailing plant for mixed containers in sun or shade. Easy to grow, heat and drought tolerant. 6-12" Sun to part shade.

SNAPDRAGON antirrhinum majus Prized garden plants because of their brightly colored flowers and long blooming season. Terminal racemes of two-lipped flowers upon upright stems in an endless range of colors and heights. Very frost resistant. Attractive to hummingbirds. Great cut flower. Full to part sun.

'Black Prince' Lush dark crimson blooms set against super dark foliage. Breathtaking! 18-22", Heirloom

montego series Dwarf plants with strong stems. Available in a mix of bright colors and sunset, yellow with red lips. 6-10"

rocket series Our tallest variety that makes an ideal cut flower. Choose from lemon yellow, rose, white or a mix. 30-36"

snapshot series 2 pretty varieties available. 'Berries and Cream' a mix of reds, pinks, white and bi-color blooms and 'Yellow'. Plants are floriferous and compact. H 6-10"

'Snaptastic Mix' This mix has larger flowers and has longer lasting color. Colors include, pink, magenta, orange flame, red and yellow. 14-16"

'Twinnny Peach' A 2010 All American Winner. Double flowers in the most distinct blended

Annuals

shade of peach, yellow and light orange. 8-11"

STACHYS (Lambs Ear) Lamb's Ears plants are grown for their soft suede-like leaves, silvery-gray color, and easy care. They make wonderful spreading edging plants.

albomentosa Fruit-scented soft-gray foliage is topped with 1-2' spikes of apricot-coral salvia-like flowers. H 12" x 12".

STOCK 'Vintage Mix' The dwarf, well-branched plants produce lasting flowers, with a delightful fragrance. Colors consist of pink, rose, violet, yellow and a white. These cool weather loving plants bloom profusely in the spring and autumn, resting in the heat of summer. Sun. 10-16"

STREPTOCARPUS ladyslipper series (Cape Primrose) A relative of the African Violet, it is a compact plant with hairy leaves. Can grow up to 12" tall and produce 2" wide trumpet like blooms. Will bloom nearly all year long if you remove the fading flowers before they turn to seeds. Likes medium indirect light, prefer cooler temps, a ideal house plant. Offered in 'Blue Ice', 'Pink Halo' and 'Red-Rose'.

STROBILANTHES 'Persian Shield' Leaves are a rich purple, veined and edged in dark, bronze-green. Silver-leaved and pink flowering plants really bring out its coloring. Partial shade to shade as full sun bleaches its leaf color. Thrives in hot, humid weather. 3', Heirloom

SUCCULENTS This group of easy to grow, forgiving plants are bound to enchant you with their unusual colors, textures, growing habits, and extraordinary flowers. Succulents prefer smaller pots, as too much root room can deplete their energy with only root growth. Keep them snug and they'll keep you happy; mixed containers of succulents create magical displays. Grow in full sun and keep on the dry side.

AEONIUM Succulents that resemble Hens and Chicks. Great for rock garden or troughs. Requires little care, full sun and very dry, well drained soil.

arborescens atropurpureum Dense, flat rosettes of reddish bronze leaves on tall stems.

'Kiwi' Colorful rosettes of fleshy leaves colored in pink, pale yellow and green with each leaf edged in red. Small yellow flowers. 10-12"

ALOE A rosette of long fleshy spears which are filled with a mucilaginous gel. Prefers full sun to partial shade and well-drained soil.

'Delta Lights' Wonderful wavy, zig-zag pattern of grey, green and white.

'Pink Blush' Compact Aloe with green and cream markings washed in bright pink.

vera A stemless or very short stemmed plant with thick fleshy leaves and the capability to grow almost 3', with medicinal qualities. It is easy to care for and requires little attention.

ANACAMPSEROS rufescens Olive green, narrow, pointed leaves arranged in a spiraling rosette. In the partial shade the leaves are olive green, while in sunlight the leaves are a dark reddish-brown to purple. Pink flowers. H 3" x 4" W

CRASSULA Soft wooded, semi-evergreen, with small leaves resembling a dwarf jade plant.

capitella Bright, green, pointed foliage turns reddish-orange at the tips. H 12"

m. pseudocypodiodes (Princess Pine) Hints of purple tones throughout the dark green reeds. Nice spreading habit. H 6-12"

'Morgans Pink' Frosted, gray-green foliage forms tight rosettes. Round, pink flower clusters. 2-4"

ovata 'Hobbit' This jade looks like a miniature tree. Glossy green, succulent leaves are tubular and very interesting. Continues to be a favorite of customers and employees.

perfoliata var. falcata (Propeller Plant) Unique, with oblong, sickle shaped leaves.

Annuals

Velvety gray green. Cinnamon scented bright orange-red flowers in summer. Full sun to part shade. H 12-18"

ECHEVARIA (Mexican Hens and Chicks) Do you love Hens and Chicks but wish they flowered more? Give these beauties a try. Rosettes of decorative foliage burst forth in clusters. These are the gems you slide into your shallow pots where nothing will grow.

nodolosa Narrow rosette, green foliage with burgundy margins. 5-8"

peacockii Dense rosettes of succulent, silvery-green foliage send up one-sided cymes of many orange-red pendant flowers up to 12" above the foliage. 5" foliage, 18" in bloom.

'Perle Von Numberg' Lovely rosettes glazed with translucent pink and purple.

'The Rose' Thick sculptured leaves form a metallic, ruffled rose blossom more than 6" in diameter.

EUPHORBIA lactea 'Cristata' (Crested Elkhorn) A unique Euphorbia resembling deep sea coral. Wavy, crested, bizarre looking plants mostly green with an occasional streak of white variegation.

FAUCARIA felina (Tigers Jaws) Fascinating, chunky, triangular leaves have distinctly toothed margins. Yellow, daisy-like flowers. H 3-6"

FURCRAEA foetida 'mediopicta' A thorn less Agave-like plant that makes a bold statement with the widely striped yellow to white and dark green wide arching foliage. An excellent drought tolerant choice for containers on the porch or patio or in lightly shaded gardens, where hardy. Moderately fast growing.

HAWORTHIA cuspidata (Window Plant) With star-like rosettes, up to 4" across, the leaves are lime green, wedge-shaped, with darker green glassy "windowed" translucent areas near tips. H 2"

HUERNIA 'Zebrina' (Life Saver Plant) The five-pointed, yellow-red, star-shaped flowers are bonded with a red lifesaver. Easy to grow. H 6"

KALANCHOE Chinese origin, with fleshy succulent leaves and colorful flowers.

pumila 'Silver Gray' Silvery gray leaves with toothed margins at the tip. Leaves have a rosy tint. H 6-10"

tomentososa (Panda Plant) Long, fuzzy, felt like, oval shaped leaves. Soft gray with chocolate brown margins and tips. H 10-18"

LEDEBOURIA socialis (Silver Squill) Silvery grey leaves with dark green splotches grow over succulent bulbs. Underside of leaves and the bulbs are dark purple. H 2"

PORTULACARIA afra variegata (Variegated Elephant Bush) Variegated miniature jade. Easily trained.

SEDEVERIA 'Fanfare' This rare succulent has delicate silver-green foliage that looks like a flower. H 6"

SEDUM These charming sun loving, very drought tolerant plants are great for containers in full sun. They are very forgiving if you neglect them and look spectacular even when they are not in flower. They even adapt well to life indoors during the winter.

furfuracum Slow growing, mat forming plant with thick, egg shaped leaves.

makinoi 'Ogon' This tiny leaved sedum is noted for its bright gold foliage. H 2"

SENECIO (Chalk Fingers) This succulent produces thick silvery-gray curved leaves that form a tight clustered rosette of foliage. Thrives in morning sun.

citriiformis Tear shaped leaves with clusters of cream flowers. A dwarf creeping succulent that will drape over the side of a pot. H 2"

talinoides mandris 'Blue' Long, intense blue, fleshy leaves on upright stems. Great color and texture. H 10-12"

Annuals

SUNFLOWERS *helianthus annuus* No garden should be without the cheery beauty of a Sunflower. Loved by children and goldfinches. Full sun.

'**Autumn Beauty**' Reminiscent of fall leaves. Bold, beautiful flowers up to 8" across. Bright yellow, bronze, and purple shades with some bi-colors. Multi-branching; produces many long stems. Ht. 60".

'**Ballad**' Golden yellow petals surrounding a deep bronze pollen-less center. 24"

'**Firecracker**' Dwarf plants, loaded with bicolor red and gold flowers. 24-36"

'**Italian White**' An heirloom variety with creamy yellow 3"-4" flower heads. 4-5'

'**Peach Passion**' Fantastic branching variety with unique color. Petite, peach colored blooms on long stems are ideal for arrangements. Flowers average 2-4" across. 48".

'**Red Hedge**' Darkest red with long lasting blooms and wild look. 4-5" flowers with petals that are rounder and darker than Chocolate. 48-58".

'**Solar Power**' Intense blooms with petals that go from deep maroon to orange tipped. One stalk produces numerous branches that bear pollenless, 4-6" flowers. Grows 6-8' tall.

'**Soraya**' Rich orange petals surround brown centers. Large flowers, heavy flower production, very sturdy stems, and well branched plants, made this one a AAS winner for 2000. 5-6'

'**Starburst Lemon Aura**' Fantastic, crested, fully double, lemon yellow flowers (7-8") with a green center and multi-branching stems, giving lots of gorgeous cut flowers. POLLEN FREE too - so no mess when brought indoors. H 4-6'.

'**Starburst Panache**' Provides us with very uniform orange flowers with semi-double petals. Loaded with flowers due to its branching habit. Darker flower centers . 4-6'

'**Suntastic Yellow**' A long-blooming petite charmer. This is the most floriferous dwarf sunflower to date, bearing up to 20 flowers on plants only 20 inches tall. The 5 to 6 inch blooms are cheerful golden-yellow with black centers.

TALINUM *paniculata* 'Kingswood Gold' (Jewels of Opar) Golden, succulent foliage. Delicate, pink flowers arise on multiple, slender, unbranched stems followed by tiny, showy red berries. Makes a unique and lovely cut flower or garden plant. Very heat and drought tolerant. Full sun. 24"

TIBOUCHINA *grandifolia* (Glory Bush) Large deep purple flowers adorn this tall, tropical shrub with soft, greyish green foliage. Growing this plant in a container seems to force it into blooming earlier than it would if planted in the ground. Loves heat and full sun!! If you have the space it can be overwintered inside beside a sunny window. 3-5' in containers, slightly taller in the ground.

TITHONIA *rotundifolia* 'Red Torch' (Mexican Sunflower) Planted in a group, these large, bushy plants create a dense hedge of greenery. Brilliant orange-red color resembling single dahlias. Lovely accent among tall perennials as well. 3-6', Full sun

TORENIA *fournieri* (Wishbone Flower) A great shade performer! The Wishbone Flower is an exotic looking leafy plant with small, dark green leaves and a plethora of lipped blooms, each with a wishbone-shaped marking. Flowers are reminiscent of snapdragon florets. Low maintenance plants that are self cleaning; that's right, no deadheading! Does best in consistently moist, well-drained soil and partial to full shade.

'**Catalina Grape-o-Licious**' Masses of white flowers with bright purple throated blooms. 8-12"

'**Catalina Pink**' Magenta-hot pink along the outer edges of the petals, light pink inside, have a yellow spot on the lower petals.

moon series Terrific fast growing, long blooming trailing plants. 6" X 12".

Annuals

'Magenta Moon' Rosy magenta lover petals, rosy apricot upper petals, and burgundy centers over densely branched shiny plants.

'Purple Moon' Masses of large dark violet flowers.

'Yellow Moon' Sunny yellow with a purple eye.

TRACHELIUM caeruleum 'Lake Michigan Blue' Dense clusters of tiny bluish blooms rise above bushy mounds of long, toothed leaves. A unique plant for the border. A ravishing cut flower, often used as a filler. Can be dried, too! H 30-40"

'Devotion Mix' This series provides a good color range. Will flower all summer. Attracts butterflies. Can also be grown in pots to produce spectacular flower heads. 12-16"

TRADESCANTIA Trailing foliage accent plant for sun or shade. Works great in mixed planters, hanging baskets and as a ground cover.

fluminensis 'Variegata' Glossy green and white striped foliage, irregular with bands or blotches of white, sometimes all white leaves. Very easy, great houseplant.

spathacea The clump forming species. Sometimes called 'Moses in a Basket' or 'Oyster Plant'.

'Golden Oyster' A great clumping Tradescantia with rusty-tangerine colored leaves. Older leaves have a more distinct green striping down the center and a plum tinted underside. A true beauty from all angles!

'Tricolor' Clump forming with strap shaped leaves about 5" long and 1" wide, each leaf is striped with pale pink, cream and white. The undersides are a bright raspberry color.

zebrina 'Purple Striped' Valued for their stripes of white, green, silver, and purple colors in their leaves. They have trailing vines that flow from its base and are very easy to care for.

TRIFOLIUM limerick series Limerick's trailing and spreading habit plays nicely with other plants and provides a fun, trailing texture in your mixes. Its "shamrock" foliage has bold patterns. Plants grow energetically in sun and shade. H 3-5" x 8-10" spread.

'Estelle' Rich burgundy and green shades of clover-like leaves.

'Isabella' Plum-purple leaves have small bright green centers. Blooms pink clover flowers.

'Jessica' Beautiful dark green foliage with reddish bronze leaf markings.

'Lenore' Lighter green with a darker green center.

VERBENA A large genus of plants with bristly foliage, square stems and dense, flat-topped clusters of small flowers. Will bloom all summer if deadheaded and fertilized regularly. Attracts butterflies. Full sun, average soil.

'Blues Light Pink with Eye' Clumps of light pink flowers with a white eye. Ideal for combination planters and garden flower beds. Great powdery mildew resistance. H 10-12" x 12-18" W

bonariensis Tall, upright, multi-branched stems produce small clusters of reddish purple flowers. Nice for cutting. Immensely popular. 36-40", Heirloom

bonariensis 'Meteor Shower' Dwarf, more compact than the species. Same delicate, tiny lavender flowers held up high on tall stems that create a nice effect in cottage gardens. Long lasting flowers. 24-30"

endurascape series This new series stays in flower and keeps its color longer in the heat. Offered in Blue, Pink Bi-Color and Red.

lanai series Vegetative, mounded trailers. Great performers. Available in 'Twister Pink' and 'Twister Purple'.

'Lascar White' An early flowering series with large uniform white flowers.

quartz series Excellent garden performers with large florets above spreading, mounded

Annuals

plants. Available in purple, scarlet, and white. 10-12"

'Raspberry Sorbet' The large, 3" domed shaped flower heads are comprised of intense red-violet blooms. Mildew and heat resistant, it blooms nonstop all season long starting in spring, going through summers worst heat and humidity then into fall. 6-8" mounds, 24" spread, neat and compact.

speciosa 'Imagination' All America Winner! Purple flowers carried over sprawling stems. Free flowering under the hottest summer conditions. 12"

superbena series Superbenas have the largest florets on the largest flower. Great vigor. Offered in 'Peachy Keen', pink, salmon and coral colors, 'Royal Romance', a regal red and 'Violet Ice'. Mounding habit. New for 2018, 'Stormburst', purple white silver and white bicolor.

'Temari Patio Blue' Vigorous trailer with compact clusters of large purplish-blue flowers. Heat lover. 10"

tuscany series Compact, heaving blooming, upright, spreading plants with extra large flower heads. 8-10", spread 16-20". Offered in 'Pastel Mix' and 'Peach'.

VINCA catharanthus roseus 'Titan Bubble Gum Mix' Bees and butterflies love these plants! This hot summer survivor has impatiens-like blooms with silky petals cover compact, neat plants with glossy green foliage. Very free-flowering, especially in hot, sunny locations. Do not overwater. H 10-14"

VINCA major 'Variegated' The well known Vinca vine found tumbling out of window boxes everywhere. Great foliar addition to mixed containers, with stems of green and creamy-white variegated leaves, trailing. 3-5'. Sun or shade.

VIOLA tricolor The quintessential sign of spring, Johnny Jump-Ups have long been treasured for their cheerful, painted faces. Loved by children and adults alike these long time bloomers will brighten your spring garden and planters. Available in several colors, both pastels and brights. 4-6"

ZINNIA Garden favorites for years both as traditional bedding plants and cut flowers. They come in a sensational array of colors, dwarf forms or tall cultivars, with single or double flowers. Full sun, average soil.

augustifolia star series Low, bushy mounds of narrow leafed foliage become covered with fade resistant, 2" daisy-like blooms. These Classic Zinnias are the definition of a tireless bloomer! Heat and drought tolerant. Available in golden yellow, and white. 10-12"

elegans These classic garden plants produce sturdy, colorful blooms on upright, leafy stems. All make nice cut flowers.

benarys giant series A prime choice for cut flowers, with fully double, 4-6" blooms and long stems. Offered in Lilac, Lime, Pink, Red, and a Mix. 3-4'

'Cut Come Again' Old fashioned favorite with bright mix of colors. 2'-3'

'Queen Lime Orange' The flowers have striking coloration, with glowing apricot blooms (2-3"), that feature a blush of lime and bright rose centers. H 40"

'Queen Red Lime' Exotic and unusual bicolor zinnia. Flowers 2 1/2-3" across are thickly layered with maroon red petals, then crowned with lime green. Grow 40" high, with long-stemmed, uniformly colored blooms.

'State Fair Mix' A popular choice for cutting gardens. Colorful, double 5" blooms. 36"

'Whirlygig Mix' A gorgeous mixture of bizarre bicolor patterns. Color range includes yellow-crimson, red-white, pink-white, also cream-rose, bronze-red and other interesting combos. Fully double, 3-4" across. 20"

Annuals

marylandica zahara series This super tough zinnia puts on a carefree all summer show in lots of bright colors. Similar in looks to the very popular Profusion Series, but with larger flowers and a bit taller at 12-18". Available in Double Cherry, Double Fire, Sunburst , and a Mix. *New for 2018, Raspberry Ripple, a double-flowered pink variety that sports a dark pink stripe and lighter pink edges .

profusion series Award winning hybrids with exceptional disease resistance on a plant which is self-cleaning and ever-blooming. Each plant is loaded with blooms, some darker and some lighter toned, adding a depth of color. Available in Apricot, Cherry, Fire, Red and White. H 10-12"

ARISTOLOCHIA Large heart-shaped leaves, will form a dense summer screen. Rarely bothered by insects and disease, this rapidly growing vine needs a strong support once established. Sun, part shade.

grandiflora 'Pelican Flower' Light purple calyxes contrasting bright red corollas. A heavy bloomer with an electrifying flower color combination that really stands out.

littoralis 'Calico Flower' This tropical cousin of the Dutchman Pipe has 5 - 7 inch oval flat white flowers with maroon marbling. Quite interesting.

ASARINA scandens (Creeping Gloxinia) Deep green ivy-like leaves and trumpet shaped flowers available as 'Joan Loraine' (aka Mystic Purple) and 'Mystic Sky Blue'. A great plant to climb a trellis or trail from hanging baskets. Blooms from early summer until hard frost. Full/part sun. 3-5'

CARDINAL CLIMBER ipomea multifida Crimson, tubular flowers adorn deeply cut, tropical-looking foliage. A favorite of hummingbirds. Full sun. 8-10', Heirloom

CLERODENDRUM speciosum (Bleeding Heart Vine) An unusual color variation, a red flower with a lavender bract. One of the few vines that blooms well in the shade. Can be planted on a trellis, arbor or along fences in a sheltered location.

COBAEA scandens (Cup and Saucer Vine) A fast growing climber that will twine to nearly any surface making it an effective cover for any problem area. Pendulous purple, bell-shaped blooms embellish the plant in late summer and fall. Sun to part shade, Heirloom

CYPRESS VINE ipomea quamoclit 1" scarlet red flowers glow against finely divided foliage. Can reach 6-20' in one season. Another hummingbird favorite! Full sun, Heirloom

HYACINTH BEAN VINE lablab purpurea 'Ruby Moon' A handsome twining climber with sturdy stems bearing broad leaves and pea-like blooms. The outer edges of the flower petals are light lavender, while the insides are a deeper purple color. These pea-like blooms mature to large, purple seed pods. An easy and fun vine to grow. Sun. 15'

LOPROSPERMUM compact series This series is an excellent hanging and trailing plant. It will bloom throughout the season. Lovely foliage and trumpet shaped blooms. More compact and earlier to bloom. Self cleaning. 1-2' from top to bottom. Available in Rose and White.

MANDEVILLA Clusters of flared, trumpet shaped, 2-4" flowers appear among the leaves. Leaves are dark green, glossy, oval, 3-8" long. The gorgeous flowers captivate all who grow it. Give this one a hot spot! Blooms June - August. Full sun. 3-5'

'Alice Dupont' Beautiful pink blooms.

sun parasol giant series The biggest Mandevilla blooms we've ever seen appear in this series. Ultra-vigorous, heavy-blooming sun-lovers. This quick-growing twining vine opens flowers 4 to 6 inches across! Available in 'Apricot', 'Pink' and 'Red Emperor'.

Annual Vines

sun parasol series Bred for their exceptionally velvet colors, once established these selections are undemanding and require little care. Excellent vigor, weather tolerance, long bloom cycles and disease resistance. Two lovely varieties, 'Pretty Crimson' and 'Pretty Pink'. H 3-5'

MINA lobata 'Jungle Queen' (Exotic Love Vine) Exotic Love Vine is a very showy climber with deeply lobed beautiful foliage and arching sprays of flowers with a multi-colored effect because the blooms graduate in their color range on each spray. This variety has scarlet flowers which graduate to orange then to pale yellow. Blooms late summer/fall. Full sun to light shade. 10-15'

MORNING GLORIES ipomeea Climbing vines with large, showy flowers. Best planted in morning sun and rich, moist soil.

acuminata 'Blue Dawn Flower' An ever-blooming ipomeea having incredible deep, true-blue flowers. Exceptional! 12-15'

alba 'Moonflower' The Moon Flower is a romantic plant! Large pure white blooms open at dusk releasing a vanilla scent to allure nocturnal moths. Lovely on a trellis in your moonlit, white garden. Full to part sun. 10-12'

purpurea Referred to as the more common varieties of morning glories.

'Carnivale de Venezia' This fanciful mix of White/Pink and White/Blue, ruffled, double, trumpeting blooms creates a carnival of magical color. Very vigorous, up to 15'

'Gypsy Bride' A fully double pure white flower about 3" across.

'Heavenly Blue' A popular variety treasured for its true azure blue flowers. 10-12'

'Ismay' 'Ismay' has light blue flowers, 3 - 4 inches across, marked with a deep blue star.

'Knolias Black' Very Exotic! An abundance of very attractive purple - black flowers with cerise throats, covering this very vigorous climber. 6-8ft

'Scarlet Ohara' Scarlet O' Hara will produce crimson colored, 3.5", trumpet shaped blooms. The single, saucer like petals will expose a magenta colored star.

'Split Second Double' Best double bloomer! Large, full, double, peony-like blooms of rosy pink. No two blooms are alike. 4-6'

PASSIFLORA (Passion Flowers) A tropical, tendril climber with showy, fragrant, exotic flowers. Each flower has a bowl -shaped base of sepals and distinctive filamentous petals. Over-winter indoors, Prune in early spring. Fast growing. Part to full sun.

alata 'Ruby Glow' The 4" flowers are comprised of a corolla that has purple and white striped filaments backed by dark crimson sepals.

'Blue Eyed Susan' Very large 3-4 inch fragrant flowers adorn this easy, vigorous vine continuously. They are a purple-blue and ruffled. Very Showy! 2-3' in container.

caerulea 'Common' Blue and white 4 inch fragrant flowers. A heavy bloomer and a vigorous plant.

'Lady Margaret' Beautiful, large raspberry red petals and sepals are centered by a corolla of white filaments. Blooms prolifically from spring to fall.

'Sunburst' Having outstanding flowers as well as foliage. The 2" blooms have a bright orange corona and golden yellow petals. Foliage is dark green with a few random gold dots and a deep purple reverse. Fragrant. Grows approx 10' in one season.

SWEET PEAS lathyrus odoratus Sweet pea plants produce fragrant blossoms. Prefer cooler temps while getting established and support for their tendrils to wrap around. Sun

'Prince of Orange' Bred by Morse in 1928, this lovely orange sweet pea has a slight pink blush. An old fragrant grandiflora, rare today, it needs the attention of gardeners to survive

Annual Vines

until its 100th birthday and beyond.

'Royal Mix' 'Royal Family Mix' sweet pea plants produce fragrant blossoms that are red, salmon, pink, white, lavender, and purple in color.

THUNBERGIA The Black-Eyed Susan Vine twines its way up trellises and hanging baskets, or trails from window boxes. Trumpet-shaped blooms with black throats dance amongst soft, arrow shaped leaves. Full sun to light shade.

alata This species is well known as a fast grower, long flowering, friendly creeper with many twining stems.

'Arizonia Rose Sensation' Shades of lovely deep rose, with the darker eye contrast neatly with dark green foliage. Long blooming.

'Sunny Arizonia Glow' Masses of bright orange-red with dark center sunny flowers.

'Sunny Lemon Star' Very bright yellow flowers with black eyes. 5-8'

'Sunny Orange Wonder' Vibrant orange flower with black eyes. 5-8'

susie with black eye series Offered in both 'Susie Orange' and 'Susie Yellow', they both have large flowers, with black eyes, that grow vigorously.

'Tangerine Slice-A-Peel' Pale orange stripes along the edge of each petal contrast with rich orange-red base color and dark central eyes.

grandiflora Native to China, India and Nepal, this species is known for its large blue flowers.

'Blue Sky' A robust large leafed vine having exotic, waxy, 2-3" wide blooms which are light blue with deeper blue veining and a creamy white throat. A spectacular site.

'Variegata' Powder blue flowers nestled amongst green and white variegated leaves. Will twine itself on arbors and trellises. 10-12'

VIGNA caracalla Commonly called the Corkscrew Flower, this non-hardy perennial bears unique snail-shaped, fragrant, pink-purple flowers all summer on a twining 6' vine. A joy to grow! Full sun.

ACHILLEA millefolium (Yarrow) The attractive foliage and durable flowers of the Yarrows make them an indispensable plant for summer gardens. These sun lovers are undemanding, resistant to drought, and intolerant of heavy, wet soils. They also make excellent flowers for cutting and drying. Zone 4-9

'Little Moonshine' Bright, golden-yellow flower clusters. Similar to 'Moonshine' but more compact. Gray-green foliage and very early-blooming. H 12-14"

'Pomegrante' Rich velvety red flowers over compact foliage. 2'

'Sunny Seduction' A myriad of buttery yellow flowers rise up from clumps of silvery green foliage. 24-30"

x **'Moon Dust'** This sport of 'Moonshine' is about half the size with the same silvery foliage and lighter yellow flowers. H 12-14".

AGASTACHE All Agastache grow best in full sun and well drained soils. They are one of the best plants for attracting hummingbirds to the garden. Zone 5-9

cana x barberi 'Boloro' Rose-purple flower spikes stand out against dark bronze foliage. Blooms appear from about June to the fall above licorice-scented leaves. 16-24"

x. **'Kudos Mandarin'** Orange! Its neat compact (18-20"), disease-resistant habit makes this a perfect June-September splash of color for container or front-of-the-border.

AJUGA reptans (Bugleweed) An effective, rapid growing ground cover. Excellent for under trees where a lawn is difficult to establish. Very versatile, growing in full sun or full shade. May-June. Zone 4-8.

Perennials

'**Black Scallop**' Black foliage and spiky blue flowers, which appear in early summer make a dramatic contrast. 'Black Scallop' thrives in full sun, which intensifies the black color. H 6-12"

'**Purple Brocade**' Waxy royal purple foliage hugs the soil with dark purple flowers. 2-4"

ALCEA rosea (Hollyhocks) An old-fashioned biennial, Hollyhocks are popular in cottage gardens. Elegant spikes of single or double flowers. May need staking. Prefer rich, well-drained soils and full sun. July. Zone 3-9

'**Chaters Mix**' This mixture produces larger and more prolific double blooms in a variety of colors: rose, pink, yellow, salmon, scarlet, maroon and white. Stunning used in a mixed border. 4-6'

spotlight series This series produces fabulous single flowers. The best trait: Plants are truly perennial, not bi-annual! July, 4-5'

'**Black Night**' An unusual shade of purple-black with a yellow eye.

'**Mars Magic**' Shades of bright red.

'**Radiant Rose**' Rose-pink single flowers.

'**Sunshine**' Shades of bright yellow.

ALCHEMILLA mollis 'Thriller' (Ladys Mantle) A rugged, clump-forming plant with round scalloped leaves and delicate sprays of chartreuse flowers rising above its foliage. An old fashioned cottage garden favorite. Very free flowering. Part shade and moist, well-drained soil. June, H 16", Zone 4-7

ALLIUM A large and varied genus, including chives and ornamental onions. Alliums are useful as contrast plants, cut flowers, culinary herbs and insect deterrents. Prefer full sun, tolerate dry soil.

afatunense 'Purple Sensation' (Giant onion) Eye catching large purple globe flower the size of a tennis ball. Hardy as long as it has good winter drainage. The basal foliage begins to die back as the flowers open, so plant it where other plants hide the foliage. May-June. 3-4', Zone 3-8

schubertii Commonly called tumbleweed onion, this is a bulbous perennial grown for its impressive display of rose-purple flowers that bloom in giant, spherical umbels (each to 9-12" in diameter) in late spring. H 12-24", Zone 5-8.

species An unnamed Species of allium purchased at a farmer's market some years back. Spherical pale lilac flowers all summer. Great for cutting. June-August. 2', Zone 3-8

x. 'Medusa' Twisted foliage and stalks with Grey-green, narrow foliage. Month-long color show of 2" purple ball like flower clusters Deer and rabbit resistant. H 20-24", Zone 4-8.

x. 'Millenium' 2018 PERENNIAL OF THE YEAR! This hybrid allium blooms in mid-summer with large 2" globes of rose-pink flowers. Mature plants have dozens of globes covering the attractive, shiny deep-green grassy foliage. H 12-18", Zone 5-8.

ALSTROMERIA 'Inca Ice Koice' (Peruvian Lily) Long Blooming! Clumping 'Koice' begins flowering in early June and continues non-stop to frost. The 18" tall stalks are topped with clusters of light peach flowers highlighted with cinnamon flecks. A hummingbird treat. Likes well drained, even moisture soil. Hardy to 0 degrees. H 2-3'. Full sun to part shade. Zone 5-9

ALYSSUM wulfenianum 'Golden Spring' (Madwort) Low, trailing mound or cushion of grey-green leaves, bearing masses of golden-yellow flowers in mid to late spring. Requires good drainage. Blooms April-May, Full Sun, H 6-8", Zone 4-9.

AMSONIA (Blue Milkweed Blue Star) Native to the Northeast and central U.S., these

Perennials

lovely wild flowers produce narrow leaves and clusters of pale grey-blue, starry flowers. Easy to grow and long-lived. Golden fall color. Prefers moist, fertile soil and full sun to light shade. Zone 4-9

hubrichtii Very fine-textured foliage with light blue flowers. Arching clumps of willow-like leaves. Light blue starry flowers are great for cutting. May-June, H 2-3'

tabernaemontana

species Arching clumps of willow-like leaves. Light blue starry flowers are great for cutting. May-June, H 2-3'

'Storm Cloud' Dark black stems and dark leaves with silver veins as plant emerges. Long blooming light, periwinkle blue, star-shaped flowers. H 24-30"

x. **'Blue Ice'** Dark blue buds and blooms decorate your garden for 5+ weeks in late spring. Foliage forms a dense, compact mound and turns a brilliant yellow in the fall. H 12-15", Zone 5-9

ANEMONE (Windflower) A large genus consisting of the Fall blooming Japanese Anemones and the Spring bloomers that are native to North America. All have mounds of lovely foliage. All prefer rich, moist, well-drained soil in full sun to part shade. Most prefer to be shaded from the midday sun. Zone 5-8.

quinquefolia (Wood Windflower) One of the earliest blooming flowers in the rich, moist forests of New England. Look for showy white flowers poking above the dissected leaves. These offer food to pollinators searching for nectar early in the season. H 6-8", Zone 3-8

sylvestris (Snowdrop) Large pure white fragrant flowers are held well above lush foliage in spring. Nice when paired with bulbs. Flowers fade to form attractive cottony seed heads. Spring bloomer. H 9-12"

tomentosa 'Robustissima' Single mauve-pink flowers. July-August, H 3'.

x. **'Fantasy Pocahontas'** This beautiful, compact gem is a "must see for yourself". Produces double pink blooms from July to September that are on sturdy stems. H 12-18".

x. **'Honorine Jobert'** Single white flowers on long, sturdy stems. Late summer. H 3'.

x. **'Loreley'** Light rosy pink semi-double blossoms in late summer on into fall. 'Loreley' is tall and graceful, forming an attractive clump. H 35-40"

x. **'Lucky Charm'** Bursting with color, deep pink blooms with golden centers sway in the breeze with dark violet leaves that mature into dark green. Blooms late summer into fall extending the color in your gardens. H 2.5-3'.

x. **'Wild Swan'** Multi-award winning, the elegant 3" snow-white flowers are accented with a lilac blue wash on the reverse and flowers are produced from June to November. H 18".

ANEMONELLA thalictroides (Rue Anemone) A spring ephemeral plant in the buttercup family, native to woodlands in eastern North America. These plants prefer dappled sunlight during the spring, but tolerates considerable shade later in the year. Requires moist, well drained, humus soil. Best when planted under deciduous trees. Spreads by reseeding. Zone 4-8

'Betty Blake' This Anemonella has full, double light-green flowers that can last up to 4 weeks. They start blooming a little later than the other forms. This variety is also very easy to grow. H 10"

'Lloyds Big Bloomers' This exceptionally large and robust form is very long blooming-up to a month-creating a most satisfying floral display. The upward-facing white flowers appear over delicate fern-like foliage. Will form nice clumps and self-sow when happy. Eastern U.S. native. 12"

ANEMONOPSIS macrophylla A rarely offered wood-lander from Japan with delicate

Perennials

looking sprays of waxy, lilac flowers among deeply lobed dark green leaves. Hardy and long lived. Full to part shade and moist, rich soil. Late summer. H 2-3', Zone 4-7.

ANGELICA gigas This is a unique, bold-leaved plant, excellent for specimen effect. A bushy, upright clump of coarse green leaves, bearing huge umbrella-like heads of crimson-red flowers in late summer. A self-seeding biennial. This is NOT the species of Angelica used for its edible stems. Partial sun, H 3-6", Zone 4-9.

AQUILEGIA (Columbine) Columbines are delicate, clump-forming plants which bloom in early summer and are charming in bouquets. All have beautiful foliage and uniquely shaped blooms. They thrive in sun or partial shade and a well-drained soil. Some reseed easily. Zone 3-8.

canadensis Nodding, spurred flowers. Early spring bloom. Red spurs around a rosette of yellow sepals. Our native columbine. April-June, H 1-2'.

songbird series Eye Catching! An abundance of deep-colored flowers that are long lasting. 3 1/2" blossoms face skyward rather than nodding as with other columbines. Available as 'Bluebird', light blue and white bi-color blooms and 'Goldfinch', clear yellow. H 18-24".

vulgaris Double, short spurred flowers blooming earlier than other Columbines. Early May to Mid-June.

'Clementine Salmon-Rose' (Double Columbine) Fluffy double flowers that resemble small Clematis bloom; this selection produces blooms in shades of dusty rose to salmon with a yellow center. H 12-18".

x. 'Origami Pink and White' Compact plants with long spurred flowers that are earlier flowering. Pink and white. H 18"

x. 'Spring Magic Pink' The flowers of this series feature bold hues of red and pink accented with white. H 12-16".

ARALIA cordata 'Sun King' (Golden Japanese Spikenard) This tropical looking beauty brightens up the shade garden with its very large, bright gold leaves. With a few hours of sun, the foliage remains bright gold through the summer, the clumps are topped with 2' tall spikes of tiny white flowers which give way to purple-black berries in fall. 3', blooms mid-late summer, partial shade in average soil. Zone 3-9.

ARTEMISIA schmidtiana 'Silver Mound' An classic indispensable garden plant grown for its silvery, often aromatic, foliage. Prefer full sun and dry. Mounded, 8-10". Zone 4-8

ARUNCUS (Goatsbeard) Handsome plants exhibiting thick, leafy mounds of foliage and graceful, creamy white plumes. Stunning reflected in a waterside landscape. A choice plant for a moist, openly shaded garden. May be grown in sunnier locations provided there is adequate moisture. June-July. Zone 3-9

aethusifolius A ground-hugging mound of finely cut foliage which sports creamy white plumes in summer. 8-12"

dioicus 'Whirlwind' This hybrid produces consistent, finely dissected, cut foliage, which is a little wider than 'Kneiffii'. Highlighted May thru July with creamy white feathery panicles. Sturdy upright growth habit. 2'; in bloom 4'.

x. 'Chantilly Lace' Flower power! 'Chantilly Lace' forms a mound of dissected foliage that is crowned in early summer with billowing sprays of creamy-white flowers that nearly hide the leaves! H 30-32".

ASARUM (Wild Ginger) An wonderful genus, excellent as a woodland ground cover. Glossy heart-shaped leaves of deep green. Once established it is very drought tolerant. Full/partial shade, humus-rich moist soil.

Perennials

europaeum (European) The aristocrat of the ginger family. This species spreads slowly but surely to form a handsome 6in-deep carpet of glossy, dark green, kidney-shaped leaves measuring 4in across. Zone 4-8

splendens (Showy) The arrow-shaped emerald green leaves are heavily mottled in bright silver. This combines well in the shady garden with ferns and hostas. A collectors plant that is slow growing but worth the wait. 6-8", Zone 5-9

ASCLEPIAS tuberosa (Butterfly Weed) Tight clusters of bright-orange, starry flowers. Very drought tolerant. Slim, decorative pods form later, filled with papery seeds. H 24", Zone 4-9

ASTER Large genus of perennials with a variety of heights, all with daisy-like blooms. Great for attracting butterflies. Grow in sun or part shade in a well-drained soil. Zone 4-8.

kickin series Forming a dense mound of finely textured foliage that becomes blanketed with flowers with gold centers, from late summer into fall. Available in 'Carmine-Red', with magenta flowers and 'Lilac Blue'. H 2-3'.

nova-beigi 'Dragon' Semi double blue flowers with yellow centers, forming a bushy clump, flowering in September-October. Compact habit. H 12-15".

woods series Dwarf hybrids with superior disease resistance. Prolific flowers that bloom for a long time period in late summer and early fall. Available in Pink and Purple. H 10-16".

ASTILBE (Plume Flower) Very hardy, showy, plume-like flowers on attractive, often glossy foliage. They love rich, deep, moist soil in partial shade, but will grow in sunny sites where the soil really holds moisture or has irrigation. Rabbit and deer resistant.

arendsii A cultivar group of complex hybrids with *A. astilboides*, *chinensis*, *japonica*, *thunbergii* and others. Zone 4-8.

'Bressingham Beauty' This large Astilbe produces tall arching, salmon-rose flower plumes from early-to-mid summer. H 36".

'Bridal Veil' Feathery white plumes, late June-July, H 18".

'Chocolate Shogun' Incredible dark glossy, chocolate-purple lacy foliage is the deepest darkest foliage color by far in an Astilbe. Blooms of soft pink appear in late summer to about 2 feet tall.

'Fanal' Large plumes of tiny red flowers in midsummer, accented by deep green to bronze-green foliage. H 18-24".

chinensis Chinese Astilbes produce dense, erect plumes. Tough plants which prefer moist soils but will tolerate slightly drier soil than other Astilbes. Zone 3-8

'Little Vision Series' A new dwarf form of the Vision series. This is a robust variety that tolerates sun better than others. Offered in 'Pink', with clear soft, pink blooms and 'Purple', with raspberry-purple blooms. Mid to late summer, 14-16"

'Maggie Daley' Striking purple plumes bloom in mid season against dark foliage. 28"

'Mighty Chocolate Cherry' Robust, strong velvety-red flower spikes, divided dark green and chocolate brown to reddish foliage. H 45"

'Mighty Pip' Strong, robust spikes of graceful extremely large salmon-pink plumes. Late season. 45"

'Milk and Honey' Creamy white plumes turning to a light pink as it ages; lacy green leaves. Mid-Late Summer. 24-30"

'Vision in Pink' A robust grower with thick pale-pink plumes and blue-green foliage. July. 32"

'Vision in White' This variety has large, creamy white, triangular flower plumes that stand above a robust clump of smooth, glossy, green leaves. More refined foliage than a

Perennials

typical chinensis type. Mid-July thru August. H 24", Zone 3-8.

japonica Large airy flower clusters that are not as dense but make up for it in volume. Bright colors and glossy leaves. Zone 4-8.

'Deutschland' Shorter and earlier than other whites, this Astilbe will bloom in early summer, with pristine white plumes. H 18-24"

'Montgomery' Handsome, fern-like glossy green foliage and stiff stems that hold elegant true red plumes aloft without staking. June-July. 24"

x. 'Delft Lace' Red stems carry deep salmon buds which open to soft apricot pink flowers held over waxy deep blue-green foliage. Early summer. 2-3'

x. 'Radius' Shiny red, elegant, spiky plumes stand tall in a vase-like shape over dark green foliage. Mid-summer. H 24".

x. younique series This series offers a more compact, rounded habit with very vibrant color. These plants produce double the amount of dense flower scapes. Offered in 'Salmon' and 'White'. New for 2018, 'Ruby-red'. H 12-18".

ASTRANTIA major 'Roma' (Masterwort) Charming cottage garden plants that make excellent, long lasting cut flowers. Silvery-soft pink pincushion flowers surrounded by a ruff of greenish-pink bracts. 28", Prefers partial shade and rich moist soil. Long flowering season.

BAPTISIA (False Indigo) Native to North America, False Indigos are wonderful, long-lived perennials with gorgeous pea-like blooms, followed by attractive seed pods. The lovely textured, bluish-green foliage forms large, bushy clumps. Superb cut flower and cut foliage. Prefers full sun and well-drained soil.

australis Indigo blue flowers. June, 3-4'. Zone 3-9

decadence series This series has a shorter, more compact habit and unique flower colors. This variety forms an upright, vase-shaped mound of attractive blue-green foliage. Late Spring thru early Summer. Zone 4-9

'Cherries Jubilee' Unique flower color: Deep maroon opens to bicolor maroon and yellow flowers. 24-36"

'Dutch Chocolate' Rich, velvety, chocolate-purple flowers are held on upright stems atop an especially compact, relatively short mound of foliage. H 24-36".

'Pink Truffles' Clear soft pink blossoms with a pale yellow keel are produced in late spring, the perfect compliment to other spring bloomers. Its compact, shorter habit makes it easy to fit into any garden. H 2.5-3'.

'Sparkling Sapphires' Vivid violet blue flowers appear atop a compact, upright clump of foliage in spring. H 24-36".

'Vanilla Cream' The pure white flowers dance in the breeze late spring to early summer. H 36".

x. 'American Goldfinch' Light up your late spring landscape with this bold beauty. This native cultivar puts out loads of bright yellow floral spikes week after weeks beginning in late spring. H 3', Zone 4-9.

BERGENIA 'Bach' The glossy green evergreen leaves of Bergenia look outstanding all year long. In the Fall they take on a magnificent reddish-bronze hue. The pale pink blooms in the Spring. Sun to part sun, and rich, moist, well-drained soil. Incredibly hardy! H 12", Zone 3-8

BRUNNERA macrophylla (Siberian Bugloss) This perennial Forget-Me-Not has small but strikingly gorgeous, true blue flowers held on slender stems above heart-shaped leaves. Prefers part to full shade and moist soil. May-June. Zone 4-9

'Alexanders Great' A superb specimen perennial, forming a gigantic mound of very large,

Perennials

heart-shaped, heavily silvered leaves. This selection makes a dynamic statement in the woodland garden. H 10-14", spread 24".

'Dawsons White' Fantastic foliage! This superb woodland perennial forms a clump of heart-shaped green leaves boldly edged with creamy-white. Sprays of bright blue Forget-me-not flowers appear in mid to late spring. H 15-18"

'Dianes Gold' Worth her weight in gold, 'Diane's Gold' retains its crisp chartreuse golden foliage all summer. Sky-blue flowers. in spring. Adds pizzazz to your shady garden. H Short-12"

'Jack Frost' Big, heart shaped leaves are gorgeous, rich silver with dark veination. Vibrant, sky blue forget-me-not flowers are prolific in spring.

'Looking Glass' This woodland perennial matures with a nice mound of solid silver foliage, with clusters of tiny blue flowers in the spring. 12-15" tall

species Heart shaped leaves with true blue flowers.

BUDDLEIA davidii buzz series (Butterfly Bush) These attractive compact plants will not take over the garden. Perfectly proportioned for patio pots and smaller gardens. Series includes Midnight, Ivory, Sky Blue and new for 2018 Hot raspberry. H 4'. All bloom July-September. Zone 5-10

CALAMINTHA (Calamint) An ornamental mint which is non-invasive. Beautiful and aromatic for the front of the border. Drought tolerant. Full sun to part shade. Average to well drained soil. Zone 4-9

grandiflora This ornamental mint is a long bloomer with rosy pink flowers. Its foliage looks nice all season. 12-18"

x. 'Montrose White' This is a sterile selection with a nice uniform, clumping habit. It is covered with white flowers from June to October over mint scented foliage. No deadheading needed, it is self cleaning. Grows 1'

CAMPANULA (Bellflower) A large genus varying from low-growing mounds to tall stately specimens. Bellflowers prefer full sun to partial shade and moderately rich, moist, well-drained soil. July-August.

carpatica Tidy, clumping plants with 2" bell shaped flowers, for edging or rock gardens. July-August. H 8", Zone 3-8

'Pearl Deep Blue' This forms a low, cushion-shaped mound of small green leaves, with loads of up-facing, open medium-blue bells appearing in early summer.

'Rapido White' White bell-shaped flowers.

persicifolia takion series (Peach-leaf Bellflower) Super compact with very large colorful and abundant blooms. Small enough for containers, very strong stems. Available in 'Takion Blue', with big lavender-blue flowers or 'Takion White', with flowers facing upward & out. H 16-20", Zone 2-9

x. 'Birch Hybrid' Profuse blooming with nodding cup shaped flowers of purple blue. Excellent for walls and crevices this poscharyskiana and garganica cross (hybrid) will bloom all summer long. H Short, 6" x 12" W. Full sun to part shade. Zone 4-7.

x. 'Dicksons Gold' Bright gold foliage forms a low growing, dense, weed-suppressing clump. A profusion of lavender blue star-shaped flowers provide striking contrast. H 4-6", Zone 5-7

CENTRANTHUS ruber 'Coccineus' (Jupiters Beard -Red Valerian) Handsome plant having a loose, bushy habit with clusters of fragrant, red flowers which are attractive to butterflies. An old-fashioned cottage garden favorite for the mid or front border. Prefers full sun to partial shade and well-drained alkaline soil. June-Sept. H 2-3', Zone 5-8

Perennials

CERATOSTIGMA plumbaginoides (Leadwort) A low growing spreader, Plumbago bears clusters of brilliant blue flowers. Glossy green foliage turns to an attractive red in Autumn. A must for the late summer and fall border. Prefers full to part sun and light, well-drained soil. August-September, H 6-8", Zone 4-9.

CHELONE obliqua 'Tiny Tortuga' (Turtlehead) This dwarf Turtlehead delights with rich, dark bronzy-burgundy leaves in spring, followed by dark pink blooms in mid and late summer. A native perennial that gets its name from the shape of its unusual flowers, which resemble the heads of snapping turtles. It's a good choice for heavy, wet soils. It grows best in some shade, but tolerates full sun with adequate moisture. H 14-16", Zone 3-8.

CHRYSANTHEMUM This is a genus of about 20 species of upright bushy perennials, grown primarily for their showy flowerheads which consist of ray florets in a variety of colors and different forms. They enjoy full sun and average garden soil.

superbum leucanthemum (Shasta Daisies) Robust, clump forming perennial with inversely lance-shaped, toothed, glossy, dark green basal leaves. Zone 5-9, unless otherwise noted.

'Banana Cream' Lemon yellow flowers aging to buttery yellow. June-August, 15-18"

'Becky' Large flowered variety with long stems. July-October, 24-36". Zone 3-7

'Daisy May' Here is an easy, fast growing, and fun perennial, with a long bloom time, and showcasing clean 2 1/2 to 3" white flowers. Blooms all summer with faithful deadheading. H 12-24"

'Real Charmer' Large decorative blooms with fancy fringed central petals. Flower color is cream to lemon, with contrasting deep golden centers carried on very strong stems. H 20-22".

'Real Neat' Real Neat has double rows of pure white fluted petals with golden yellow centers. Neat compact habit ideal for pots and containers and garden borders. H 16-18"

'Spoonful of Sugar' Huge, 4 1/2" double rowed, creamy white blooms with a bright yellow eye smother the deep green foliage during the heat of summer. Loved for its compact, dome-like habit in the garden. H 16-18".

CHRYSOGONUM virginianum var. australe (Golden Star) A popular shade tolerant ground cover with bright yellow star-shaped flowers. Glossy dark green leaves with short flowering stem. Spreads quickly by above ground stolons. Late spring to early summer. H 6-10", Zone 5-9

CIMICIFUGA (Black Snakeroot) Tall racemes of tiny flowers tower over fine foliage. Good for cutting. Interesting as a specimen plant and beautiful in masses. Prefers partial shade and moist, well-drained soil high in organic matter. Zones 4-8.

japonica (Japanese Bugbane) The leaves have a maple-like appearance and flowers emerge from the axils of the leaves.

'Hillside Patent Leather' A striking plant that is more compact with more emerald-green leaves than the species. H 8-12", with flower 2-3'. Bred local grower, Peter Joppe of Hillside Nursery.

'Hillside Variegatum' Grows like the other cimicifuga to three feet or so with spikes of narrow white flowers, but this has foliage boldly splashed and speckled with white. Very showy and striking, and rarely offered for sale. Zone 4. Bred by local grower, Peter Joppe of Hillside Nursery.

racemosa (Bugbane) Native Eastern wildflower with deeply cut foliage and long, fragrant, ivory flower racemes. July-Aug.

'Pink Spike' Wonderful bronze tinted foliage is held on dark, upright stems and in late summer and early fall they are topped with tall spikes of pink buds that open to

Perennials

pinkish-white flowers. Plant in groups of 3 for best effect. H 48-60".

species The stately native!

rubifolia (Maple Leaf Cimicifuga) A favorite native Cimicifuga, it is a more compact plant with large maple-like leaves and spikes of white flowers in the fall. Zone 4-7. 2-3'.

x 'Chocoholic' A shorter Cimicifuga with dark chocolate-brown foliage all season. Spikes of pink tinged white flowers open in August and have a sweet fragrance. H 2-3'.

CONVALLARIA majalis (Lily-of-the-Valley) Woodland ground cover which spreads quickly. Sweetly fragrant, white, bell-shaped flowers cover dark green elliptic foliage. Root stalks and berries are poisonous. Can be invasive under ideal conditions. Prefers part shade to shade and moist soils. May-June, H 6-8". Zone 3-8

COREOPSIS (Tickseed) Well known perennials with pinnately lobed foliage absolutely covered with bright daisies. Tickseed is easy to grow and have a long bloom time. Ideal for the low-maintenance garden. Attracts butterflies. Prefers full sun and average to poor, well-drained soil. Zone 5-9.

big bang series This series features some of the longest booming perennials, blooming from early summer often to frost. They have improved disease resistance, sterile flowers, so they won't seed around. From the well known plant breeder, Darrell Probst.

'Full Moon' An extremely floriferous, very long blooming selection that is a dynamo in the landscape. Bright canary yellow, 2-3" flowers are carried on well-branched stems for several months. Tickseed. H 18-24".

'Red Satin' Solid deep wine red to ruby red flowers cover the deep green, threadleaf, tightly mounding foliage all summer long. Proven hardy to Zone 5. 15-18".

lil bang series If you love the "Big Bang Series" of coreopsis but are looking for a smaller plant that grows only a foot wide, this series is for you! Naturally compact, great disease resistance and long bloom time. From Master hybridizer Darrell Probst, the flowers are sterile, therefore they just keep coming all season long without the need for deadheading. Tickseed. Zone 5-9

'Daybreak' Sterile, bicolor flowers with a prominent orange-red center and fringed, gold tips bloom all summer long. H 8-12"

'Red Elf' Love 'Mercury Rising' but need something smaller? Deep burgundy red, sterile blossoms are produced atop a more compact clump of disease resistant foliage all season. Blossoms have a lightly frosted white tips in high summer. H 8-12"

satin and lace series A new series of tickseed type that are more cold tolerant and have sterile flowers, they will not reseed around the garden. They form a sturdy, upright clump and bloom for months. Highly mildew resistant selections by Darrell Probst with vibrant two tone flowers, bushy, compact and long flowering. 15-18", Zone 4-9

'Berry Chiffon' White flowers with a large, vibrant raspberry eye. The raspberry color expands to almost cover the surface in cooler temperatures.

'Red Chiffon' 'Red Chiffon' starts pale yellow with a vivid red eye that expands late in the season until the flower is red with light petal tips.

verticillata Also known as Threadleaf Coreopsis, it spreads laterally by rhizomes. The stems are wirey, flowers usually 2" across and are produced abundantly in clusters from midsummer to fall. Tolerates drought, poor soil and neglect.

'Crazy Cayenne' Stunning electric-orange blooms over soft green threadleaf foliage on a tight, compact plant. Blooms from early summer through fall. H 15-18".

'Curry Up' Bright yellow-gold flowers with large red eyes over soft green threadleaf foliage on a tight, compact plant. Blooms from early summer through fall. H 15-18".

Perennials

'Moonbeam' A prolific bloomer of bright lemon-yellow flowers that produce masses. The color is softer than other coreopsis. Blooms begin in Mid-May and continue thru late August. Clumps are open and airy with needle like foliage and have a delicate look. Can tolerate some shade. H 1.5-2', Zone 3-9

'Zagreb' 'Zagreb' is more compact and features golden yellow, daisy-like flowers (1-2" diameter) with rays and darker yellow center disks. H 1-1.5", Zone 3-9.

'Zesty Zinger' Light ivory flowers (1.5") have dark magenta centers which spread toward the edge of the petals, compact, rounded foliage. H 15-18".

x. **'Buttermilk'** Delicate, yellow flowers set in a clean upright cluster. Blooms from June-October. Great to add a light touch to your garden. H 15".

x. **'Sienna Sunset'** Burnt sienna colored flowers aging to deep orange. Threadleaf. June-Oct. 16"-20"

CORNUS canadensis (Bunchberry) A slow spreading ground cover with white upright flowers above overlapping whorled leaves. Red berries in late summer. Best grown in a deep cool mulch. Shade to part shade, moist acid soil. Zone 2-6. 6-8".

CORYDALIS lutea A relative of Dicentra, Corydalis is an exceptional garden addition for a partially shaded site. Delicate, leafy foliage of cool blue to pale green sets the stage for loads of uniquely shaped, almost tubular, yellow blooms. Part shade to shade. Rich, moist soil. Zone 5-9

CRAMBE cordifolia Notable in stature, forming a giant mound and producing a profusion of airy white flowers on tall stems in late Spring to early Summer. Prefers well drained soil in full sun. H 5'-7', Zone 5-8

CROCOSMIA Small, trumpet-shaped flowers on handsome, sword-like foliage. Exceptional cut flower!! Needs sun and well drained soil. Tender, so mulch well over winter. 2-4', July-August. Zone 5/6.

'Emily McKenzie' A large-flowered variety, widely grown for cut flowers. Brilliant orange accented with a red halo-like ring surrounding a yellow throat. H 24-36"

'Lucifer' Nodding, scarlet, miniature gladiolus-like flowers. A customer favorite!

CYPRIPEDIUM (Lady-Slipper) Considered by many to be the most captivating of the native woodland wild flowers. Grow in moist, rich, well-drained soil in partial shade, with approximately neutral pH. Very limited supply of each! Nursery grown. Zone 3-7.

pubescens 'XL' (Yellow Lady-Slipper) Probably the easiest native orchid. First to bloom in late April into May. Will form large clumps and persist for years when happy. H 12-14".

reginae (Showy Ladyslipper) Elegant rose-pink and white flowers in late May into June, often blooming for up to four weeks. Once established it can form large clumps and persist for years. Eastern U.S. H 12-18"

DEINANTHE bifida (Two-Lobed False Hydrangea) This hydrangea relative hails from Japan, where it forms a 2' tall x 2' wide clump of rough-textured, bi-lobed, light green leaves. The clumps are topped in June with white flowers resembling miniature hydrangea florets. Grow in part shade and moist, well-drained, acidic, rich soil. Zone 4-9.

DELOSPERMA (Hardy Ice Plant) Bright little daisies adorn glossy, rounded, succulent foliage. A cheerful ground cover or edging plant for hot, dry spots. Borderline hardy so provide good drainage and mulch in winter. Full sun, well-drained soil. Summer. H 2", Zone 4/5-8

'Fire Spinner' A striking color combination of orange on the petal edges and red to pink

Perennials

towards the center; flowers are massed in spring and appear periodically through summer. The apple green foliage makes a glistening, fast spreading carpet that maintains its presence through winter.

'Table Mtn. John Profitt' Lustrous fuchsia blooms almost all summer. A fast spreading ground cover with evergreen foliage which may develop a nice purple tinge in winter.

DELPHINIUM Spectacular plant with elegant and very dignified looking flowers. They derive their name from the Greek delphin, meaning dolphins, which the buds were thought to look like. Primary bloom is mid June to early July, with a lighter rebloom from September to October. They like well-drained, moist, slightly alkaline soil and a cool site, such as one receiving morning sun. Zone 4-7

belladonna 'Bellamosum' Sturdy and graceful species selection with bright dark blue flowers, 2-3', June.

elatum 'New Millennium Series' Magnificently full blossoms, stable and strong flower stalks, vigorous growth, very good winter hardiness, tolerates warmer and humid climates. 4-6' flower height.

'Blue Lace' True sky blue with lavender-pink accents.

'Cobalt Dreams' New selection produces strong, tall spires tightly packed with cobalt blue florets with white central bees. Stunning alone or several!!

'Pagan Purples' Double rich blue-purple with small brown and white bee.

'Pink Punch' Likely the deepest pink delphinium available today. 'Pink Punch' bears strong, broad spikes of rich mulberry pink, often with a white, brown or pink bee.

elatum 'Pacific Giant Series' Tall stately spikes in beautiful blending hues. 4-6' flower height. Needs staking.

'Black Knight' Dark Violet

'Blue Bird' Clear blue with white bee.

'Galahad' Pure white flowers with white centers.

'Guinevere' Light lavender-pink with white bee.

'King Arthur' Violet with large white bee.

'Summer Skies' Immense, graceful light to medium blue spikes with a white bee.

DIANTHUS A large genus including carnations, pinks, and Sweet Williams. Great for massing in perennial borders and for cut flowers. Prefer full sun and alkaline well-drained soil. Add lime yearly.

barbatus (Sweet William) Old-fashioned flowers, reminiscent of Victorian cottage gardens. Very fragrant and features small flowers held in dense, flat-topped terminal clusters (3-5" wide). Excellent cut flower.

'Rockin-Red' 3" red, lacy flowers that bloom in clusters from early spring well into fall! Durable performance and dependable overwintering will keep your garden dancing with color year after year! H 18-24". Zone 4-8.

'Scarlet Fever' These plants have large bright, red-orange flowers that form dense clusters, with broad leaves. They have a spicy clove scent. H 16-20", Zone 4-9.

fruit punch series Excellent habit, beautiful foliage and blooms that are breathtaking are the trademark of this series. Zone 4-9

'Cranberry Cocktail' This sweet smelling plant produces carnation-like, double, hot magenta pink flowers atop a low mound of grey-green foliage. Florist quality flowers. H 8-10"

'Maraschino' Fluffy, cherry red, double flowers have dark burgundy eye. H 9-11"

'Sweetie Pie' Exceptionally large, fragrant 1 1/2 inch blooms are fully double and a

Perennials

bright pink color that fades to pale pink as the flowers age. This long season bloomer stands 10" tall and 12-14" wide.

- x. **'Constant Beauty Garnet'** Flaunting large, dark burgundy, semi-double flowers, which include a slight fragrance. Flowers from early spring into late summer. H 6-10", Zone 4
- x. **'Fire Star'** An early summer display of a spicy, clove fragrance fiery-red single flowers with a crimson eye. H 8", Zone 4-8.
- x. **'Kahori'** A long summer display of fragrant, lilac-pink blooms. Well suited for edging and in the rock garden. Compact habit, H 6-8", Zone 3-9.
- x. **'Mountain Frost Pink Pom Pom'** Delightful double rose-pink flowers provide a lovely burst of color in early Spring followed by continual blooming until Autumn. The tidy mounded habit keeps the plants neat and virtually maintenance-free in the garden. H 6-8", Zone 5-9.
- x. **'Olivia Wilde'** Tidy mounding habit with excellent flower production from May-July. The flowers of lavender with a lighter edge cover the foliage and have a spicy clove fragrance. H 10-12", Zone 4-8.
- x. **'Scent First Coral Reef'** Double coral-pink petals with elegant white picotee edges and a delightful spicy fragrance. 6-8", Zone 5-9.

DICENTRA (Bleeding Heart) Known for their lovely sprays of pendant, heart-shaped flowers and fern-like foliage. Bleeding Hearts prefer a rich, well-drained soil and partial shade.

spectabilis (Old Fashioned Bleeding Heart) Large and showy spring bloomers. Plants go dormant by late summer. May-June. Zone 4-9.

'Alba' Tall arching stems of pure white heart-shaped flowers.

'Goldheart' Peach colored stems support amazing metallic-gold foliage. Rose flowers. Does not go dormant in summer. 24"

species Tall arching stems of rose and white heart-shaped blossoms.

'Valentine' Looking for an updated color palette, try this new red flowering selection.

Stems of this variety are deeper red and the large, puffy heart-shaped flowers are bright red with a white tip. A deer resistant plant.

x. **'Luxuriant' (Fern Leaf)** Cross between *D. eximia* and *D. formosa*. Finely cut foliage on compact plants looks good all season. Long blooming cherry red blossoms, from mid spring thru fall. This variety is most tolerant of the sun, drought and hot weather. H 1-1.5', Zone 4-9.

DICTAMUS albus (Gas plant) The much asked for Gas Plant. The common name comes from the belief that it is possible to ignite the volatile oils in the leaves on a still, warm evening (Or maybe it's the roots - we're not about to light these gems on fire!). Glossy green leaves have a lemon fragrance when bruised. May take a year or two to become established but well worth the wait and very long lived. Nice cut flower too. Early summer. Zone 3-8

'albiflorus' This is a white flowering form. Blooming June- July, 3-4'.

species (Purpureus) Long lived and perfectly hardy these solitary plants with purple rose colored flowers have a place in every garden. 3-4'

DIGITALIS (Foxglove) A cottage garden favorite. Foxgloves have large racemes of tubular flowers. Cutting encourages side shoots. Prefers partial shade and decent soil. Zone 4-8

ambigua grandiflora A true perennial with creamy pale yellow blossoms. June- July, 24-30"

purpurea A biennial which self-seeds freely. Tall spires of unusual blossoms create a showy display. June-July

camelot series Showy trumpets with maroon freckled throats. Available in Rose and

Perennials

White. May-July. H 3-4'.

dalmation series Two awesome varieties, 'Peach', soft apricot flowered blooms delicately spotted with yellow cream markings, and 'Purple', spikes of deep, lavender-purple bells each spotted inside with maroon purple. These foxgloves produce well branched, compact, dwarf plants that flower their first year from sowing. H 2-3'

DISPOROPSIS perneyi (Evergreen Solomons Seal) With attractive purple spotting on the arching stems and leathery evergreen foliage, this plant makes a terrific tall groundcover. The creamy white, tubular, bell-shaped flowers dangle from leaf axils in late spring. Clump forming. Native to China. Zones 5-7. 15 in. Part shade to shade, moist humus soil.

DISPORUM (Fairy Bells) Rarely seen but easily grown woodland wild flowers will form large clumps and transplant easily. Partial shade and moist, woody soil. Spring. Zone 4-8

flavum (Korean Fairy Bells) A rarely seen but easy to grow plant, forming large clumps when happy. Large yellow bell flowers in spring, blue berries in late summer. This is a top of the line plant for the shade or woodland garden. Zone 3-8. 30 in.

maculatum (Nodding Mandarin) Also known as Spotted Mandarin. The flower is cream with small purple spots, forming white berries that turn yellow. 30"

ECHINACEA (Coneflower) Coneflowers are native North American wild flowers with lance shaped leaves and daisy-like flowers. An excellent cut flower and butterfly attractant. Prefers full to half day sun and well-drained soil. Mid to late summer blooms. Jacqui has gone coneflower crazy- you might think it is her favorite perennial! Zone 4-8, unless otherwise noted.

'Cheyenne Spirit' A delightful mix of brilliant hues of orange, bright red, golden yellow, and white surrounding a large brown cone. Each plant blooms one color, so plant in groups for a multi-color explosion. Sold in packs of 6 to assure color assortment. H 22-30"

'Cleopatra' Named after the brilliant yellow Cleopatra Butterfly, the blossoms of this fantastic new coneflower mimics its namesake. This compact selection has single to semi-double flowers. 15-18"

'Double Scoop Mandarin Orange' Fully double, warm, tropical orange flowers on sturdy stems and compact plants. Flowers have subtle color changes as they mature. H 20-26".

'Fatal Attraction' Sturdy black stems hold intense pink flowers. Unique flower has a double row of petals that make it quite an eye-catcher!! H 26", Zone 3-8

'Golden Skipper' Lots of bright, lemon-yellow flowers on compact, sturdy plants. Named after a common butterfly of the same color. H 15-18", Zone 5-9.

'Hot Papaya' This selection has sizzling hot red-orange double petals with falling tails from a pom-pom center. Lush green foliage with sturdy maroon-colored stems. Great variety!! 32"

'Julia' This cultivar is exactly the same shade of deep tangerine-pumpkin orange as its namesake, the butterfly *Dryas julia*. The nonstop single summer blooms make this one a sure winner! H 15-18"

'Kims Knee High' A terrific selection of our native Purple Coneflower. This is compact and bushy in habit, making it ideal for edging, containers, or towards the front of a sunny border. Flowers are mauve-pink with an orange cone. H 18-24".

'Magnus Superior' Deep rose, non-drooping flowers on sturdy stems. Rounded, bronze discs. A quintessential cultivar. 3-4', Zone 3-8

'Orange Skipper' A compact, sturdy plant that supports single, neon-tangerine orange blooms. Also named after a common butterfly of the same color. H 15-18", Blooms June-September. Zone 5-9.

'Pow Wow White' Pure white, 3-4" flowers with a golden yellow cone have wide,

Perennials

overlapping, reflexed petals. They are produced prolifically on stiff, well-branched stems over many weeks. 18-24", Zone 3-8

'Pow Wow Wild Berry' AAS Winner. Unique, 3-4" intense rose flowers with dark rose centers. Very floriferous! 16-24"

sombrero series This very well branched, compact series of coneflower is extremely hardy with bright, vivid, rich colors and a high bud count. Very fragrant! Blooms late spring until late summer. Zone 4-8

'Adobe Orange' A wonderful bright, pumpkin orange. H 24-26"

'Baja Burgundy' Compact, sturdy plants with rich, burgundy pink blooms. H 24".

'Flamenco Orange' Large and plentiful rich, deep orange blooms. Very stunning! 24"

'Hot Coral' Many large flowers that are a coral orange color that is so bright it looks almost fluorescent. A must in your garden. 24".

'Lemon Yellow' Very floriferous in bright lemon-yellow: will brighten your garden and works well in containers, also. 24"

'Salsa-Red' Large spicy-red flowers on a well branched, sturdy plant. 24"

'Sandy Yellow' Bright yellow flowers fading to lighter yellow, with a dark cone. H 22-24".

'Sangrita' Sangrita is stunning, with pointed, scarlet-red petals, burgundy eye and burgundy-red flower stems. H 22-24".

'Virgin' Large, full and fragrant flowers are pure white with a green cone and a double row of horizontally held ray petals. Upright habit, no staking required. Impressive! 2-3', Zone 3-8

ECHINOPS bannaticus 'Blue Glow' (Globe Thistle) Toothed, prickly thistle-like leaves and spiny, intensely dark blue globe shaped flowers. The gorgeous flowers are excellent for cutting and drying. Needs good drainage to survive the winter. Prefers full sun and dry, well-drained soil. July-mid August. H 3', Zone 3-8

EPIMEDIUM (Barrenwort) Excellent low-growing plant for shade. Lush heart-shaped foliage makes an excellent semi-evergreen, weed suppressing ground cover. Delicate sprays of spring flowers add to its charm. Prefers part to full shade. Will tolerate drought once established. April- May, Zone 4-9

grandiflora This species of epimedium is characterized by its large, delicate flowers.

'Nanum' Dainty and sweet this charming miniature Epimedium has a clumping habit grows a mere 3-5" tall and long spurred bright white flowers float March to April over dramatic red-purple edged deciduous foliage.

'Purple Prince' Deep purple flowers on a medium sized plant that continues to push new foliage over the old all season.

perralchicum 'Frohneiten' Red-tinged leaves set off bright yellow flowers. H 12".

rubrum In late March small, star-shaped, rose-red flowers appear on wiry stems about one foot high. As the flowers finish there is an explosion of striking, red-flushed foliage. This red is most intense on plants grown in full sun. H 8-12".

versicolor Versicolor means changing color.

'Cherry Tart' Foliage emerges in spring with a bronze hue. The real prize is the outward facing flowers that are pink and red with bright yellow anthers in the center. H 12".

'Sulphureum' Soft yellow flowers are borne on wiry stems above red-flushed foliage in spring.

warleyense 'Orange Queen' Dainty orange apricot flowers on sturdy 10-12" stems in mid spring. Olive green, oval to heart shaped foliage takes on coppery tinted marbling in the cool temperatures of late summer and autumn.

Perennials

youngianum 'Royal Flush' This hybrid is a cross between *E. diphyllum* and *E. grandiflorum*, rhizomatous, clump forming, it typically grows shorter. The leaves emerge a rich cinnamon-red color and eventually take on lovely maroon tones that are brightest along the leaf margins with delicate lavender flowers. H 15"

ERYNGIUM (Sea Holly) A large genus with over 200 species of annuals and perennials all with hairless and usually spiny leaves and dome shaped umbels of flowers resembling those of thistles. Excellent cut and dried flower. Prefers full sun and average, well-drained soil. Salt tolerant. H 2-3', Zone 4-9

planum This species is native from central Europe to central Asia. Leaves are dark green, oval with spine-tipped lobes. Many purple-blue flower heads with spiny, narrow bracts.

'Blue Glitter' A Fleuroselect 2007 Gold Medal Winner. Long silver blue stems unfold into an abundance of glittery blue pin cushion flowers.

'Blue Hobbit' Blue Hobbit' is a dwarf sea holly that rises in a globular mound to only 8-12" tall when in full bloom.

EUPATORIUM coelestirum (Blue Mistflower Hardy Ageratum) An eastern U.S. native. Covered with blue-violet flowers from late summer until frost, it is low growing, creeps rapidly by rhizomes and makes a fine groundcover for shade. It also grows well in full sun when provided with adequate moisture. H 2-3', Zone 5

EUPHORBIA polychroma (Cushion Spurge) A very variable Genus of plants (the 4th largest), consisting of 1000's of varieties.. Very drought tolerant, most have a milky poisonous sap. Zone 3-8

'Bonfire' One of the most colorful spurges with fantastic combination of deep purple, red and orange leaves. 12-17"

species A rugged species of plants with attractive foliage and plenty of sulfur yellow bracts to light up the plants in early spring to early summer. 12"

FERNS Ferns reproduce via spores and have neither seeds nor flowers. All Ferns listed prefer partial to full shade and rich, moist soils high in organic matter unless otherwise stated.

ADIANTUM pedatum (Northern Maidenhair) Nearly circular foliage is light to medium green, fine textured and graceful. A hardy and fast growing fern loved for its delicate appearance. Bright filtered light. Spreading. 12-20", Zone 3-8

ATHYRIUM (Lady Fern) This genus contains some of most popular deciduous ferns.

filix-femina A large feathery species of native fern valued for its tough, easy to care for nature. They are some of the most beautiful ferns you will find. Zone 4-8

'Branford Rambler' A spreading form with dark green fronds with a hint of red. Spreads from runner growth. Early to emerge in spring. 1-2'

'Dres Dagger' Attractive dark green fronds are crested with crispy dagger-like tips arranged in a criss-cross pattern. Typical clump grows to only 18" tall and as wide.

'Lady In Red' Bright red stems the color of ruby chard on this deep green lady fern. The color improves as the plant matures. 2-3'

'Minutissima' (Dwarf Lady Fern) Compact clone of the native Lady Fern.

Vigorous growing and spreading makes this variety an ideal ground cover for shaded areas. 12", Zone 3-9

'Victoriae' Considered the 'Queen of Ferns'. An unusual fern with unique arching, narrow fronds that crisscross to form X's. A 3-dimensional stunner in the woodland garden. H 18", spread 18".

niponicum A species valued for its colorful cultivars. Most display their best color when

Perennials

exposed to direct sunlight. Zone 4-8

'Godzilla' (Godzilla Painted Fern) Larger and more vigorous than A. 'Pictum', 'Godzilla' is thought to be a cross between Lady Fern and Japanese Painted. Large silver leaves are marked with purple and green on purple stems. 3'

'Pictum' (Japanese Painted Fern) Grey green fronds touched with silver and pink. Red stems. 15"

pictum 'Pearly White' [NEW] 'Pearly White' is just about as creamy as Japanese Painted Fern can get. Fronds with light green edges and a white center give an ivory green appearance that blends well with other perennials without being too white or too much of a contrast. H 12-18".

DRYOPTERIS (Male or Wood Fern) There are many species of Dryopteris, in a variety of sizes and shapes. This is a species of colorful ferns that provide hints and flashes of many colors.

affinis 'Cristata' (Golden Male Fern) 'The King'. Upright fronds of shiny dark green leaves with branching tips. Use as a specimen plant or background fern. Semi-evergreen. 2-3', Zone 4-8

erythrosora 'Brilliance' (Autumn Fern) Distinguished by its bronze foliage. Young fronds change from coppery pink to deep, glossy green when mature. 18-24". Zone 5-8

MATTEUCCIA struthiopteris 'Jumbo' (Ostrich Fern) A vigorous spreader that does not form a mat but rather sends out 'pioneers' 12" from the mother plant. One of the most classic ferns that has a stately grace to its large arching fronds. 3-6', Zone 2-8

POLYSTICHUM Evergreen ferns native to North America. Zone 4-8.

acrostichoides (Christmas Fern) An asymmetrical fern with fine texture and a dense crown that will sprout fiddleheads in the spring. An excellent host for butterfly larvae. Easy to grow, so can be used in many settings and soils. 2-3'.

polyblepharum (Tassel Fern) Particularly beautiful when the new fronds emerge stiffly, then drop backwards to form a tassel. Evergreen, frosted underside. H 2-3'

THELYPTERIS decursive-pinnata (Beech Fern) This fern has 18-24" narrow, erect tapering fronds that are a nice bright green, all season long, only going down after a hard freeze. Zone 4-10

GAILLARDIA (Blanket Flower) A genus of drought-tolerant annual and perennial plants from the sunflower family, native to North and South America. The common name refers to the inflorescence's resemblance to brightly patterned blankets made by Native Americans. Prefers full sun and well-drained soil. Drought tolerant. Late June to August.

aristata 'Mesa Peach' Well branched plants produce warm, sunny colors of intense peach tones surrounded by radiating yellow tips. 3" prolific flowers produced all summer. These plants are extremely drought tolerant. Will attract butterflies! 16", Zone 2-10

grandiflora The plants in this group under "Gaillardia x grandiflora" are the results of crosses and reselection from G. aristata x G. pulchella. Both species are native to central and western USA. Clump forming and drought resistant plants. Zone 4-9

'Arizona Red Shades' This sister to 'Arizona Sun' produces masses of large, crimson red flowers over a very long period. About 20% have slight yellow tips. 10-12"

'Arizona Sun' Abundance of 4 inch diameter bright yellow and red flowers. Dwarf uniform habit. June-August. All American Selections winner. 1'

GALIUM odoratum (Sweet Woodruff) Beautiful fanned foliage, scented of fresh hay, makes an excellent ground cover in shady spots. Clusters of tiny white flowers. Moist, well-drained soil sweetened with lime. May-June, 6", Zone 3-9

Perennials

GAULTHERIA procumbens 'Winterberry' (creeping wintergreen) An ideal ground cover plant for acid soils. It produces a dense mat of glossy dark green leaves that brighten with a reddish hue in fall and pale pink flowers in June followed by red berries. Foliage retains color all year. Semi-moist soil. Part shade. Zone 3-8.

GENTIANA Gentians are some of our favorite plants because of their intense blue flowers! They prefer average to moist soil, take care to water in times of drought.

cruciata 'Blue Cross' Clusters of 4 petaled intense blue-violet flowers open and bloom at the nodes where spoon-shaped leaves meet at angles to form a cross, thus the name. 10", Mid-summer/fall, Zone 3-8

septemfida var. lagodechiana (Summer gentian) This variety is one of the easiest Gentianas to succeed with. Clusters of intense blue flowers over mounded foliage. 8", June to August, Part-shade to shade, Zone 2-7

GERANIUM (Cranesbill) With lovely flowers and delicately cut foliage, perennial geraniums make excellent border plants. Varied in heights, some can be incorporated into rock gardens. Cut back taller varieties after first bloom to encourage rebloom. All provide nectar for butterflies. Full sun to partial shade and moist, well-drained soil. Most will tolerate a variety of conditions.

cantabrigiense 'Biokova' This plant exhibits masses of pink-centered white flowers from late spring to mid-summer. Aromatic foliage turns red in the fall. Sun to shade. 8-12" tall, Zone 4-8

cinereum Alpine species making compact mound of small, delicately-fluted, grey-green leaves; delicate cup-shaped flowers held on trailing stems. Summer. H 4-6", Zone 5-8

'Ballerina' Purplish-pink blooms with pronounced dark centers.

himalayense This species makes a great groundcover; can take full shade and blooms sporadically throughout the summer. Zone 5-9

'Derrick Cook' Very large white, saucer shaped flowers are delicately veined with purple eyelashes. These sit above a mound of deeply divided bright green leaves. H 6-12", Hardy.

'Plenum' This cultivar produces fully double, purple-violet blooms. Summer. Nice in combination with silver foliaged plants. 12"

macrorrhizum (Bigfoot Geranium) This species of Geranium is very fragrant. Both flowers and foliage have an apple scent. Clusters of 5 petaled flowers late in the spring thru mid-summer. Foliage displays red and bronze tints in the fall. Zone 4-8

'Bevans Variety' Deep magenta flowers (to 1" diameter) with dark red sepals appear in terminal clusters above the foliage from mid to late spring. A sporadic rebloom may occur in summer. H 3/4-1'

'Ingwersens Variety' A rugged landscape geranium which tolerates wide range of soil condition, including dry shade. It exhibits light pink flowers with darker sepals. A great ground cover species spreading by fleshy underground rhizomes. 12-18"

'Spessert' 'Spessart' bears mats of aromatic foliage from which delicate soft pink to white flowers appear throughout summer. The leaves turn a beautiful bronze before falling in autumn. H 12" x 15"

pratense A valuable filler for color in early-mid summer. This species has a good show of large cup-shaped flowers over a bushy mound of deeply cut green leaves. Cut back hard to rejuvenate. Reseeds freely. Naturalizes very well in a less than formal garden. Zone 4-9

'Dark Reiter' This attractive dark-leaved selection with bright lilac-blue blossoms throughout the summer. 8-10"

Perennials

'Delft Blue' Featuring a soft, sprawling white flower with a variety of spectacular, blue-violet splashes decorating the five rounded petals. This new variety produces more flowers in a more compact habit. H 20"

'Double Jewel' Compact, upright, double white, star-shaped flowers with a contrasting splash of pinkish-purple in the center. May-September. 10-15"

sanguineum Heavy blooming. Delicately cut foliage forms a dense mound and turns to shades of orange, rust, and brilliant red in autumn. Very adaptable. Zone 4-9

'Album' Loose habit. White flowers. May-June. 10-18"

'Elke' Fluorescent pink flowers have bright white edges and centers. Blooms all summer with the heaviest flush in early summer. Finely cut foliage forms attractive mounds, turning red in fall. 6-8"

species Magenta flowers. May-June and intermittently thereafter. 8-12"

sylvaticum 'Brookside' Vigorous clumps of finely cut foliage. Purple-blue flowers with white centers. Summer, H 20". Zone 3-8

wallichianum

'Blue Sunrise' Compact variety with silver-blue flowers. Young foliage is orange and then yellow before turning green. Very long blooming - until frost. H 14-16", Zone 5-9.

'Rise and Shine' Blooms for months with masses of rich blue flowers with a white eye surrounded by a pink halo. Flowers lighten towards pink with age. If you love 'Rozanne', you'll love 'Rise and Shine'. H 10-12", Zone 4-8.

x. **'Azure Rush'** Large, 2.5", light blue flowers bloom from May until frost. Vigorous growing, compact with a self branching habit. Fragrant foliage. H 20", Zone 4-8.

x. **'Johnsons Blue'** Violet blue flowers form a full mound. June-July. H 12-18", Zone 3-8

x. **'Perfect Storm'** A profusion of small, magenta-pink flowers with a black center and black veins cover these low, spreading plants from spring to midsummer. H 12", Zone 5-8

x. **'Rozanne'** An introduction from Blooms of Bressingham whose large, violet-blue flowers appear freely from June to October. Foliage is a deep green slightly marbled with chartreuse. H 2-3' spread 18-20", Zone 5-7

GEUM (Avens) Rosettes of handsome, hairy foliage bear colorful saucer shaped flowers on long stems. Best shaded from the midday sun. Cut back hard for a rebloom. Full sun to part shade and moist, well-drained soil. Zone 5-8

chiloense 'Blazing Sunset' Tall flower spikes grow from mounds of velvety foliage. Fully double scarlet-red flowers. Late May-June. 16-24"

x. **'Flames Of Passion'** This Geum has double scarlet flowers on wiry black stems in May. Compact habit. 16-20"

x. **'Mai Tai'** A compact Geum with beautiful, ruffled apricot-orange blooms emerging from contrasting burgundy buds. Long bloom time, June-September. H 18"

x. **'Totally Tangerine'** Tall, strong stems carry loads of bright apricot to tangerine orange flowers. Early Summer. 30"

GRASSES Ornamental Grasses have become increasingly popular in gardens. They are grown for their showy foliage and are generally very low maintenance.

CALAMAGROSTIS Stoloniferous plants that thrive in damp, fertile, even heavy soils. Zone 5-9.

acutiflora 'Karl Foerster' (Feather Reed Grass) Erect tufts of lax foliage. Loose pinkish inflorescences in July, persisting into fall turning to golden wheat. Full sun and moist, rich soil. An interesting addition to fresh and dried floral arrangements. H 2-4'.

brachytricha (Korean Feather Reed Grass) Tawny pink blooms, which fade to silver.

Perennials

The plumes remain open and feathery even when dry. One of the new flowering grasses that are happy in shade. Upright arching form in sun, slightly more lax in shade. Will tolerate a wide range of soils. Sept-Nov. 4-5'

CAREX Not true grasses, sedges generally have inconspicuous flowers, but their foliage provides great color for your garden. Organic rich, moist soil. Zone 5-9

elata 'Bowles Golden' An eye-catching sedge with bright golden-yellow leaves with thin green margins. Taller than most other sedges. An excellent choice as a highlight plant for shade or a water garden. 2-3'

morrowii 'Ice Dance' A fantastic ground cover for a shady spot. Compact, slow spreading clump of shiny green and white variegated foliage, drought tolerant. Part to full shade. 12"

FESTUCA glauca (Blue Fescue) A low-growing, semi-evergreen, clump-forming ornamental grass noted for its glaucous, finely-textured, blue-gray foliage. Foliage forms a dome-shaped, porcupine-like tuft of erect to arching, needle-like blades. Low water needs.

'Blue Whiskers' Intense, powder blue foliage. Color stays bright throughout the season without browning. H 9-12", Zone 4-9.

'Elijah Blue' Outstanding, icy blue coloration to this clumping ornamental grass holds up even through the heat of summer. Buff colored flowers create eye-catching contrast. Mounds, H 8-12", Zone 4-11.

HAKONECHLOA macra 'Aureola' Bright yellow leaves with narrow green stripes, beautiful cascading form perfect for softening the edge of pathways or as an accent in combination containers. One of the few grasses that will thrive in shady sites. H 1-2', Zone 5-9

HELICTOTRICHON sempervirens (Blue Oat Grass) Bright steel blue leaves that tend to widen as they mature. Great addition to rock gardens, Full sun, H 18-24". Zone 4-8

MISCANTHUS sinensis Substantial grasses that need room to grow. They enjoy full sun and a wide range of soils. Plumes add winter interest to your garden. Zone 5-9

'Adagio' Delicately textured, narrow green blades with a perfect arching habit. Plumes are tinted with red. 2-3' foliage, 4-5' Inflorescent.

'Autumn Anthem' Selected for its heavy flower production and perfect habit. Dense clump of dark green leaves with a narrow, white midrib. Feathery, creamy blooms. H 5-5.5'.

'Dixieland' Dwarf form of 'Variegatus', with arching green and white striped blades. Lovely showy pink plumes appear in late summer. Good container choice. 4-5'

'Gracillimus' (Maiden Grass) One of the oldest and perhaps the best known Miscanthus cultivar, valued for its fine textured foliage and gracefully rounded overall form. In late September it sends up airy panicles of copper-red flower heads and a little later the foliage turns a lovely golden yellow. 4-5'

'Huron Sunrise' The most profusely blooming Miscanthus. The green leaves have a narrow white midrib and form an upright vase-like clump. In late summer, large coppery seed heads turn into fluffy creamy tan panicles. In fall, the foliage turns colorful shades of red, orange, burgundy and gold. 5-6'

'Little Zebra' Narrow blades have strong horizontal gold banding. In August, plumes appear in a lovely reddish-purple color. 3-4'

'Morning Light' Narrow leaves have a band of clear white on the leaf margins. A late bloomer. Flower plumes emerge bronze-red, then turn cream as they age. Has a beautiful refined look. 4-5'

'Oktoberfest' Improved 'Graziella", better fall color and early blooming. Forms a narrow

Perennials

upright tower of wide leaves that develop purple and red highlights in late summer. Flowers turn burgundy to creamy tan as they age. 6-7'

'Strictus' (Porcupine Grass) Best known for the horizontal yellow bands on its foliage, erect growth habit and upright foliage. Reddish fan-shaped seed heads emerge in September and turn reddish wheat in the fall. Great specimen plant. 6'

PANICUM virgatum (Switch Grass) Switch grasses are a highly versatile and adaptable plant. A hardy, deep rooted rhizomatous grass that does well in full sun and dry or moist conditions. Zones 4-9

'Cheyenne Sky' (Red Switch Grass) Upright clumps of stiff, metallic blue foliage produces beautiful airy panicles in the late summer. This is a petite variety forming a tight vase-shaped clump of blue-green foliage turning wine-red in early summer. 3'

'Northwind' Bluish-green foliage forms a compact, narrow, erect, tall clump of foliage which is topped in late summer by finely-textured, yellow flower panicles. A real standout in the garden. 6'

PENNISSETUM alopecuroides (Fountain Grass) These grasses are characterized by a fountain of bottle brush flower spikes flowing up and out of neat, rounded cascading mounds of foliage. They prefer full sun and well drained soil. Zone 5-9

'Burgundy Bunny' (Mini Fountain Grass) Fiery red highlights! The snazzy, red accents appear in June and by September 50% of the foliage is eye-catching red. Compact habit. H 12-16"x16".

'Desert Plains' Large mound of finely textured, green leaves that develop red tips beginning in mid-summer. 5" long bottlebrush flower spikes appear in fall. Excellent for cutting, fresh or dried.. 4' x 5'

'Hameln' A medium-tall form of this species. Narrow, graceful arching leaves. Rose-colored foxtail seed heads. August-Fall, 24"

SCHIZACHYRIUM scoparium 'Blue Paradise' A cinch to grow, striking silvery blue stems maintain their upright columnar habit all season. In early fall, tiny seed heads emerge on the top half of the stems as this lovely grass develops into a deep wine-purple color. Tolerates heat and humidity well. H 36-42" , Zone 3-9

GYPSOPHILA (Babys Breath) A popular cut flower, with masses of tiny, delicate flowers and fine airy foliage creating a billowy mound. Prefers full sun and well-drained, alkaline soil. Zone 3-8

paniculata festival star series This extremely long blooming cultivar forms a short, neatly compact mound of grey-green foliage that is covered in dense sprays of flowers. Does not go dormant in the summer. Offered in 'White', 'Pink Lady', soft pink flowers. 12-18", Zone 3-9

repens Forms a low-growing mat of grassy foliage. Available in 'White', white flowers or 'Rose', pink flowers. June-July, 6"

x. 'Summer Sparkles' New variety forms a refined, compact, dense, uniform mound that is completely covered in bright white, semi-double, slightly fragrant flowers. May-July. 23-27"

HELENIUM autumnale (Sneezeweed) Tall plants with long, linear leaves. Native wildflowers loved by butterflies. Late summer-fall bloomers which really brighten the fall garden. Needs staking. Full sun and moist soil. Tolerates wet soil. Zone 3-9

'Mardi Gras' Multi-colored yellow petals splashed with orange and red. Early blooming from late June-August. Stunning! H 2-3'

mariachi series This series hails plants that remain compact. Excellent branching for continuous bloom June - September. Terrific for cutting. H 18-20". Zone 3-9

'Bandera' Red flowers accented by golden halos will brighten any garden spot.

Perennials

'Fuego' Bright red & yellow bi-color flowers.

'Ranchera' Red flowers accented by golden halos will brighten any garden spot.

HELIOPSIS helianthoides 'Tuscan Sun' (False Sunflower) Prolific bloomer, with many bright golden yellow, daisy-like flowers with an orange-gold button center. A shorter variety, it is long blooming and great for mid summer to fall color. H 24", Zone 5-8. Tolerates poor, dry soil.

HELLEBORUS (Lenten Rose) Woodland plants which produce clumps of glossy leaves, and thick, leafy clusters of cup shaped flowers. Earliest perennial to bloom, often blooming during snow-melt. Prefers part shade and moist, organic, neutral-alkaline soil. Zone 4-9

honeymoon series A new series with single flowers and brilliant colors. H 18-24"

'New York Night' Shades of deep purple-black, jet black and purple grey all punctuated with frilly, creamy glowing stamens.

'Paris in Pink' Single light pink to medium pink flowers with a small green center.

'Rio Carnival' A vigorous grower that produces numerous single yellow flowers with heavy burgundy speckling in early spring.

'Spanish Flare' 'Spanish Flare' bears 3", single light yellow flowers with maroon red flares. A novel color pattern for Lenten Rose.

wedding party series This series is bred for vigor, showy floral displays with large numbers of double blossoms, and rich flower color. H 18-24"

'Blushing Bridesmaid' This plant has stunning bicolored, double white blooms with wine pink veining and picotee edging.

'Confetti Cake' 'Confetti Cake' has 2½-3" double white flowers with burgundy speckling concentrated toward the center of the petals.

'Dark and Handsome' Vigorous grower that produces numerous double near-black to black-purple flowers in early spring.

'Maid of Honor' Large number of vibrant 2.5-3" dark-pink, double flowers.

'True Love' True love in shades of rich wine, outlined with darker margins has glowing golden centers.

'Wedding Bells' Clear-white, double-flowered hellebore.

HEMEROCALLIS (Daylily) Very hardy garden flower with long, grass-like foliage and trumpet shaped flowers, reminiscent of a lily. Blooms last just one day but are produced abundantly during a long blooming season. Early bloomers (E) begin in late June, mid-season bloomers (M) in mid-July, and late bloomers (L) in August. Tetraploid varieties (TET) have more chromosomes, are stronger and offer an array of color and sizes. Re-bloomers(RB) and ever-bloomers(EB) flowers all summer long. Zone 3-9

'Apricot Sparkles' Perhaps one of the most prolific daylilies of all time! 3" apricot colored flowers with glistening sparkles. Begins flowering in late June and continues reblooming until a hard frost. E, RB 14-18"

'Desert Flame' The flaming red-orange flowers are a standout in the garden. This is a taller daylily with nice foliage and sturdy, well-branched and budded scapes. M-RE-D-TET. H 36", spread 18-24"

'Earlybird Cardinal' This is the first red, very early blooming, daylily. Starts in mid-June and blooms throughout the summer. Watermelon red flowers 4" wide, pie crust edge and chartreuse throat. 21"

'Fragrant Returns' Similar to Happy Returns with a strong sweet fragrance, early, 4" very fragrant light lemon flowers, lightly ruffled, very extended bloom for evening show, destined to be one of the best. H 18"

Perennials

'**Hyperion**' Canary-yellow flowers are carried in profusion above vigorous clumps of grasslike foliage. Although 'Hyperion' has been around since 1925, it remains unsurpassed in its color class. Fragrant flowers, July- August. H 40"

'**Passionate Returns**' Profuse blooming, 4" rosy-red, ruffled flowers just above 17" high foliage. It forms tons of buds on multiple branched scapes, blooming continuously from mid-summer to fall.

'**Primal Scream**' This spectacular daylily screams for attention when in bloom! Enormous, 7.5-8.5" glimmering, tangerine-orange blossoms have narrow, twisted, ruffled petals. Blooms early July. H 34"

'**Purple D-oro**' Red-purple 2 3/4" flowers, with yellow throats subtly veined with purple. With all the ever blooming power of Stella. EB 16"

'**Red Hot Returns**' First red, continuous blooming daylily. 5" cherry red blossoms have a bright yellow halo, apple green throat and ruffled petals. Blooms all summer and into fall. 24-28"

'**Stella D-Oro**' Ever-blooming with gold flowers. Award Winner, EB 18-24"

'**Stephanie Returns**' Unique colored: bicolor blend of peachy pink, ruffled petals with a thin purple eye, a dazzling yellow throat, and deep rose-purple sepals. Nearly continuous bloom. RE. 14-16"

'**Sunday Gloves**' Delicious frosting-white blossoms with pale lemon yellow eye. Fragrant. 5 1/4 " flowers stay open 16 hours. E-M, RB. 16"

'**When My Sweetheart Returns**' Soft peachy yellow blossoms with a large, rose pink eye, lemon throat, and romantically ruffled petals are produced on short scapes. A truly everblooming daylily!!! 14-16", mid-season

HEPATICA nobilis (Liverleaf) Sweet, spring blooming woodlander with deep blue flowers that emerge early in the spring, followed by tri-lobed leaves. Most will be blue, but some will be the rarer pink form. Zone 4-8. 4-6".

HEUCHERA (Coral Bells) Loose clusters of bell-shaped flowers are borne on wiry stems over low mounds of striking, rounded foliage. Coral Bells are useful in cottage gardens, cut flower gardens, and butterfly gardens. Crosses are the *Villosa* Hybrids, which are tolerant to heat and humidity. Full sun to part shade and moist, well-drained, organic rich soil. Early summer. Zone 4-8

x. '**Autumn Leaves**' Mid-sized leaves of red in the spring, taupe in summer, and ruby red in fall, put on a show in any season. H 16-18", Part Shade

x. '**Berry Timeless**' Unbelievable flower production! Light pink flowers age to deep red, produced on tight wands on 18-20" scapes. Plant blooms and reblooms continuously from early summer to frost. Foliage is lightly silvered, mint green in a compact, dense clump. H 18-20". Part Shade, Full Shade, Full Sun.

x. '**Black Taffeta**' Larger than 'Obsidian' with dark glossy black foliage and ruffled edges. White flowers in late spring offer a nice contrast. H 12-15", Part Shade, Full Sun.

x. '**Cajun Fire**' This plant changes colors with the seasons: red in spring, black in summer, and maroon in fall. They are always attractive, having clean foliage in rounded mounds. White flowers on dark stems hover just above the foliage. Full Sun to part shade. H 9" X 14" W.

x. '**Fire Chief**' Mid-sized leaves of glowing wine red make a nice medium sized mound, topped with bicolor pink and white blooms on dark red stems. Blooms continuously spring, summer and fall. H 9" x 18" W, Part sun to shade.

x. '**Galaxy**' Large, leathery foliage, heavily variegated with spots of color on a very dark

Perennials

background. Leaves emerge bright red than turn darker as they age. The variegation, however, gets lighter colored and more noticeable as the season progresses. H 9-14", Part Shade, Full Sun

x. 'Grape Soda' Grape Soda has rose-pink spring leaves. During the warmer months the leaves go from light purple to deep silvery purple. A long lasting pinkish, purple flower make this a dual purpose plant. H 8-10". Part Shade, Full Shade, Full Sun.

x. 'Green Spice' A top-seller around the world and great in the shade! Its dark gray-edged silver leaves with red venation are smoother and brighter, bigger, and better. Exceptional fall color, which we label as "pumpkin, neon orange." H 9"/28". Part Shade, Full Shade.

x. 'Lime Marmalade' A tasty lime foliage sport of 'Marmalade'. Super vigorous and full of frills with ruffled lime colored leaves. H 10" and 24" spread. Part Shade, Full Shade.

x. 'Marmalade' 'Marmalade' stands out with its rich, shiny, maple-shaped foliage ranging in color from amber to deep sienna. Check out its hot pink undersides! Part Shade, Full Sun. H 10", spread 18".

x. 'Midnight Ruffles' Large, very shiny, red-brown to almost black leaves, showing purple backs and very small flowers. H 13". Part Shade, Full Shade, Full Sun.

x. 'Northern Exposure - Red' Dark red to burgundy round leaves on a dense, medium size mound. This showy garden plant was bred from hardy species and looks good longer in the season than other Heuchera. Great rust resistance and longevity. H 14" x 20" W. Full shade, part shade, full sun.

x. 'Obsidian' Superb smooth chocolate and wine foliage with contrasting white flowers in June-July. H 1', Part Shade, Full Sun.

x. 'Paris' 'Paris' is the best of the reblooming heucheras. This free flowering cultivar produces an abundance of large, deep rose-pink flowers on 14" scapes, beginning late spring. A single stem can bloom for up to 2 months. Foliage is green with bright silver overlays. H 10-18". Part Shade.

x. 'Peach Flambe' Bright peach colored leaves that literally glow in spring, summer and fall, turning to rosy-plum in the winter. The color progression provides multi-seasonal interest as a great color companion to spring yellows, summer blues and fall oranges. H 1', Part Shade, Full Shade.

x. 'Rave On' One of the heaviest spring bloomers, producing masses of pink flowers, on 20" stems, above highly silvered foliage with green veins and red undersides. Forms tidy mounds. H 8", Part Shade, Full Sun.

x. 'Red Lightning' Electrifying dark red veins spark over huge gold leaves and white flowers. Color holds well throughout the season. H 11"/18". Part Shade, Full Shade.

x. 'Southern Comfort' Huge cinnamon-peach leaves! Creamy white flowers erupt in late summer. Foliage color changes from cinnamon peach to burnished copper to amber. Full sun to part shade. H 14-21".

x. 'Topaz Jazz' New leaves open peach-amber, change to amber, then to tan, and finally to yellow amber. Lovely at every season. Short maroon flower spikes with white flowers. H 9" X 12" W. Part shade to full shade.

HEUCHERELLA A group of hybrids between Heuchera and Tiarella, combining the characteristics of both parents making them pleasing additions to the front border. They tolerate sun, but prefers afternoon shade. Darker varieties perform well in full sun. Moist, fertile soil. Zone 4-9

x. 'Brass Lantern' Maple-shaped leaves ranging in color from golden orange to red. More shade will bring out more contrast in the foliage. White flowers. H 20", spread 24". Part Shade, Full Sun.

Perennials

- x. 'Dayglow Pink'** Fantastic flower color! Numerous dazzling pink flowers 'glow' in the garden. Leaves are cut with a chocolate inlay. Excellent for dry shade conditions. H 7", flower 16", spread 14". Part Shade, Full Sun.
- x. 'Onyx'** True black, glossy, deeply cut leaves. Loves heat and humidity, shy to bloom – always stays neat and clean. H 10" x 16" W. Part to full shade, full sun.
- x. 'Plum Cascade'** The first purple Heucherella, and it's trailing! 'Plum Cascade' has lobed, purple silver leaves. Small, light pink flowers appear all summer on short stems. Very elegant with EXCELLENT vigor. H 9"/32"/12". Part Shade, Full Shade.
- x. 'Redstone Falls' (Trailing)** This is the first trailing Heucherella. Mounding and sending out trailing stems and spreading low. Warm autumnal tones interweave throughout the foliage. The broadly lobed leaves with dark veins change color with the seasons. Sun or shade. H 10-12" x 36" W.
- x. 'Solar Eclipse'** Leaves of red brown bordered in lime green combined with such a beautiful habit and broadly scalloped leaf edges. Forms a vigorous mound of dense crowns. H 10-16". Part Shade, Full Shade, Full Sun.
- x. 'Sunrise Falls'** Trailing with large, yellow, maple-shaped leaves and red veins. Fall leaves have dramatic red tints. The stems will trail 2 feet in a container making a wonderful hanging basket or a super groundcover. H 7" x 30" W. Part to full shade, full sun.

HIBISCUS Very showy, shrubby plants bearing huge blooms. We are offering some compact forms which can be used in gardens. Tropical plants which love the heat, and don't awaken from their winter slumbers until late spring. Full sun and fertile, well-drained soil. Mid to late summer. Zone 5-9.

'Mars Madness' Huge 6-8", magenta flowers and dark olive green leaves have copper highlights, with the newest leaves emerging coppery purple. A later blooming Hibiscus and will extend the color of your late summer/early fall garden.

'Midnight Marvel' Huge 8 to 9" flowers of pure red glow against the richest purple foliage in the genus. Maple shaped leaves reach nearly a foot long. 4' tall and wide.

'Starry Starry Night' This variety produces a mound of very dark foliage, which serves as a dramatic backdrop for its eye-catching blooms. The soft pink flowers are quite large, up to 8 in. across, and have contrasting red eyes. H 3.5" to 4'.

summerific series 'Berry Awesome' 7 to 8" lavender pink flowers with a red eye and contrasting deep green foliage. Covered with flowers from late summer into fall. 4'

HOSTA (Plantain Lily) Grown for its lovely and varied mound-forming foliage. Most bloom in June or July. Exceptions are noted. Heights are given for foliage rather than blooms. Hostas benefit from morning sun to encourage flowering and proper leaf color. Variegated varieties and yellow or gold-leaved hostas need some sun to fully develop their color. Green and blue hostas lose some of their intensity with too much sun. Hosta grows best in average to fertile soil, but will survive in poor soils. Zone 3-9

'Abiqua Drinking Gourd' Birds have been known to drink from 3" deep cups formed by the deep blue, heavily puckered leaves. White bell-shaped flowers in mid-summer. 16" x 40"

'Afterglow' Large, green, heart shaped leaves with incredibly arresting, wide, yellow margins. Forms an upright mound with pale lavender flowers. 24" x 36"

'August Moon' Large, heart-shaped leaves are bright gold to chartreuse depending on the amount of sun exposure. They are corrugated, wavy, and of good substance making them slug resistant. Tolerates full sun which will intensify the gold color of the leaves. H 20" x 24" W.

'Autumn Frost' The leaves emerge frosty blue with a bright yellow margin that lightens to creamy white during the summer. It forms a medium sized mound topped with light lavender flowers in mid to late summer. H 12" x 12-16" W.

Perennials

'Blue Angel' Huge blue leaves with a heavy texture and many near white hyacinth-like flowers in midsummer. Probably the largest blue hosta known. 3'h x 4'w

'Blue Ivory' A new blue Hosta with terrific sun tolerance and a compact, elegant form. The leaves, widely edged in creamy yellow, really accentuate the rich aquamarine tones at the center. Lavender blooms. 16"hx30"w

'Blue Mouse Ears' Adorable small hosta with thick, heart-shaped blue-green to grey-green leaves. Lavender flowers. 8".

'Brother Stefan' A large sized hosta, thick, heavily corrugated and puckered leaves are green with a brilliant gold center. In spring, the margin may have a waxy coating making it appear more blue, and the center may be more chartreuse. Forms a wide, tall clump, making it the perfect focal point for a shade garden. 2017 Hosta of the Year. H 22" x 36" W.

'Cool as a Cucumber' This gorgeous large hosta forms a cascading clump of green and white variegated foliage. Its foliage is notably upright in youth, but quickly develops into a gracefully arching mound. The long, tapered, pointed leaves have bright green margins which jet towards the clear white center. H 28" x 40" W.

'Curly Fries' Leaves are long and lance-shaped, very wavy, chartreuse green in spring changing to a unique shade of yellow in the summer. Lavender flowers bloom in summer. H 6" x 16". Leaf Size: 8" x 2".

'Dancing Queen' An exceptionally large, bright yellow Hosta with scalloped leaves and pale lavender flowers in August. 18"h x 28" w.

'Earth Angel' Superb new sport of 'Blue Angel', with variegated blue-green leaves edged in wide, creamy-white margins. Pale lavender flowers in early summer. H 30".

'Fantabulous' 22" high leaves are dark green with wide irregular margins of ivory white. Foliage is thick, satiny and heart shaped with long points. Purple striped lavender flowers. Forms a showy clump, that appears to be flowing from the center because of its rippled margins. H 22" x 40" W.

'Fragrant Blue' A superb medium sized hosta, with a 12" wide clump of smooth textured, powdery, chalky blue, heart-shaped leaves. A rapid grower that continues sending up new leaves throughout the season. Slightly fragrant white blooms. Slug resistant. H 20"

'Fried Bananas' This sport of H. 'Guacamole' is one of the fastest-growing gold-leaved hostas, and certainly the most fragrant. The 30" wide clumps are adorned with shiny chartreuse golden foliage (brightest in sun). In August, the clumps are topped with 3' tall scapes of large and very fragrant, near-white flowers. H 24" x 48" W.

'Halcyon' Mid-sized blue hosta with frosty blue-green and pointed leaves. Heavy substance foliage and is slug resistant. Pale blue-violet flowers. 18-28" H x 30" W.

'Hudson Bay' Wide, bright blue margins and apple green jetting contrast nicely with the creamy white center all season. Heavy substance leaves, white flowers. 24" H x 26" W

'Humpback Whale' Forms an immense dome-shaped mound of blue-green heart-shaped leaves that have an unusual hump in the mid-leaf which points the tip of the leaf downward. White bell-shaped flowers. 36"N x 48" W.

'Island Breeze' The leaves have a bright yellow center in spring, turning chartreuse in summer, with a darker edge. The petioles are bright red with some of the red color coming up into the base of each leaf. Lavender flowers on red scapes. H: 24" x 14" Leaf Size: 6.5" x 4.5"

'Liberty' This hosta has buttery-yellow leaves with rich green hearts, making for a unique and lovely look! Lavender flowers. 24"h x 36" w. Hosta of the year for 2012!!!

'Loyalist' One of the best white centered hostas. Heavily substance leaves have deep green margins and nearly pure white centers that will not melt out. Lavender flowers. Large size H 30-36", 16" wide.

Perennials

'Maui Buttercups' An outstanding yellow hosta with 5" round, puckered leaves that are deeply cupped and corrugated. Flared violet flowers. Good slug resistance. 10"h x 14"w

'Mighty Mouse' Mouse ear-shaped leaves in bluish green with a creamy yellow edge. Lavender flowers in early summer. 8"h x 12" w

'Mini Skirt' This petite hosta forms a miniature mound of very wavy, thick, blue-green leaves with creamy yellow margins in spring. In summer, the center turns more green and the edge lightens to creamy white. Pale lavender flowers. H 5" x 7" W.

'Munchkin Fire' This vigorous new yellow miniature hosta is the perfect size for troughs and the ever-popular fairy gardens. Short and narrow leaves hold their bright yellow color all season long. Lavender flowers appear above the petite habit in midsummer. H 5-7" x 20" W.

'Neptune' Unique blue hosta forms a cascading clump of narrow wedge-shaped leaves with heavily rippled edges. Arching lavender flowers in late summer. 24"h x 32"-39"W

'Patriot' Green with wide white margins, wonderful form. Lavender flowers. 15-18"h x 24-30"w

'Pauls Glory' Leaves are blue-green with a chartreuse center in spring. By summer they turn darker green and centers brighten to gold. Pale lavender flowers. 25" x 40"

'Prairie Sky' One of the bluest hostas available, retaining its showy color all season. Lightly cupped leaves of thick substance. Pale lavender flowers. 14"H x 24" W.

'Rainforest Sunrise' This premium hosta variety's leaves emerge light green, then quickly develop dark green margins and a radiant gold center as they mature. The thick leaves become lightly cupped and heavily puckered. 8" h x 18" w.

'Stained Glass' A sport of 'Guacamole' exhibiting same rapid growth rate but displays variegation earlier and maintains brilliant gold throughout the season. Prominent veins throughout the leaf gives it a "stained glass" effect. Fragrant flowers. Light shade to 3/4 sun, 15" h x 30" w

'Sum and Substance' Large, chartreuse, wavy leaves are extremely pest resistant. sun. Fragrant lavender flowers. Strong grower. 36"h x 48"

'Victory' Huge, variegated, very large dark green leaves have a wide creamy-yellow border and are held upright. Topped with lavender flowers. H 36" and more.

'Vulcan' This vigorous selection has creamy-white leaves with dark green margins. Golden-yellow streaks occur along the interior margins where the white and green overlap. Lavender flowers; mid-late summer; 22"h x 36" w.

'Whee' Extremely ruffled, cream colored margins extend from the tip of each green leaf all the way down the petiole to the crown. The leaves of this medium sized hosta are of excellent substance, making them slug resistant in the landscape. H 11-18" x 24" W. Light lavender flowers.

'Wishing Well' A SUN TOLERANT BLUE. This large hosta is prized for holding its beautiful blue color long into the season, even when planted in 2/3 day of sun. Its huge leaves emerge slowly, exhibiting a unique cupped, rippled, corrugated texture. H 23" x 38"

HYDRASTIS canadensis (Goldenseal) Golden seal is a native wildflower flourishing in rich woods. Features a single, large, palmately lobed, wrinkled, basal leaf (to 8" wide) and a two-leafed flower stalk topped with a solitary, greenish white flower. Flowers bloom in spring, and give way to attractive but inedible scarlet red berries. All parts of the plant are poisonous in large doses. H 10-15", Zone 3-8, part shade.

IBERIS sempervivium 'Snowsation' (Candytuft) A bright spot in the early Spring garden. Evergreen, mound-forming foliage bears clusters of the largest white flowers of any Iberis. Valuable as a ground cover in rock and wall gardens. Drought and salt tolerant, deer resistant,

Perennials

thrives in poor soil. Full sun. H 6-12", Zone 3-10.

IRIS A large genus of plants with long, blade-like foliage and showy flowers excellent for cutting. With a wide range of color, bloom times, and cultural requirements, there are Iris for every garden.

cristata (Dwarf Crested Iris) A spreading native wildflower, 3.5" flowers. They work well in naturalized or woodland gardens. Full to part shade. Humus rich, well-drained soil. Spring, Zone 5-8

'Powder Blue Giant' Large flowers are a powder blue with golden crests accented by deep blue. 6-10".

'Tennessee White' Vigorous spreader and prolific bloomer with white flowers with yellow crests. H 8-10".

ensata (Japanese Iris) Japanese Iris have huge, flouncy flowers that bloom in July, later than Bearded or Siberian Iris. Ideally suited to a pond edge, but do well in any moist, acidic, humus-rich soil. Sun to part shade. Zone 4-9

'Eileens Dream' Graceful large dark maroon double flowers that are dramatically splashed with yellow signals. H 32-36".

'Lion King' White flower petals with a ruffled grape-purple edge that dance in the breeze. Vigorous growing with large flowers. 3-4'.

'Momogasumi' Pastel pink flowers with a golden heart. Late blooming. 30-48"

'Variegata' A strikingly beautiful, deer-resistant iris with creamy white-and-green, vertically striped, broad foliage. In late spring, each clump is topped with attractive, pale lavender-blue flowers. H 24-36".

germanica (Bearded Iris) Bearded Iris are loved for their large showy flowers and 2" wide leaves that are tinged in blue. Most bloom early to mid June, some varieties have a late summer rebloom. Average to infertile soil. Zone 3-9

'Happenstance' This multiple award winner produces baby pink flowers with coral beards and lightly ruffled, laced petals. Well-branched stems ensure a multitude of these vibrant pink blooms. Mid-season. 37"

'Savannah Sunset' Intense orange flowers that bloom extensively. 36-48"

'Slovak Prince' Iris 'Slovak Prince' has an amazing combination of colors with its white standards that have a lavender blush and a fine gold rim, sitting above grape-purple falls with white veining. The slightly fragrant blooms grow 33" tall.

mini germanica These varieties produce Bearded iris but in miniature. Perfect for rock gardens, front of borders or in patio planters. Zone 3-9

'Eramosa Skies' Bright peachy pink with a large prominent fuchsia spot on the falls and bright coral beards. Blooms mid to late season. H 11"

'Jive' Rich golden apricot with a large raspberry burgundy spot and red beards. Bright and ruffled!

sibirica (Siberian Iris) Siberian Iris form elegant, upright blades of green foliage and an abundance of flowers in mid-late June, just after Bearded Iris and just before Japanese Iris. Each variety flowers for a couple of weeks. They are not fussy but prefer slightly acid to neutral soil, moist and humus rich. Full sun to part shade. Zone 3-9

'Butter and Sugar' White flowers above yellow falls. 28"

'Contrast In Styles' This showy selection of 3-5" flowers is named for its incredible contrasting color patterns and complex combinations of rich wine purple, blue, yellow and white. 28-34"

'Kita-No-Seiza' Brighten those problem spots with this graceful Siberian Iris. Butterflies are attracted to its blue-violet flowers, which are veined with white. 24-28"

Perennials

'Painted Women' Stunning reddish falls, yellow signals at the base. Lavender and soft blue standards. H 24-26".

'Swans in Flight' Beautiful variety with large white flowers and slender spiky leaves which add wonderful texture to the landscape. H 32".

'Welcome Return' 'Welcome Return' features repeat blooming flowers of violet blue with yellow blaze. Its blossoms first appear in late spring then again in summer. H 30-34".

'Yellow Tail' A beautiful semi-double Iris with white inner petals. Strong grower! Mid-Late bloom. H 28"

JEFFERSONIA (Twin Leaf) Jeffersonia is a somewhat uncommon spring woodland wildflower. It is usually found in limestone soils in rich damp woods. Clump forming. Full to dapple shade. H 10-12", Zone 3-8.

diphylla (Twin Leaf) White flowers in May followed by interesting pipe-shaped seed pods over large twin butterfly-wing-shaped dusty blue-green leaves. Forms exceptional clumps and is useful both as a specimen plant and planted en masse. Eastern U.S. native.

dubia (Asian Twin Leaf) Older plants can have up to fifty upward facing blue to lavender blue blooms that can be seen from hundreds of feet away. One of the earliest to bloom in the spring as the flowers appear before the foliage. Native to Japan, China and Korea.

KALIMERIS incisa 'Blue Star' Pale blue, daisy-like flowers cover deep green foliage on a compact, bushy plant. An abuse-tolerant plant that is an excellent performer and a vigorous grower. One of the few perennials that truly blooms all summer. Full sun to partial shade, average well-drained soil. H 18", Zone 5-9

KIRENGESHOMA (Yellow Waxbells) An elegant, shrub-like plant with erect, purple stems sporting large, maple-like leaves. Large, waxy, yellow flowers above the top of the foliage in late summer. Part to full shade. Moist, rich soil. Zone 4-8.

koreana Mounds of large toothed maple shaped leaves. Bell shaped soft yellow flowers in pendulous clusters atop upright 3-4' stems. Blooms late summer through fall. Perfect in woodland settings. Foliage 3' Flowers 4'

palmata Waxy bell-shaped flowers that nod from the uppermost leaf axils in September. H 3-4'.

KNAUTIA macedonica (Pincushion Plant) Multitudes of pincushion flowers are produced tirelessly all summer long. A cute little flower that politely self-sows. Prefers full sun to part shade and well drained soil. July-August. Zone 5-9

'Red Knight' Unique bloom shape and fire red blooms make this plant ablaze in the garden. A strong performer that blooms all season long. Strong stems hold flowers upright. 3-4'

'Thunder and Lightning' A unique color combination! Light green leaves are shaped like lightning bolts with creamy yellow to white margins. Deep reddish-purple, fully double flowers. summer. 12-18"

KNIPHOFIA hirsata (Torch Lily-Red Hot Poker Plant) Large spikes of tubular flowers blaze above grassy foliage. Buds are richly colored and open from the bottom of the flower spike. Full sun and fertile, well-drained soil. Intolerant of wet heavy soils. Bloom Late July-August. Zone 5(6)-9

'Fire Dance' Dwarf Torch Lily! Coral and yellow flower spikes are produced atop a low-growing, thick clump of narrow, arching, blue-green foliage. 20"

poco series A short series - Use in front of your border. Massive flower count, blooms summer to frost with large inflorescences and short, grassy leaves. Bee and hummingbird

Perennials

magnets. Offered in Orange and Red. H 14", Zone 5(6)-9.

LAMIUM maculatum (Dead Nettles) Colorful foliage makes this vigorous spreader an ideal ground cover for brightening up a shady spot. Whorls of two-lipped flowers in spring. Part to full shade. Moist, well-drained soil. May-June. Zone 3-8

'**Orchid Frost**' Trailing stems with silver centers and scalloped, blue green margins. Orchid-pink flowers, showy and heavy bloomer. 4-6"

'**White Nancy**' Silver leaves edged in green. Pure white flowers. 6-12"

LAVATERA 'Barnsley Baby' (Tree Mallow) Racemes of silky, saucer-shaped, soft pink blooms resembling hollyhocks are prolifically produced on a compact bush with maple-shaped leaves from June- September. Full Sun, H 30". Zone 6-9

LAVENDER See Herbs.

LIATRIS spicata 'Kobold' (Gayfeather Blazing Star) Tall spikes of striking, stately lavender-blue violet flowers, rise above neat tufts of narrow foliage. An excellent cut flower as well as a nectar source for butterflies. Prefer full sun to partial shade and well-drained soil. July, 24-30", shorter variety, Zone 3-9

LIGULARIA A species known for large showy leaves and impressive bright yellow or orange flowers. Substantial plants that are best grown in a bog garden or along a stream or pond. In the heat of day Ligularias will wilt in high light or when stressed for water. Part shade and deep, rich, moist soil. July-August, Zone 3-8.

dentata 'Orthello' 'Orthello' is grown as much for its dark colored foliage as for its yellow flowers. New leaves emerge purplish-red, but mature to brownish-green on top and purplish beneath. Blooms July to August. H 2-3'.

stenocephala 'The Rocket' Stately with handsome clumps of large, robust leaves, and tall spikes of bright yellow flowers. H 4-6'.

LILIUM (Oriental Lily) Oriental Lilies are large, exotic, star-shaped blooms that are deliciously fragrant, superb for cutting. Mid-Season. Full Sun.

canadensis (Canada Lily) *Lilium canadense* is a spring blooming native lily, found all along the eastern side of the USA. At home in bright shade or dappled sun woodlands. The 4", nodding flowers, ranging in color from yellow to orange-red with dark spots, are at the top of a stem that also bears whorled leaves. H 2-4', Zone 3-6

orientale Oriental Lilies are large, exotic, star-shaped blooms that are deliciously fragrant, superb for cutting. Mid-Season. Full Sun. H 32-44", Zone 4-8.

'**Magic Star**' A soft pink with deep pink stripe down each ruffled petal make this a showstopper in the garden! A double flower that can be 3-6" across.

'**My Wedding**' This double oriental lily is crisp white with a hint of pink around the edges has no stamen is also ideal as a cut flower especially for Bridal Bouquets. My Wedding has a beautiful scent. H 32-44".

LINUM perenne 'Saphyr' (Flax) Delicate foliage, with a silver sheen, displays small delicate sky blue blooms at its tips. Cut back after blooming. Mulch in winter. Prefers full sun to part shade and well drained soil. Narrow 1" long leaves transpire little water so they tolerate heat and drought. June-July, H 18". Zone 4-9

LIRIOPE muscari (Lilyturf) Neat mounds of grass-like foliage produce showy dense flower spikes. Forms a thick mass of evergreen foliage, making this a good choice for ground cover or erosion control. Sun or shade and well-drained soil. Late summer, 12-15", Zone 5-8

'**Royal Purple**' Grass-like foliage and deep purple flowers.

Perennials

'**Variegata**' Yellow, white and green variegated foliage.

LOBELIA Whether they be North American natives or new hybrid cultivars, they all display spikes of brilliantly colored flowers in the peak of summer. Prefers full sun to part shade and rich, moist soil. Useful in wet areas. Mulch well in winter.

cardinalis (Cardinal Flower) Tall upright romantic wildflowers. Thrives in woodland streams and flowers in late summer and fall.

'**Black Truffle**' In addition to the brilliant red flowers, the foliage is deep purple all season. Grow in moist soil and partial shade for the best display. May need 2 seasons to show its full glory! H 3-4', Zone 3-8

species Native wildflower bearing radiant red flower spikes. July-September. 2-3', Heirloom

siphilitica 'Kryptonite' (Great Blue Lobelia) Spires of deep blue, orchid-like flowers adorn stiff stems to 3' tall. Clumping. Zone 4-9.

LUPINUS Lupines have long been admired, by children as well as adults, for their large palmate leaves and tall spires of brightly colored flowers. Offered in blue, pink, red and yellow. Plant in full to part sun in soils that are moisture retentive yet well drained. Lupines thrive in climates where cool weather persists throughout the summer so it is best to allow them to reseed here. June-July

russell hybrids Clump forming hybrids 3 to 4 feet tall that have quite beautiful long stemmed leaves and 18-24 inch flower spires in many colors. Aoid using lime in planting area. Available in Yellow, Red, Pink and Blue. Zone 3-7

x. '**Tutti Fruitti Mix**' Tutti Fruitti is a luscious confection of color combos, including midnight purple and magenta, persimmon and gold, butter and cream, pink and primrose, two-tone pink, purple with coral -- the permutations are almost endless. Self seeds. H 36-40". Zone 4-9

LYCHNIS coronaria (Catchfly Campion) This species has woolly, whitish-green foliage and bright clusters of magenta flowers. Eye catching! H 18-24", Zone 3-8, Enjoys infertile soil. Will reseed freely.

MERTENSIA virginica (Virginia Bluebells) A lovely North American native. Nodding, tubular, funnel shaped flowers are borne in spring. Pink buds open to lavender blue flowers. After blooming for several weeks, seeds ripen, and the plant begins to fade, going dormant in early July. Prefers a cool shady spot and moist, well-drained humus soil. Native to the eastern woodlands. April-May. H 18", Zone 3-8.

MONARDA didyma (Beebalm Wild Bergamot) A spreading plant with aromatic foliage often used in teas. Unusual whorls of flowers make excellent cuts. Attracts bees, butterflies, and hummingbirds. Needs to be divided regularly and the soil replenished. Beebalm is susceptible to mildew and dry soils exaggerate that susceptibility. Full sun and rich, moist soil. July. Zone 4-8

'**Jacob Cline**' Most mildew resistant red variety. 3-4'

'**Petite Delight**' Dwarf form with 2" bright lavender-rose blooms. Exceptional mildew resistance. 15" height, 24" spread.

'**Purple Lace**' Very compact plant with purple-pink flowers. Blooms well even as a young plant. Good mildew resistance. H 12-16"

sugar buzz series Well suited for the middle of the flower border. These vigorous cultivars have mildew resistant foliage that won't overrun the garden.

'**Blue Moon**' This compact hybrid is covered in lavender-blue blossoms mid- to late

Perennials

summer. H 20"

'Bubblegum Blast' Hot pink flowers. 24"

'Cherry Pops' A solid dome of cherry red, 2-2.5" flowers on strong, well-branched stems. Aromatic dark green foliage. 20"

NEPETA (Catmint) A member of the mint family, it is extremely easy growing plant with few pests or problems. Repeat bloomers throughout the season. Certain varieties are attractive to cats. Drought hardy and deer resistant.

faassenii Whorled spikes of two-lipped blossoms are borne above very aromatic, soft foliage. Most have a spreading habit and make wonderful cut flowers. Long blooming, low maintenance and drought tolerant. Full sun to part shade and light, well-drained soil. Hummingbirds find most in this genus irresistible. Zone 3-8

'Cats Meow' This plant has a tidy, dense, rounded form and its small gray-green foliage is topped with sky-blue flowers from early June to September. 18" X 30"

'Kitten Around' Very showy because the flowers are packed onto a shorter more compact plant that really concentrates the brilliant blue color for more impact in the garden. Forms a tight round mound. H 12-14", Zone 4-8.

'Purrsian Blue' This compact selection forms a densely mounded clump of green, aromatic foliage covered with periwinkle-blue blooms; very showy, intensely bright and so profuse. June-September. 14-18"

'Six Hill Giant' A fantastic cultivar with pale lavender-blue flowers and gray-green foliage. Heavy bloomer. June-July, 2'

'Walkers Low' The longest blooming Nepeta! Tons of lavender-blue flowers over compact mounds of grey-green foliage. April to fall! 18-24"

sibirica 'Souvenir d Andre Chaudron' Upright and bushy plant with bright lavender flower spikes. June-August. H 3', Zone 5-9

OENOTHERA 'Lemon Drop' (Evening Primrose) These plants make charming tangles of bright yellow flowers. Their trailing and drought tolerance makes this perennial ideal for softening the edges of pathways or planting in rock gardens. They require full sun and average, well drained soil. Deadheading not necessary. Native. H 8-12", Zone 5-11

ORIGANUM x. 'Amethyst Falls' A hardy, long blooming ornamental oregano. Good sized sprays containing hundreds of pendulous, chartreuse bracts and protruding bright pink flowers above spicy scented foliage. Full Sun/ well drained soil. H 8-12", Zone 5-10

PACHYSANDRA An excellent evergreen ground cover for shady and partially shady sites, slowly spreading to form a dense carpet. Average, well-drained soil. Zone 3-9

'Green Sheen' Compact, deep and shiny green form of the common pachysandra. 6"-12"

procumbens (Allegheny Spurge) An attractive native ground cover with mottled, evergreen foliage and fragrant white bottlebrush-shaped flowers in early to mid-spring. H 6-10"X1-2'

PAEONIA Peonies are easy to grow, long-lived and hardy plants. Plant so that the root crown is 1 to 2 inches below the soil, no more. Peonies prefer full sun to part shade and slightly acid, well-drained soil enriched with manure.

intersectional aka itoh Created by crossing herbaceous and woody tree peonies. They offer the best qualities of both including large flowers in unique colors, robust herbaceous foliage, strong weather resistant stems, longer bloom time, extreme winter hardiness, and increased vigor. They will spend their first year getting established, and will not be floriferous, but the bud count should increase each year. Flowers late spring. Most are fragrant. Zone 4-8.

'Bartzella' Huge 6-8" semi-double to double, pastel yellow flowers have a small

Perennials

rose-purple flare in the center and a pronounced sweet scent. 30-36"

'Callies Memory' Yellow-cream, semi-double flowers, edged in deeper russet with maroon flares and picotee edge appear mid-season on the mid-sized bush of lush green leaves. H 23-27"

'Cora Louise' Large, semi-double blossoms, white with striking dark lavender central flares, above superb dark green, deeply cut foliage, mounted form. Soft, delicious scent. 30"

'First Arrival' Marvelously fragrant! Enormous blooms (6-8") that last for weeks. Rich lilac infused pink with a strong sweet scent. 24-36", Early to mid spring.

'Julia Rose' Spectacular 6-8" semi-double blooms opening deep rose, fade to soft apricot with reddish purple tips. Attractive deeply divided foliage. Stunning cut flowers. Fragrant. 30"

'Scarlet Heaven' Stunning bright, red, single, really blooms out! These brilliant, showy flowers will not lose their intensity under the full sun. The petals surround a golden center of anthers with red-tipped carpels. H 25-29".

'Scrumdiddlyumptious' Blooms mid to late season Creamy yellow flowers pink blushed and edged. Semi-double Flowers. Blooms mid-late season. H 30".

lactiflora hybrids (Garden Peonies) The delightful common garden peony has been widely grown for over 600 years, with many colors available along with single and double blooms. They bloom late spring - early summer, starting in April and through the months of May and June. Sadly, peonies flower for a relatively short period of time (7-10 days). However, they do not flower all at the same time and are classified with a blooming time, ranging from very early to late season, relative to other peonies. So fill your garden with a variety of cultivars for continuous bloom of up to 6 weeks! Zone 3-7.

'Armani' One of the darkest, reddest peonies ever grown. Fully double satiny red blooms with ruffled petals creating a spectacular look! Blooms late season . 36"

'Big Ben' Big Ben is a large bomb-type peony in shades of deep red with blue undertones. Vigorous, strong and very fragrant. H to 48", Blooms mid-season.

'Celebrity' Gorgeous, fragrant, huge 6" raspberry-pink blooms that contrast wonderfully with white tufted centers. Strong stems, lush green foliage. Blooms mid-late season. H 32".

'Charles Burgess' Fire engine red with a golden center. Absolutely glows on a spring evening. Blooms mid season. 30"

'Charles White' This unique double selection features white outer petals, the smaller inside ones are a creamy, buttery yellow. A fragrant and early bloomer. 36"

'Command Performance' Full, double, fragrant cardinal-red flowers. Has an underglow of red/orange. Thick strong stems. Large flowers up to 8" across. Blooms mid-season. H 32".

'Coral Sunset' The fullest of all corals! Ruffled semi-double blooms which range from a soft coral to intense coral with a rose overlay; the centers exhibit a fluff of golden yellow stamens. Mid-Late Spring. 30"

'Edens Perfume' One of the most fragrant peonies available! Double, large flowers, 6-7" across with frilly pink petals. A compact grower with strong stems perfect for cutting. Mid-season (early summer). 30"

'Festiva Maxima' Very large, double white blooms with a red spot. Fragrant. Blooms early season. 34"

'Gardenia' Very floriferous and extremely fragrant, pink buds open into large 8-10" blossoms in creamy white with yellow stamens in late spring and early summer. H 34".

Perennials

'Henry Bockstoe' This cultivar has been long loved for its incredibly strong stems, intense fragrance, deep red color and amazing form. Blooms mid-season. 32-36"

'Krinkled White' This beauty has lovely single, snow white Krinkled petals with yellow stamens. Also performs well in containers. Mid-season. Slightly fragrant. 32"

'Many Happy Returns' Warm red lovely shaped full double flowers. Very floriferous variety, long lasting cut-flowers. Blooms mid-season. H 34".

'Marie Lemoine' Classic (1869) double white large globe shaped, lovely fragrant variety. Dark green foliage. Blooms late season. H 34".

'Monsieur Jules Elie' Double, rose pink flowers with a silver sheen. Very fragrant. Early season bloom. 34"

'Paula Fay' 'Paula Fay' is a semi-double pink, may be bright light red in cooler climates, with textured blossoms and contrasting yellow stamens. Great cut-flower. Fragrant. Very early season blooming. H 35".

'Red Charm' The ultimate red peony! Double, deep red blooms with many ruffled petals, with a long period of bloom beginning very early in the peony season. Fragrant. H 36".

'Susie Q' Short candy pink rose shaped flowers. Lightly fragrant. Shorter variety (24"). Does not need staking. Good for pot plant. Blooms mid season.

'Sweet Harmony' Extremely floriferous and fragrant variety, holding more flowers per sturdy stem. Beautiful lavender-rose flowers are long lasting throughout the season and in the vase. Late season. 30"

'White Cap' A fragrant hybrid having deep raspberry-burgundy guard petals fully filled with ivory and pink stamens. Blooms May-June. H 32"

PAPAVER (Poppy) A treasured, old-fashioned favorite for spring gardens. Colorful papery blooms atop long sturdy stems. Deadhead to prolong bloom-time. Attractive seedpods. Drought resistant. Prefers full sun and well-drained, average soil.

atlanticum Small, delicate, bright orange flowers. May reseed. June-August, H 2'. Zone 3-8

mybeanum 'Pacino' (Alpine Poppy) 6-8" tall, dense rosettes of hairy, mint green leaves bear charming, sulphur yellow flowers May-June. Ideal for rock gardens. Zone 3-8.

orientale Showy spring bloomers produce papery flowers with velvety black centers. Foliage dies back after flowering, so place them well to avoid large empty spots in the Summer. Late May-early June. 24-30" unless specified. Zone 4-9

'Beauty of Livermore' The large flowers of this cultivar measure 4 to 6 inches across, with crepe-paper like petals of pure, radiant scarlet-red surrounding a huge, dramatic dark purple to black center. 30"

'Bolero' A beauty with its frilly edged, deep pink cup-shaped flowers, splotted with black at the centers. 26-32".

'Brilliant' Fiery orange-scarlet blooms.

'Eye Catcher' A compact variety with large, bright orange-red flowers with black centers blooming in spring and summer on 18-24" fuzzy stems.

'Plum Pudding' Beautiful tissue-like blooms in a rich shade of plum-pink. June-August. 30"

'Prince of Orange' Huge, 4-5", tangerine blooms have a satiny texture and long-lasting garden flair. H 2-4'.

'Princess Victoria Louise' Lovely papery soft salmon-pink blooms with contrasting black spots on fuzzy stems. May- Mid-June. H 20".

'Queen Alexandra' Bright salmon-pink blossoms.

'Royal Wedding' Enormous, pure white blossoms accentuated by a deep black eye. H

Perennials

20".

'**Turkenlouis**' Ruffled fiery red, fringed petals that ignite the late spring garden. A wonderfully unique look. 24-30"

PENSTEMON (Beard Tongue) A large genus with great variety. Foliage is narrow and flowers are trumpet-shaped. Loved by hummingbirds and butterflies. Full to part sun and well-drained light or sandy soil. Blooming June-July.

barbatus Among the hardiest of Penstemon species. Cheerful tubular flowers are borne on tall stems above a low mound of green foliage. May need some support. Nice cut flower. June-July. Zone 5-9

'**Elfin Pink**' Clear pink trumpets. 12-15"

'**Prairie Dusk**' Rich purple blooms. 20-28"

x. '**Cherry Sparks**' Luscious cherry red bells with white throats appear for twice as long and are much larger than other perennial Penstemons. Late May into August. H 18-20", Zone 5-9

x. '**Midnight Masquerade**' This variety's sturdy clump of deep burgundy-purple foliage can be enjoyed all season, but in bloom, the overall effect is stunning. Rich lavender purple flowers have pure white interiors and are produced on dark stems just above the foliage. H 28-32", Zone 4-9.

x. '**Mission Bells Deep Rose**' Very long blooming rich red trumpets with striped white throats, rise on uniquely dark stems amid rich green strappy leaves. H 20", Zone 5-9

PEROVSKIA atriplicifolia (Russian Sage) Branching upright stems bear silvery-grey foliage and sprays of fragrant lavender flowers. Lovely cut flowers. Full sun and well drained soil. August-September. Zone 4-9

'**Denim-N-Lace**' Lacy-like, bright sky blue flowers are held on amethyst calyxes, with strong stems and an upright habit. The beautiful color will last a long time! Medium Height, 28-32"

'**Lacy Blue**' Quite compact at only 12-18", 'Lacey Blue' is perfect for smaller spaces or containers. Dark bluish-purple flower spikes bloom from July to August.

species Silvery-green aromatic foliage is a wonderful backdrop to the lavender- blue flower spikes. 3-4'

PERSICARIA polymorpha A massive herbaceous shrub that needs lots of room to show off its vase shaped form. Enormous, fluffy, creamy-white plumes arrive in summer. It does not spread or self sow like some of its relatives. Full to part sun. Tolerant of wet sites but also does fine in average soil. H 5'-6', Zone 3-8

PHLOX A large and variable genus of prolific and showy bloomers. Most prefer a sunny position and rich moist soil. Their long bloom time may be extended by deadheading spent flowers. Mildew has been a problem with Phlox in the past, but new resistant cultivars are available. Proper cultivation can also help keep mildew under control; keep soil moist, plant in a well-ventilated area, keep foliage dry, and divide mature clumps every 3-4 years.

divaricata 'Blue Moon' (Woodland Phlox) A delightful spring blooming native for shade that will spread and fill in around bulbs and perennials that are slow to emerge. A wild sweet William, 'Blue Moon' with loose clusters of fragrant dark blue flowers that drive butterflies wild. May. 10-14", Zone 3-8

paniculata Garden Phlox is an old-fashioned favorite because of its large, showy, fragrant flower-heads. We choose only mildew resistant varieties. Prefers full sun and moist, rich soil. Mid-summer to fall bloom. Zone 4-8

'**Amethyst Pearl**' Beautiful, fragrant, pale violet flowers with white flares near the center, that bloom prolifically all summer, on a compact plant. Good mildew resistance.

Perennials

H 18"

'Blue Paradise' Flowers open a pale blue, darken to deep violet-blue, then get red-violet edges as they age. The color changes with the light-looking more blue or purple depending on time of day. Intriguing. 3-4'

'Bright Eyes' Light pink with bright pink eye. Large flowers over compact plants. July-August. 3'

'Fashionably Early Crystal' Crystal blooms 2-3 weeks earlier than other Garden Phlox, with countless flowers of pure white with a faint lavender eye above disease resistant foliage. H 28-32"

flame series New compact, dwarf cultivars that features upright clusters of large, sweetly fragrant blossoms. Highly disease resistant, they are available as 'Flame Purple', rich purple flowers with a small darker eye and 'Flame Red'. 12-20", Mid-summer.

'Glamour Girl' Large panicles of glowing hot coral pink fragrant flowers on dark stems steal the show at the height of summer. July-August. 32"

'Laura' This 3' plant bears huge panicles of pink-purple flowers with each floret having a distinct white star in the center. Blooms July-Sept. Mildew resistant.

stolonifera 'Sherwood Purple' The true Creeping Phlox are woodland plants, native to Eastern North America. Plants form a low spreading mound of leathery evergreen leaves. Short upright stems appear in mid-spring, bearing clusters of fragrant deep purple-blue flowers. Ideal for moist, shady to partly shady areas. Partial shade, H 6-12". Zone 3-8

subulata Moss Phlox is a showy groundcover for rock gardens, borders, and banks. Mounds of needle-like foliage are smothered with blossoms in spring. Prefers full to partial sun and well-drained, sandy soil. April-May. 4-6", H 2-9

'Amazing Grace' Masses of white, crimson-centered, star-shaped flowers above evergreen spreading mats of mid-green, needle-like foliage. Spring. 6"

'Emerald Blue' Blue/lavender blooms cover the plant for two to four weeks each spring.

'North Hills' 'North Hills' is smothered with bright white flowers with a prominent violet eye for several weeks in the spring. H 4" x 2'

'Purple Beauty' Forms solid canopies of deep purple blooms.

'Red Wings' Low growing mats of needle-like foliage become covered with deep scarlet-red flowers with an even red darker eye. Spring. 3-4"

'Snowflake' Profusion of pure white flowers completely covers the foliage which forms a short, tight, rounded clump. 4-6"

PHYSOSTEGIA virginiana (Obedient Plant) A vigorous spreader, bearing lance-shaped leaves and spikes of tubular flowers. Nice cut flower. Prefers full sun to partial shade and average, well-drained soil. Zone 3-8

'Miss Manners' An exception to the rule, as the name implies, this Physostegia has a non-spreading habit. Forms clumps of well-branched stems clothed in glossy foliage. White flowers from June to September. 18-24"

'Pink Manners' Another well mannered, clumping form with pink tubular flowers. Midsummer. 36"

PINELLIA tripartita (Voodoo Lily) This unusual woodland plant has leaves resembling a Jack-in-the-pulpit. Beginning in late spring and continuing all summer, the clumps are topped with flowers of medium green, with a 10" long tongue, emerging from the center of the flower, standing at attention- H 12", Part sun to light shade, Zone 5-9

PLATYCODON grandiflorus (Balloon Flower) A clump-forming plant bearing upright stems of triangular leaves and clusters of balloon-like buds which open to star-shaped, cupped

Perennials

flowers. A nice cut flower. Balloon Flower is very late to emerge in the spring. It prefers full sun to partial shade and average to rich, well-drained soil. July-August. Zone 3-9
astra series A compact, well branched series available in light pink and white. 8-10"
'Sentimental Blue' Outstanding dwarf selection with blue flowers. 8"

PODOPHYLLUM hexandrum 'Majus' (Hamalyan Mayapple) Pink, upward facing, cup-shaped flowers arise before its marbled leaves are fully developed. The leaves are umbrella-like in shape and about a foot across. Large 4", red, edible fruits follow the blooms. 20-30" high, blooms in the spring. Requires partial shade and fertile woods soil. Zone 4-8.

POLEMONIUM (Jacobs Ladder) Dense tufts of long leaves with leaflets at a right angle like ladder rungs. Partial shade and cool, moist, humus-rich soil. Avoid hot afternoon sun unless you can keep them consistently moist. Late spring, early summer bloom. Zone 3-9
boreale 'Heavenly Habit' Blue and fragrant--a rare combination! Forms a neatly compact clump of glossy, ferny green foliage topped with fragrant, blue blossoms with a yellow halo and white eye. Larger flowers than the species. H 18-20"

caeruleum 'Bressingham Purple' The original Jacob's Ladder, whose foliage is a joy all season and the lavender blue flowers are a fantastic added spring bonus. H 15"-23"

reptens 'Stairway to Heaven' Dramatic foliage of vivid green trimmed with cream which turns electric pink in cool weather or full sun. Blue flowers in spring. H 12"

POLYGONATUM (Solomon's Seal) North American woodland natives with leafy, arching foliage and pendulous, bell-shaped flowers which hang below the leaves and mature to shining purplish-black fruit in the fall. Easy to grow in deep, moist, woody loam. Part to full shade. Late spring.

commutatum (Giant Solomons Seal) The majestic arcs of P.commutatum grace the shade garden, and features white bell-shaped flowers followed by blue berries. Blooms in spring. A large tetraploid form. Eastern U.S. native. Zone 3-8. H 4-4.5' at maturity.

falcatum aka odoratum 'Variegata' White and cream striping on strong growing arching stems, hanging white tubular flowers. Spread by rhizomes. H 18-24", Zone 3-8.

humile (Dwarf Solomons Seal) A rare and diminutive species which forms a dense carpet of attractive foliage rising to 6". Cute creamy white bells in spring. Zone 4-8.

pratti (Dwarf Chinese Solomons Seal) A lovely dwarf solomons seal with purple flowers followed by red berries in late summer. It forms nice colonies and will fit right into a rock garden setting or shady border. Zones 5-8, 8"

verticillatum A spring bloomer with white & green tubular flowers and narrow whorled foliage. Zone 5-9. 4', China, part shade-shade, moist, well drained soil.

PORTERANTHUS AKA GILLENIA This under-used plant not only adds shape and texture, but it is also very useful for dry, shady sites, especially when planted en masse. Native to Eastern U.S.. Flowers freely late May thru June. Sun to light shade. Zone 4-8
stipulata (American Ipecac) Very similar to G. trifoliata, but deeply cut, five-parted leaves give it a lacey, delicate look. H 2-3'

trifoliata (Bowmans Root) An easy to grow native with palmate leaves above lacy white flowers growing in loose panicles with red petioles and mahogany stems. An elegant cut flower. H 2-3'

PRIMULA (Primrose) Italian for 'Spring', these are often the first gems of color following winter. Flowers bloom on stems rising from basal clusters of broad leaves. Partial shade and moist, rich soil. Zone 4-8.

belarina series Fully double flowers in rich colors bloom profusely. Refined in style, yet

Perennials

hardy, the Belarinas® are offered in many colors. 'Amethyst Ice', 'Buttercup', 'Cobalt Blue', 'Nectarine', and 'Valentine'. H 6-8".

denticulata 'Alba' (Drumstick Primrose) White flowers emerge in early spring before the foliage expands. Thick stems hold the globes of flowers up stiffly. After flowering the leaves get quite large. H 6-18".

japonica 'Millers Crimson' Spectacular looking species with whorls of bright, carmine red blooms clustered candelabra-style around sturdy upright stems. Loves moisture. fragrant. H 18", May-June.

PULMONARIA x. 'Silver Bouquet' (Lungwort) Charming spring flowers on wonderfully patterned foliage. This variety forms a large clump of long, pointed, shiny silver leaves, with an occasional fleck of green, topped by clusters of large pink bells that change to bright blue as they mature. A shade and moist soil lover. Spring. H 8-10", Zone 3-8.

PULSATILLA vulgaris 'Violet Bells' (Pasque Flower) An early blooming perennial with violet cup-shaped flowers that have bright yellow stamens, over a tuft of feathery, gray green leaves, followed by unusual fuzzy seed pods. Prefers full sun to part shade. Well-drained soil. H 6-8", Zone 3-8.

RODGERSIA pinnata 'Superba' With its bold, divided leaves, this forms an exotic-looking clump with large airy plumes of creamy to deep-pink flowers, that appear in early to mid-summer. Plants prefer a moist, dappled shade setting. H 3-4', Zone 4-9.

RUDBECKIA fulgida (Black Eyed Susans) Black-Eyed Susan or Coneflowers are showy, native North American wild flowers. Daisy-like flowers with large, raised, brown centers are wonderful cut flowers. Attract butterflies. Easy to grow in full sun to light shade and average to moist, well-drained soil.

'Little Goldstar' Compact selection having star-shaped, 2-2 1/2", golden yellow blossoms carried just above a short, bushy clump of rich green foliage. Mid Summer-Early Fall. H 14-16", Zone 4-9

sullivantii 'Goldstrum' Bright gold petals with a deep brown cone highlight the garden in late summer. Each flower may last up to two weeks! Long blooming and very floriferous. Late July-September, H 24-36". Zone 3-10

'var. fulgida' Smaller flowers than R. 'Goldstrum' but longer blooming going from July-October. H 24-30", Zone 5-8

SAGINA subulata 'Aurea' (Irish Moss) Emerald green moss with tiny white flowers appearing just on top of the moss in May-June. Tolerates more sun than most mosses. Sun, part shade to shade, 2", Zones 4-7

SALVIA (Garden Sage) Popular garden plants with attractive basal foliage supporting lovely spires of mostly purplish flowers. Provides a fine mass of color in the garden. The flower spikes are useful cut flowers. For many of these varieties, if you keep spent flowers removed the plant will continue to flower in flushes throughout the summer. Full sun to partial shade and average, well-drained soil. Zone 3/4-9

nemorosa These are drought tolerant and hardy plants. Flowers range in colors and have numerous leafy stems. The many inflorescences have closely spaced whorls of small flowers.

'Blue Hill' Dense spikes of true blue flowers in June-July. H 1.5-2'.

'Blue Marvel' Ultra large blue flowers are the biggest of any S. nemorosa! Reblooms reliably, mounded habit. H 10-12".

'Carradonna' From Germany, a long blooming violet purple Salvia with glowing purple stems. A taller habit, 24-36". Blooms late spring, early summer and often reblooms late

Perennials

summer.

'Violet Riot' Vivid-violet blue color on dense, well-branched plants with a neater upright stems than some salvias. H 20-24".

pratensis (Meadow Clary Sage) A clump-forming salvia that features numerous, dense, upright, spike-like racemes of tiny, two-lipped flowers. Flowers bloom in early summer and may rebloom sporadically into late summer if faded flowers are promptly cut back.

'Fashionista Midnight Model' A color machine, this easy to grow, easy to love selection can't wait to show off its its incredible deep, violet-blue flower spikes that top the end of each plant stem. H 18-24".

'Fashionista Pretty in Pink' Vibrant lavender pink flowers are held on darker pink calyxes. This salvia produces brightly colored flowers for a long bloom period. H 18-24".

verticillata 'Purple Rain' (Whorled Sage) Leafy base of mid green leaflets that put up leaf covered arching spikes, that carry the smokey purple flowers. Flowers grow in tightly packed whorls. Informal habit. June- August, H 24".

x. 'May Night' (aka Mainacht) Deep purple spikes attract birds, butterflies and bees. May-June, H 12-18".

SANGUISORBA officinalis varimicrocephala 'Little Angel' (Burnet Bottlebrush) This unique dwarf features compact green and white variegated foliage. Maroon, oblong flowers rise up on slender stems in late summer. H 12-24", Zone 4-8.

SCABIOSA (Pincushion Flower) Clumps of basal foliage bear tufted flowers on long stems. A long lasting cut flower. Attracts butterflies. Not reliably hardy, so protect in winter. Full to half day sun and fertile, well-drained soil. Exuberant and long bloomer. June-Oct. Zone 4-8

caucasica 'Fama Deep Blue' The largest flower of all scabiosa. The 4", ruffled, deep blue blooms with pincushion centers constantly buzz with bees from midsummer to fall. H 1.5-2'.

columbaria A mixture of rounded and serrated basal leaves and domed flower heads.

'Butterfly Blue' Lavender blue flowers.

'Flutter Pure White' A dwarf Pincushion Flower with large pure white blooms, non-stop from spring through late summer. Terrific for mass planting, edging the border or in pots. H 12-14".

'Giant Blue' Immense, 3", lavender-blue flowers twice the size of 'Butterfly Blue'. H 24"

x. 'Vivid Violet' Vivid violet pincushion flowers from late spring to frost. 15"

SEDUM A large genus of succulent plants with clusters of small, starry flowers. Full sun and lean well drained soil a must! Zone 3/4-9

DWARF TYPES Spreading low growing succulents which are covered with starry flowers. They also make a great alternative ground cover in full sun, spreading even under the harshest conditions.

rupestre Also known as 'Rocky Stonecrop', vigorous, mat forming evergreen species.

'Angelina' Carpets of screaming gold needle like foliage with tiny yellow flowers in mid- summer. The foliage turns dark yellow and finally orange when the coldest weather arrives. 3-5"

'Chocolate Ball' [NEW] This unique variety forms a low spreading mound of milk-chocolate, succulent, needle-like leaves that change to dazzling red with the onset of cooler temperatures in fall. Yellow flowers in summer and continue into fall. H 6-8".

sieboldii (October Daphne) Simple low arching stems with round grey leaves. Pink flowers in dense round clusters beginning in September. The foliage dies back in the winter. H 4-8".

Perennials

sunsparkler series Groundcover type sedums offering colorful foliage with a compact mounded habit and large clusters flowers. Zone 4-9

'**Dazzleberry**' [NEW] Huge raspberry flower clusters completely engulf the smoky blue-grey, wide mounds of foliage. One of the earliest fall-blooming Sedum varieties. H Short, 4-8"

'**Firecracker**' Strong and robust, this densely, branched selection puts on a strong show of burgundy red color all season. Vibrant pink flowers are an added bonus in late summer. 6"

'**Lime Twister**' [NEW] Hot pink blooms in late summer to fall with variegated green and creamy white foliage. H 4"x18"W

'**Lime Zinger**' Fantastic lime-green leaves edged with bright cherry-red. In the late summer the carpet of colorful foliage is topped with large clusters of soft pink flowers. 6"

x. '**Little Miss Sunshine**' Prized for its incredibly dark green, glossy foliage, compact size, and tidiness in the landscape. From early to midsummer, tiny clusters of yellow flowers cover the polished habit. H 6-8".

TALL LIVE FOREVER TYPES Clump forming, mostly upright plants which are topped with large clusters of small flowers. Flowers are nice for cutting or leaving on the plant for winter interest. Hardy and low maintenance. Attractive to butterflies.

spectabile '**Autumn Fire**' Could this be the Sedum to surpass 'Autumn Joy' in quality and popularity? Thicker, more consistent and nicer looking overall according to the trails. Same rusty red color we love! Resistant to 'sudden sedum collapse'. H 2'

x. '**Mr. Goodbud**' Large 5-6 inch clusters of vibrant purple pink flowers on purple red stems top the compact, upright clump of deep green, serrated foliage in late summer. The stems are very strong and relatively short, resisting flopping. 16"

x. '**Pure Joy**' 'Pure Joy' is a short, semi-upright sedum with blue-green, serrated foliage that is completely covered in bubblegum pink flowers in late summer. 12"

x. '**Touchdown Teak**' An amazing glossy red-brown to purple-brown leaves, red stems, and a vigorous, upright-but low habit. Rose-red flowers are a summer feature. H 15" x 16" W.

SEMPERVIVUM (Hen and Chicks) Succulent rosettes are ideal for hot dry areas like rock gardens and rock crevices. The parent (hen) becomes surrounded by many smaller rosettes (chicks), forming a nice grouping. Full sun and well-drained soil. Zone 3-8

arachnoideum '**Cobweb Buttons**' Refers to 'spiders', this cute, compact species is evergreen, with pale-green rosettes densely woven with grey threads. 3-4"

torcorum '**Kalinda**' Beautiful, large evergreen rosettes of pale burgundy, orange-flushed, coral-tipped leaves that turn deep wine tones in winter. H 2-8".

x. '**Jade Rose**' Rosettes of rich green leaves that flush a deep rose red color. H 1-4".

x. '**Red Rubin**' Large emerald green rosettes flushed with burgundy red at the tips. H 4-6"

x. '**Royal Ruby**' Dark wine-red foliage. Rosettes form dense mats.

x. '**Silverine**' Green rosettes with red highlights. Pink flowers. H 4-6"

SISYRINCHIUM augustifolium '**Lucerne**' (**Blue Eyed Grass**) An American native with tufts of grassy foliage and violet blue, starry flowers. Full to ½ day sun and average, well-drained soil. Avoid hot, dry soils. June- July, 8-10". Zone 5-9

STACHYS Members of the mint family, most with hairy leaves and stems. Flowers are carried in tiered whorls on erect stems. These long lived, very hardy perennials have excellent drought and heat tolerance. Full sun to light shade. Average to moist, well-drained soil. Zone

Perennials

4-8

byzantina 'Helen Von Steins' (Lambs-Ears) Lambs-Ears are one of the most popular silver-leaved perennials. Plants form a dense clump of soft felty, silver-grey leaves, some form upright flowers in early summer. H 6-8".

macrantha 'Superba' Large strap-like, crinkled leaves with thick mauve flower spikes that stand above the foliage. Very hardy and long-lived. 2-3'

monieri 'Hummelo' A long blooming native of the Alps with rose -lavender flower spikes above clumps of green basal rosettes. Little known and under utilized. A personal favorite. Summer. 18-20"

officinalis 'Pink Cotton Candy' Two-toned dark and light pink flowers. Early-mid summer. 24"

STOKESIA laevis (Stokes Aster) Broad rosettes of shiny green, lance shaped leaves. Branched flower stalks bear flat aster-like flowers with fuzzy centers mid-July through August. Nice planted in groups. Grow in full sun to light shade and well-drained soil. Zone 5-9

'Blue Frills' Featuring loads of 2.5-3", electric violet blue blooms, July to August. H 16-18".

'Honeysong Purple' Dark purple stokesia, a true royal purple with a hint of red that deepens as the flower ages. Contrasting white stamens, 4" blooms, and pronounced serrated edges make this the finest ever offered. Mid-summer. 12"

SYNEILESIS palmata (Shredded Umbrella Plant) Grown for its foliage more than the flowers. Umbrellas of finely dissected leaves that are covered with a silvery fuzz as they emerge in spring. Will form nice clumps over time but is not invasive. Part sun to shade, moist, average soil. Zone 4-8. 18-24".

THALICTRUM (Meadow Rue) Fine plants with delicate, columbine-like foliage. Airy sprays of flowers on long stems above the foliage make outstanding cuts. Full to part sun, a cool location, and moisture retentive soil. Summer blooming. Zone 5-9.

ichangensee 'Evening Star' A lovely small woodland plant with multi-colored foliage, ranging from olive, tan and copper to red-brown. Fluffy clusters of lavender flowers from May to August. H 8".

nimbus series Available in both 'Pink' and 'White', flowers are massive puffs at the top of the foliage. The striking dark stems and lovely fern-like green leaves are showy even before the bloom. Great crown count. Blooms the first year, but much better after a winter chill. H 28" x 16" W.

x. 'Black Stockings' Tall, almost black stems carry fluffy, lavender flowers above attractive foliage. H 48".

TIARELLA (Foamflower) An indispensable genus for the woodland garden. Useful as spreading ground covers. Thrive in moist, humus-rich soil and partial to full shade. Attributes include fragrant spring flowers and attractively marked and shaped leaves. Zone 4-9

'Candy Striper' The larger, lush, green leaves have a dark stippled stripe down each leaf lobe. 'Candy Striper' has a mounding habit, pink flower buds, and white, foamy flowers in spring. H 10" x 16" W.

'Pink Skyrocket' Acclaimed as the best pink flowering Tiarella! Shrimp pink flowers above great cut and marked foliage. H 8" foliage, 13" flowering.

'Sugar and Spice' Deep, rich, lacy green leaves with purple-maroon marked centers; softly fragrant frosted pink flowers with white centers. Spring. 8" foliage; 13" flower.

TRICYRTIS (Toad Lily) Unusual Japanese perennials with a subtle beauty. The orchid-like,

Perennials

almost tropical looking blooms are an excellent companion for Hostas and Ferns. Forms slow spreading clumps. Prefers light to full shade and moist, humus-rich soil. Late August-September. Zone 4/5-9

formosana

'**Autumn Glow**' Leaves are large, lush, and uniquely variegated; wide, yellow leaf margins are showier in the shade. Arching stems of orchid-like, reddish purple to blue violet speckled blossoms appear in late season. H 24-26".

'**Samauri**' Green leaves with creamy gold edges. Compact habit and slow spreading nature. Flowers are purple with darker spotting. 18"

hirta '**Miyazaki hybrids**' Long, pointed, fuzzy leaves on arching stems and white star-shaped flowers spotted with purple. Does not form large clumps, but makes a gorgeous specimen plant. 2-3'

TROLLIUS (Globeflower) Showy, spring flowering perennial producing clumps of broad deeply divided leaves. Waxy, cupped, golden flowers are terrific for cutting. Cut back after first flush of flowers and fertilize for a rebloom. They prefer a cool spot in full sun to partial shade, with moist, humus soil. Early summer.

chinensis '**Morning Sun**' 'Morning Sun' is a compact version of popular "Golden Queen" with rich gold flowers and attractive green foliage. 18-20", Zone 3-7.

cultorum '**New Moon**' Large, creamy double yellow flowers on upright stems with a nice compact habit. H. 18-23", Zone 3-9.

europaeus f. compactus '**Lemon Supreme**' An abundance of lemon yellow, bowl-shaped blooms on compact plants. Very vigorous. H 12", Zone 2-9.

laxus (Spreading Globeflower) Though rare and protected in the wild, this native is easy to grow in the garden. In spring, it is a prolific bloomer and it may flower again later in the season. Cheery yellow flowers on thick stems sit atop a neat mound of glossy foliage. Eastern North America. H 12-16", Zone 4-8.

VERONICA (Speedwell) A large genera comprised of both upright and prostrate species. Upright flower spikes and linear leaves are common characteristics. Some creeping varieties have rounded blooms. All make exceptional border plants that respond well to deadheading. Loved by butterflies. Full to half day sun and average, well drained soil that does not dry out completely. Avoid hot, dry sites. Zone 4-8

austriaca '**Venice Blue**' (**Sawtoothed Veronica**) Early blooming, the countless shorter spires with larger violet-blue blossoms sparkle against the toothed, glossy textured foliage. Tidy compact, mounding habit. H 10-12"

longifolia This species forms a mound of attractive deep green foliage, bearing numerous spikes flowers starting in early summer and continuing for weeks.

'**First Lady**' A compact plant, bearing numerous spikes of pure white flowers. Nice cut flower. H 14-16".

'**First Love**' A compact variety, it grows to be 16-20", with elegant, bright pink flower spikes.

magic show series These picture perfect perennials form a fairly short, compact, full clump of bright green foliage topped with enchanting flower wands in early to midsummer. Zone 4-8.

'**Enchanted Indigo**' Forms a fairly short, compact clump of bright green glossy foliage topped with deep royal purple flowers in summer and again in fall. June-July, H 16-18"

'**Hocus Pocus**' Very long, vivid violet purple flower wands top the short, green foliage. Perfect choice for container specimen. June to July. H 16-20"

Perennials

'Pink Potion' A compact upright Veronica with bright pink flower spikes. Standing 16" tall, over half the plants height comes from the beautiful blooms.

peduncularis (Creeping Speedwell) Alternate, simple leaves, on creeping stems. Flowers in spring.

'Georgia Blue' Abundant small sky-blue flowers appear in late spring to early summer on dense mat-like foliage with shiny dark green leaves. Nice with daffodils. Grows 2-4" high

'Waterperry Blue' Shiny green leaves flushed with burgundy, producing masses of 1/2" lavender-blue flowers from May-June. 5-10"

'Whitewater' Dainty, pure white flowers cover this dense groundcover. Glossy, dark green foliage turns to burgundy, then to bronze in the fall. Late spring-early summer. 6"

spictata 'Very Van Gogh' Radiant orchid, paintbrush-like, rosy purple flowers appear on well-branched scapes. Upright, compact and clumping. A long blooming speedwell. 18-20".

x. 'Royal Candles' Violet blue flowers over plants with compact, rigid habit. Early summer, 12"

x. 'Snowmass' (Blue-Eyed Veronica) Small, glossy, rounded leaves form a dense mat, covered by small, four-petaled, white flowers with a blue eye. Beautiful as a ground cover. H 1-2"x18".

x. 'Tidal Pool' Denser other speedwells, with small oak-like leaves. The plants cover themselves with medium to deep blue-violet flowers from late April to mid-July. The rest of the season they settle into an attractive ground cover. 3"

VERONICASTRUM virginicum (Culvers Root) The tall flower spikes of this plant provide a strong accent and good vertical height, the lance-shaped leaves with whorled foliage provide interest early summer. Typically will grow 4-5' in bloom. Prefers moist, well drained soil, full to partial sun. Zone 3-10.

'Album' This cultivar is noted for its pure white flowers.

'Lavender Towers' Elegant pale purple spires on unbranched stems.

VINCA minor Vinca minor or Periwinkle is a beautiful, evergreen, trailing ground cover for partial shade and either poor or rich soil. Spring bloomer, but intermittently continues all season. 4-8", Zone 4-9

'Alba' (White Periwinkle) Splendid, large white-flowered version. Vinca.

'Bowles Variety' Larger deep blue flowers than the species. Dark green glossy foliage. 6-8"

'Ralph Shugert' Green and white variegated foliage with starry blue flowers brings loads of color to large areas with very little effort. H 4-8".

VIOLA cornuta 'Magnifi-Scent Sweetheart' Bred for beauty and fragrance. Frilled cream-primrose colored blooms with elegant mauve edges, 1.5". Long blooming. Small, low growing plants with evergreen, heart-shaped foliage. Prefer partial shade but will tolerate full sun. Moist, humus-rich soil. H 4-9", Zone 5-8.

CLEMATIS Mostly climbers, many with large showy flowers. Will grow up trellises, arbors, shrubs, etc. Best to mulch or plant around the base of clematis, keeping the roots cool. Plant the base 2-3" below soil level to deter Clematis Wilt. The climbing varieties fall into 3 general categories/ pruning groups. 1,2 or 3 (sometimes A,B or C). TYPE 1, Blooms the earliest in Spring and sets their buds on old wood. TYPE 2, Can bloom on old and new wood, generally starts flowering in late Spring. TYPE 3, Blooms only on new wood. Flowering in summer or later. FOR PRUNING RECOMMENDATIONS, we offer a detailed handout. Please ask at the cashier desk. FS-full sun, PS-part sun/shade, S- shade. Zone 4-9, unless

Perennial Vines

otherwise noted.

alpina 'Stolwijk Gold' Nodding, rich blue flowers provide a stunning contrast on bright gold foliage. An outstanding display! May-June, 6-8', FS-PS, Pruning group: A

montana 'Freda' Cherry-pink, 2" flowers with yellow anthers. Very deep bronze foliage. May-June, H16', FS-PS, Pruning Group: A

paniculata Very fragrant flowers in late summer. Vigorous plants that will grow to 30' over time or it can be cut to the ground in spring and still flower on robust foliage. Full sun to mostly shady.

species Clusters of small, dainty, fragrant, white flowers. Very vigorous. Aug.-Sept. 20'-30', Heirloom, Pruning group; A, B, or C.

'Sweet Summer Love' Vibrant shades of lush cranberry/violet in hundreds of starry blossoms. A Sweet Autumn Clematis in a new color and blooms earlier (August).

Cherry-vanilla fragrance. Tall 12', Pruning Group:C

recta 'Serious Black' This unusual selection is not a vining plant but has a sprawling, bushy habit. Quickly bursts out of the ground in the spring, with foliage of smoky-purple that matures to deep olive green. Plants produce fragrant little ivory flower clusters in late spring to early summer. H 4-6'. FS-PS, Prune to the ground fall or early spring.

vitacella These hybrids are prized for their hardiness, vigor, reliability and flower power. Most are also wilt resistant. Flower best if pruned almost to the ground in spring. June-September F-PS, Planting Group:C.

'Avante Garde' This easy and vigorous clematis sports red and pink flowers all through summer in a two-tone display of beautiful button blossoms. H 8-12'.

'Betty Corning' A charming, fragrant, nodding flower with four petals of light blue. The 2" deep flowers have recurving tips to the petals. June-Sept, 5-6', Heirloom.

'Polish Spirit' Saucer-shaped, velvety, rich violet-purple, 3" flowers, with lighter central bars. Blooming from midsummer to early fall. H 10-15'

'Venosa Violacea' 4-5" flowers of white background with purple veins throughout, turning all purple on the edges. Blooms July, August and September. H 8-10'. Tolerates shade well.

x. 'Abilene' A delightful pink flower with contrasting yellow anthers. As the flowers mature and fade, a central deep pink stripe becomes more prominent. Early to late summer bloom, PS, compact patio 3-4'. Pruning group 2. Tolerates shade well.

x. 'Blue Angel' The clear blue 3-4" flowers have delicately, crinkly edges and curve slightly. Anthers are creamy-yellow. FS-PS, H 10-12'. June-August. Pruning Group:C.

x. 'Bonanza' Mauve-blue flowers with pale yellow anthers that bloom in July–September. Hardy, vigorous, free-flowering, and bred for excellent disease resistance. Climbs to 8'. Tolerates partial shade. Pruning Group:C

x. 'Cardinal Wyszynski' Magnificent, very free flowering with large, 6-8" glowing crimson flowers, highlighted by a central cluster of dark anthers. Very vigorous climber. June-September; FS, 8-12', Pruning Group:B

x. 'Cezanne' Covered in fragrant, 5-6", deep lavender-blue flowers from late spring-summer. Growing to only 3-6 ft. Award winning variety. Pruning group:2

x. 'Chelsea' The flowers are white with a subtle blue tint that shows best in partial shade. Grows to only 3ft. tall and is a good choice as a container plant or in the front of the garden. PS, Pruning Group:3.

x. 'Comtesse de Bouchard' Velvety, 4-6", rose-pink flowers with yellow stamens. June-Sept. H 6-8', F-PS, Pruning Group:C

x. 'Crystal Fountain' 6", semi-double, lilac-blue flowers. Plants are compact and

Perennial Vines

free-flowering with two distinct flushes, one in late spring and again in late summer. FS-PS, 6', Pruning Group:B

x. **'Diamantina'** 'Diamantina' has many 4-6" blue/purple fully double flowers on each stem, each lasts up to 4 weeks. Repeats flowering throughout the summer. Great choice for containers. H 7', Late Spring- Early Fall, FS-PS, Pruning Group:B

x. **'Dianas Delight'** Diana's Delight has beautiful, rich blue colored flowers with light and dark tones and a creamy yellow center. H 6', blooms June through early September. FS, Pruning Group:B

x. **'Dr. Ruppel'** Large, single, rose-red with carmine bar, 6-8" flowers in May, June and September. H 6-9', FS/PS, Zone 4,PGB1.

x. **'Fleuri'** Compact and richly colored! Masses of 5" deep purple flowers with a central stripe in deeper tones of magenta. Blooms May-August, 3-4', FS-PS, Pruning Group:C

x. **'General Sikorski'** Gorgeous mauve blue flowers that are contrasted with a red center. Free-flowering nature. June-September. H 7-10', FS-PS, Pruning Group:B

x. **'Gillian Blades'** Beautiful ruffly flowers open with a hint of pale blue and mature to a pure white. Blooms in late spring and again in late summer. Its compact habit makes it a great choice for patio containers. H 7-8', FS, Pruning Group:B

x. **'Giselle'** Dusky pink, 5" flowers with a thin dark pink margin on the petals, dark pink center. Very free flowering from May-September. Compact habit, H 4-5'. FS-PS, Pruning Group:B.

x. **'Guernsey Cream'** Large 5" flowers open a very light yellow with green bars in the center. After a day or two the flowers fade to a creamy- white. This subtle shade of white shows best against a dark background. A vigorous variety that blooms well in partial shade beginning in late May-July. Climb to 6-8'. Pruning Group:B

x. **'Jackmani'** Profuse bloomer with dark purple, 4-6" flowers. June-August. H 12-10', FS-PS, Pruning Group:C

x. **'Josephine'** This double clematis is a wonderful blending of cream to creamy green to pinkish mauve with striping. Each flower is a striking display, with its unusual coloration and shape. H 6-8', June-Sept., FS-PS, Pruning Group:B

x. **'Nelly Moser'** A 100 year old favorite. Pastel mauve-pink petals with carmine bar on these 7-9" flowers. May, June, and September bloom. H 8-12', FS-PS, Pruning Group:B

x. **'Niobe'** Velvety, ruby-red with ivory stamens. June-Sept. H 6-8', FS-PS, Pruning Group:B

x. **'Piilu'** Unusual flowering with double pink flowers produced in the spring and single pink later in the summer. One of the heaviest blooming varieties with flowers produced from the bottom of the stems to the top all season long. Compact growing to 6'. Spring-Fall. FS-PS, Pruning Group:B

x. **'Rebecca'** Very large flowers are a stunning magenta red with creamy yellow anthers. Free flowering, exceptionally beautiful red variety. May-June; H 6-8', FS-PS, Pruning Group:B

x. **'Sapphire Indigo' (Dwarf Clematis)** This unique clematis stays true to name with long lasting dark purple blooms that fade to deep blue. It has stunning dark purple to black anthers. It is a continuous bloomer June - September. Growing to a height of 4' it is a good choice for containers. It can be grown in partial shade. No pruning! 3'X3'

x. **'Vancouver Daybreak'** Lavender-purple flowers with a slightly darker midrib beginning in late May. Flowers can reach 7-9" across with full, overlapping petals. All of the Vancouver varieties have some of the largest flowers of any Clematis. May-June-Sept. H 6-9', FS-PS, Pruning Group:B

x. **'Vancouver Deb Dahl'** Deep lavender-blue flowers reaching 7-9 inches across. This is the

Perennial Vines

color and flower size that gives Clematis the title "Queen of Vines". May-June-Sept., H 6-9', FS-PS, Pruning Group:B

x. 'Vancouver Morning Mist' The largest flower at 12 inches across! Light lavender pink fades to white. Medium height, 6-8'. FS-PS & bright shade, Pruning Group:B

x. 'Vancouver Mystic Gem' Pink flowers edged in white with red stamens in the center. Medium height, 6-8'. FS-PS, Pruning Group:B

x. 'Vancouver Plum Gorgeous' Velvety-plum colored flowers that fade to purple-blue in summer. The flowers are solid plum with no bar. Blooms June-September. H 6-8', FS-PS, Pruning Group:B

HYDRANGEA petiolaris (Climbing Hydrangea) Sprawling vine that clings and climbs by aerial rootlets, eventually to 30'. Flattened clusters of fragrant, white flowers in a lacetop configuration, blooming late spring to early summer. Heart shaped, lustrous leaves. Best grown in rich, well drained soil, part shade to shade, will tolerate full sun in the North. Slow to establish, then very vigorous. Zone 5

LONICERA sempervirens A woody twining climber whose leaves are often blue-green. Tubular flowers are loved by hummingbirds and are followed by berries. Late spring/early summer. Only need to be pruned to fit your space. Zone 4-9.

'Magnifica' Bright apricot orange trumpets with a yellow center. The foliage is more blue-green than other varieties. Our most vigorous variety. H 15'

'Major Wheeler' Landscape friendly native honeysuckle. Red flowers cover the plant in spring with new flowers on and off throughout the summer and fall. The most floriferous variety we offer. Heirloom, H 10'.

ABIES The genus Abies, the true fir, offers beautiful, adaptable garden forms that exhibit exceptional uniformity and regular branching. Valued for a wide range of striking evergreen shapes and sizes that fill many landscape needs, Abies cultivars include broad and narrow upright trees, naturally low, prostrate forms, tiny varieties for use in rock gardens and troughs, and weeping forms that make outstanding focal points. Stiff, pointed needles, some of which recurve to show off silvery undersides, contribute rich colors and tight textures to garden scenes. Upright ornamental cones boast bright colors too. Most Abies prefer rich soil with abundant rainfall and are highly adaptable and easy to maintain when given good drainage. Hardiness varies by species.

koreana 'Cis' Cis Korean Fir. Abies koreana 'Cis' has radiating, dark green needles which lie flat on the stems and are highlighted by attractive, small, brown buds at the branch tips. This slow-growing, flattened, spherical plant has a formal, tidy appearance and glistening foliage that draws attention in the garden. Selected in Holland in 1989. Garden Size: 1.5' H x 2' W Dwarf: 1-3"/year Globe Shaped Zone 4

BUXUS sempervirens The handsome, hardy boxwood lends evergreen elegance to the edges of formal gardens where a small, globose presence is called for or where a broader, upright habit is needed. The versatile glossy green or variegated plants respond well to pruning and shaping, providing artistic potential in special garden situations. We offer superior species and cultivars, all known for their hardiness, unique form or truly dwarf size. Boxwood selections appreciate moist, cool soil with their roots protected.

sinica var. insularis 'Justin Brouwers' Possibly the most ideal garden boxwood, Buxus sinica var. insularis 'Justin Brouwers' will play a very important role in contemporary landscape. Small, dark green, glossy leaves maintain their color year-round, unlike many boxwood that tend to bronze in winter. 'Justin Brouwers' responds well to shearing and is attractive as an individual specimen or part of a highly manicured border, low hedge, or

Dwarf Conifers

parterre. Left unsheared it will become an attractive garden feature that is wider than tall. Grows well in partial shade to full sun, tolerates dry conditions and shows some deer resistance. Garden Size: 2'H x 2'W 1-3²/year Globe Shaped Zone 4

'Variegata' (Variegated English Boxwood) *Buxus sempervirens* 'Variegata' the leaves of this variegated form of English Boxwood have irregular, creamy yellow margins against dark green centers. A great choice for adding a dash of color to a special garden spot. Garden Size: 6'H x 4'W 3-6²/year Globe Shaped Zone 5 Variegated

CHAMAECYPARIS Scores of choice *Chamaecyparis* cultivars offer a wide range of color, texture, and shape for nearly every landscape need. *C. obtusa*, commonly known as False or Hinoki Cypress, thrives in moist, well drained soil in full sun or partial shade and contributes sprays or fans of fine evergreen foliage to the landscape. *C. pisifera*, also known as Sawara Cypress, claims the best cold hardiness of the genus. Its cultivars thrive in full sun and contribute beautiful, feathery foliage to garden settings. *Chamaecyparis* grow native in North America, Japan and Taiwan.

obtusa 'Butterball' Bright, lemony yellow tips on tightly congested foliage give the small, globe-shaped *Chamaecyparis obtusa* 'Butter Ball' a fresh, cheery look. The vivid coloring contrasts beautifully with naturally darker inner foliage. A consistently rounded habit and very slow growth distinguish the Butter Ball Hinoki Cypress as superior to others. Prefers moist, well-drained soil. Garden Size: 2'H x 2'W Dwarf: 1-3²/year Globe Shaped Zone 5 Yellow

obtusa 'Chirimen' The fascinating foliage of *Chamaecyparis obtusa* 'Chirimen' displays multiple textures and colors. That explains the name, 'Chirimen', which is a dyed crepe fabric traditionally made from silk and used for making kimonos. Each narrow, upright tree becomes a cluster of thick, upright shoots that resemble bottle-brushes, with both juvenile and adult foliage in shades of blue and green. The effect is striking and unusual for a Hinoki cultivar. Use this textural accent where the crinkly, congested foliage will stand out. Requires excellent drainage. Garden Size: 4'H x 2'W Large: 3-5²/year Narrow Upright Zone 5 Bluish-Green

obtusa 'Fernspray Gold' Classy, arching sprays of golden, fern-like foliage decorate *Chamaecyparis obtusa* 'Fernspray Gold'. Each unique, flattened branch tapers to a point, just as a fern frond does. Give this intermediate-sized Hinoki plenty of sun and ample moisture to achieve the brightest gold, but use caution in hot climates, where scorching afternoon sun may be too much. Originally from Duncan and Davies, New Zealand. Garden Size: 12'H x 8'W Intermediate: 6-10²/year Broad Upright Zone 5 Yellow

obtusa 'Just Dandy' *Chamaecyparis obtusa* 'Just Dandy', selected from among thousands of seedlings of *C.o.* 'Nana Gracilis' in 1981, is among the best of the best. Compact sprays of dense, finely textured foliage decorate the branches of the low, rounded, spreading plants. Such tight foliage is usually associated with miniature selections that have extremely slow growth, but this superior cultivar grows comparatively faster. It will reach the size of a beach ball within years instead of decades. Ultimately wider than tall, 'Just Dandy' contributes unparalleled grace and beauty to small spaces throughout the year. Garden Size: 1.5'H x 2'W Dwarf: 1-3²/year Globe Shaped Zone 5

obtusa 'Melody' Lacy sprays of attractive lemon yellow foliage let the special *Chamaecyparis obtusa* 'Melody' stand out in the garden. Found as a sport on *C.o.* 'Graciosa', it is slower growing than its parent. Narrow when young, it broadens with age. Winter brings bronze tones to the tips of the yellow foliage for a nice seasonal change. Tolerates full sun but flourishes in partial shade as well. Well-drained soil is a must. Garden Size: 6'H x 4'W Intermediate: 3-6²/year Broad Upright Zone 5 Yellow

Dwarf Conifers

obtusa 'Nana' *Chamaecyparis obtusa* 'Nana', introduced in 1867, remains a highly regarded industry standard. Superior features explain the reason: tightly cupped fans of dark green, highly congested foliage form a dense, miniature mound that contributes beautifully to small-scale plantings, including rock gardens, troughs and container gardens. Reliable year-round performance and very slow growth assure that 'Nana' will retain its claim to fame. Garden Size: 2'H x 2'W Dwarf: 1-3"/year Globe Shaped Zone 5

obtusa 'Nana Lutea' The golden yellow *Chamaecyparis obtusa* 'Nana Lutea' has the same superior features as C.o. 'Nana Gracilis' with the addition of vibrant new growth. The compact, slow-growing small tree has an irregularly rounded form developing into an upright broad habit as it ages. Dense, golden sprays of foliage become brighter in more open settings. A valuable option for year-round garden color, it prefers some protection from harsh summer sun and desiccating winds. Garden Size: 4'H x 3'W Dwarf: 3-5"/year Broad Upright Zone 5 Yellow

obtusa 'Thowell' A slow grower, *Chamaecyparis obtusa* 'Thowell' will make a great feature specimen in the garden when creatively placed for 360° viewing. Its small, deep green foliage and naturally sculpted narrow upright habit make it a unique and stately addition to the garden. Alone in a container, it may be a featured patio specimen. Garden Size: 6'H x 2'W Dwarf: 3-6"/year Narrow Upright Zone 5

pisifera 'Blue Moon' The bright steel blue foliage of *Chamaecyparis pisifera* 'Blue Moon' adds a special color element to the garden, featuring short stiff branches covered with juvenile foliage that develop into a tight, compact ball with minimal shearing required to maintain its tidy form. 'Blue Moon' can be planted as a single color accent or in groupings for bright blocks of color. An excellent choice for foundation plantings also. Grows best in full sun with moist, well-drained soil. Garden Size: 4'H x 4'W Dwarf: 3-5"/year Globe Shaped Zone 4 Blue

pisifera 'Cumulus' Tufts of needle-like, juvenile foliage give this rounded, bluish green selection its airy character, even when mature. Reminiscent of puffy clouds, the delicate choice adds a reliable element of soft texture to tight garden spaces. *Chamaecyparis pisifera* 'Cumulus' stays small without pruning and its foliage is most dense when grown in full sun. Particularly useful for container, trough or rock gardens and other small sites. A fun choice for miniature topiary. Garden Size: 1.5'H x 1.5'W Dwarf: 1-3"/year Globe Shaped Zone 4 Bluish Green

pisifera 'Golden Mop' The finely textured, sunny foliage of the winning *Chamaecyparis pisifera* 'Golden Mop' develops vibrant new spring growth that retains its brilliance and shines in the garden all year. Well-behaved, compact and hardy, the low, mounding conifer makes a versatile addition to border, bank or foundation. It produces best color in full sun and performs even in areas challenged by heat and humidity. Garden Size: 8'H x 8'W Intermediate: 3-6"/year Globe Shaped Zone 4 Yellow

pisifera 'Tsukumo' Ideal for the smallest site, *Chamaecyparis pisifera* 'Tsukumo' is a rounded bun that almost doubles as a mossy green rock. It has dense, finely textured green foliage and grows so slowly that it won't outsize a trough or rock garden. The compact cushion, which is hardy, tough and resilient, is wider than it is tall. Occasionally, short feathery plumes will sprout out among the fine foliage, adding character and dimension, or may simply be removed to maintain the most compact, tiny mound. Garden Size: 1.5'H x 1.5'W Miniature: 1-3"/year Globe Shaped Zone 4

ILEX From the whole host of *Ilex* species, we have chosen these few cultivars for their small, dense evergreen foliage and unusual habits. These dwarf, ornamental plants make great companions for other plants, where they punctuate garden scenes with their fine texture and

Dwarf Conifers

tight forms. Give plants well-drained soil, rich in humus and grow in sun to partial shade.

crenata 'Sky Pencil' A tall, slender, female holly with a distinctive, upright habit, *Ilex crenata* 'Sky Pencil' makes an attractive structural feature in perennial garden or container, or it makes an unusual, slow-growing hedge. Dark green, glossy leaves are small and rounded. From Japan, by way of the U.S. National Arboretum, this selection should be about 5' tall and less than 1" wide in 10 years, but it can achieve 10" in time. Garden Size: 10'H x 3'W 6-10"/year Narrow Upright Zone 5

JUNIPERUS Native ranges of juniper span much of the northern hemisphere, from the Arctic to China, tropical Africa and the mountains of Central America. This could explain the versatility and variety of the genus, which is among the most useful of conifers. Diverse growth habits and colorful seasonal foliage guarantee that there is a juniper suitable for nearly every landscape situation. Most are extremely cold hardy and resist pollution. We offer selections chosen for striking colors, superior habits and interesting shapes. These adaptable plants enjoy well-drained soil and full sun.

chinensis 'Shimpaku' This versatile, vase-shaped *Juniperus chinensis* 'Shimpaku' develops upright, fountain-like branches that are covered in robust, green, awl-shaped foliage. Appreciated by bonsai enthusiasts for an irregular form and exposed, peeling bark, it also makes an interesting addition to container arrangements and garden beds. Garden Size: 3'H x 6'W Dwarf: 3-6"/year Spreading Zone 4

communis 'Compressa' Resembling an elegant, tapered candle with silvery, blue-green foliage, *Juniperus communis* 'Compressa' makes a superior, vertical accent, especially in containers, the rock garden and other small spaces. Its dense, vertical branches grow very slowly and stay in perfect scale with other choice rockery plants. Garden Size: 3'H x 1'W Dwarf: 2-4"/year Narrow Upright Zone 4 Bluish Green

horizontalis 'Gold Strike' The spreading, vivid yellow foliage of *Juniperus horizontalis* 'Gold Strike' creates a bright, cheery spot in the garden throughout the year. In spring, brilliant new growth freshens up the chartreuse interior foliage and continues the sparkling display through fall, when the look gradually softens with coral tones. The low, somewhat mounded, seedling selection from J.h. 'Mother Lode' performs best grown in moist, well-drained soil and protected from scorching sun. Garden Size: 6'H x 3'W Dwarf: 2-4"/year Prostrate Zone 3 Yellow

horizontalis 'Mother Lode' *Juniperus horizontalis* 'Mother Lode' has bright, golden yellow foliage in spring and summer which transitions to rich, burgundy plum undertones during the winter giving this extremely flat, ground-hugging juniper long-term garden interest. Discovered at Iseli Nursery in 1982 as a sport on J. h. 'Wiltoni', it performs admirably in full or partial sun. Let it cascade over a bank, define a mound, or cover ground planted in masses. Use with other colorful plants for an exciting statement in the garden. Garden Size: 6'H x 4'W Dwarf: 3-5"/year Prostrate Zone 3 Yellow

x pfitzeriana 'Golden Joy' *Juniperus x pfitzeriana* 'Golden Joy' is new cultivar from Wiel Linssen of Holland that offers improvements over other golden junipers. For one, its yellow is brighter than other available options and it maintains the brilliant color throughout the year. In addition, it is easy to grow and has a classic spreading and compact form. It grows more slowly, too, so it will stay beautiful and maintain a manageable size for years. Garden Size: 3'H x 6'W Dwarf: 3-6"/year

OSMANTHUS These cultivars of Japanese False Holly (*Osmanthus heterophyllus*) become wonderful medium-size, evergreen shrubs. They grow predictably into attractive plants that are both striking and tough as nails: the holly-like leaves on the shrubs bear bright splashes of color, and the plants, of Asian origin, are durable and easy to grow. Use them to anchor

Dwarf Conifers

dramatic container arrangements or use them in garden settings as attractive accents or low hedges. These generally pest-free plants are quickly gaining popularity, because of their considerable resistance to browsing deer.

heterophyllus 'Ogon' The yellow foliage of *Osmanthus heterophyllus* 'Ogon' has a wonderful, waxy sheen that gives it a classy character. Wider than tall, it grows very slowly and produces a wonderful, warm glow in the garden bed, border or container, given appropriate conditions. It performs best in partial shade, protected from blazing sun, drying winds and air pollution. A large, curvy cluster makes an eye-catching garden feature that resists grazing deer. Garden Size: 4'H x 4'W 3-5%/year Globe Shaped Zone 6 Yellow

PICEA The genus *Picea* (spruce) offers so much variety in size, shape, color and landscape use that it is easy to believe one or more choices will fill any imaginable garden need. Distinctive cultivars from 13 species include a range of color choices: blue, green, gray, gold, yellow, silver, white and combinations. They include a range of size, from very small (miniature) to very tall (large), and a range of shape, from low, spreading domes to upright, broad majesties, from radically prostrate forms to weeping towers. Whatever the design need, we offer the best selections, plants proven to be beautiful garden assets, with hardiness and climate adaptability for areas as diverse as Georgia and the coldest parts of the US and Canada.

abies 'Tompa' Fresh green needles and a compact habit make the slow-growing *Picea abies* 'Tompa' a great choice for smaller landscapes and rock gardens. Its wide, conical shape resembles the well-known Alberta Spruce for which it is a superior alternative. Garden Size: 3'H x 2'W Dwarf: 2-4%/year

glauca 'Blue Planet' *Picea glauca* 'Blue Planet' is covered with some of the tiniest needles on the planet—this miniature bun is a reliable choice for tight garden spaces. The short, thin needles have a slight blue cast which complements the true greens and blues in the landscape. Excellent selection for the railway garden, troughs, and rock garden. Expose to full sun in moist, well-drained soil. Garden Size: 1'H x 1'W Miniature: 1-2%/year Globe Shaped Zone 4 Bluish

glauca 'Jeans Dilly' *Picea glauca* 'Jean's Dilly' (pronounced "John's") this extraordinary, Alberta-type selection bears the name of dwarf conifer pioneer Jean Iseli. 'Jean's Dilly' was named by his brother, Andre', to note the plant's remarkable qualities. Much smaller, denser and slower growing than other Alberta types, its short, fine needles display a distinctive twist during the growing season. Spring growth starts about 3-4 weeks later than P.g. 'Conica's'. Found at Iseli Nursery in 1981, this signature plant is a fitting choice to honor the co-founder of Iseli Nursery. Garden Size: 3'H x 1'W Dwarf: 2-4%/year Narrow Upright Zone 4

glauca 'Pixie Dust' Extremely dense, compact and slow growing, the miniature selection, *Picea glauca* 'Pixie Dust', resembles P.g. 'Conica' in form, but offers a special feature. When the second flush of growth emerges in summer, the new tips are yellow, a surprising effect that contrasts dramatically with the deep green, mature foliage. Chosen by the American Conifer Society as 2006 Collector's Conifer of the Year, this adaptable cultivar produces a magical effect in trough, container or rock garden. Provide ample moisture and full sun for the best color on this sport of 'Pixie' that was discovered at Iseli Nursery. Garden Size: 1.5'H x 6'W Miniature: 1-3%/year Narrow Upright Zone 4 Green/Yellow

SALIX Willows come in a variety of forms from large trees to small deciduous shrubs. All thrive in moist soils and will tolerate poor drainage. Not all have the fuzzy male catkins commonly known as pussy willows, but have other features including branch work and leaf color to make them appealing in the landscape.

candida 'Silver Fox' *Salix candida* 'Silver Fox' is a fantastic, small shrub valued for its

Dwarf Conifers

outstanding, small silver leaves. The compact, deciduous shrub has dramatic yellow winter buds and twigs. Since it is a wetland plant, it is suited to rich, wet soils and cool temperatures. In the Pacific Northwest, it is perfectly content as a container or garden foliage plant. Dress up a boggy site with a splash of silver. As yet untested in warmer regions. Garden Size: 3' H x 3' W 2-4?/year Globe Shaped Zone 3 Silver

TAXUS Yew is the well-known, adaptable garden standard that conforms well to shearing and shaping, is easy to grow, durable and shade tolerant. The selections grown by Iseli Nursery share these characteristics; in addition, they are unusual and uncommon, unique and rare. Green or golden, dwarf or mid-size, these pest-free yews will grow on you. Ample moisture and rich soil produce best results.

cuspidata 'Nana Aurescens' New growth on *Taxus cuspidata* 'Nana Aurescens' bursts on the scene like a splash of brilliant goldenrod. Since second-year foliage goes dark green, each year's new growth makes another dramatic splash of color when it emerges. The shade tolerant, adaptable, colorful conifer has a wider-than-tall, spreading habit. Garden Size: 2' H x 8' W Dwarf: 3-6?/year Spreading Zone 4

THUJA *Thuja occidentalis*, known as Arborvitae or "tree of life," and *Thuja plicata*, the Western Red Cedar, are hardy, durable and adaptable conifer species that develop great natural variation, resulting in many new and exciting cultivars. These minimal-maintenance plants, available in many colors, shapes and growth rates, perform well in a variety of garden situations, from screens and hedging to distinctive focal points. Both species tolerate some shade and a wide range of soil types, and *T. plicata* shows some resistance to deer.

occidentalis 'Jantar' *Thuja occidentalis* 'Jantar' is an exciting new brilliant yellow beacon from Poland that Iseli Nursery is proud to offer as part of our plant line. The eye popping yellow on this version of Emerald Arborvitae becomes a warmer amber tone during winter, hence the name "Jantar", Polish for amber. With the same narrow upright habit as its popular green parent this selection will add dramatic color to the landscape as a focal plant or privacy screen. Selected by Jakub Jablonski of Poland and introduced to the U.S. by Breederplants. Garden Size: 15' H x 3' W Intermediate: 6-12?/year Narrow Upright Zone 4 Yellow

occidentalis 'Primo' Rich, deep green summer color combines with the compact textural foliage and naturally sculpted spire-like shape making this new selection an unexpected breakthrough for the hardy common Arborvitae. With a muted green winter color, a very young tree has proportions perfect for mini-scapes or container gardening. As it ages, an elegant small tree develops. The natural character as a specimen is the finest quality a conifer can offer the landscape in either cold or moderate climates. Primo! Garden Size: 4' H x 1' W Dwarf: 3-5?/year

orientalis 'Franky Boy' Filaments of lemon yellow foliage jutting out from a lime green interior move an sway with the slightest breeze creating an airy texture and great color contrast to other garden plants. You can have the effects of ornamental grasses without winter die-back. Light shearing will encourage a formal, compact form and provide a proliferation of bright and colorful foliage. Plant *Thuja (Platyclusus) orientalis* 'Franky Boy' full sun for best color. Garden Size: 6' H x 4' W Dwarf: 3-6?/year

plicata 'Whipcord' The unusual foliage on this low, mop-head-like plant consists of long, thick, glossy tendrils that suggest Independence Day fireworks. Unlike the species, which is a giant forest tree, the many branches of *Thuja plicata* 'Whipcord' seem to explode upward and send sparks cascading in all directions. Green in summer, the foliage changes to bronze in winter, matching the richly colored wood. Every garden can accommodate the small, dynamic conifer (only about 5' tall and 4' wide) that demonstrates some deer resistance. Found in a seedbed of Western Red Cedar at Drakes Crossing Nursery, Silverton, Oregon. Garden Size:

Dwarf Conifers

4'H x 4'W Dwarf: 3-5%/year Globe Shaped Zone 5

TSUGA Hemlocks comprise a genus of graceful, finely textured evergreen trees, from which we offer an exciting assortment of garden-worthy cultivars from five species. These elegant selections, many of them dwarf and slow growing, perform best in cool, moist northern climates, where they tolerate shade and appreciate well drained, acidic soil. Choice cultivars offer a range of options: brightly colored foliage, some with frosty tips; pyramidal, mounding and irregular shapes; and sizes for small and large spaces. They also respond well to shearing.

canadensis 'Coles Prostrate' An outstanding, underutilized hemlock, *Tsuga canadensis* 'Coles Prostrate' is a spreading cultivar with stiff main branches that knuckle under and bend downwards to create a truly prostrate form. Gnarly interior branches show off the plant's silver bark, which adds dimension to the exceptional, low plant. Use the garden gem to drape over or around stones or walls in a site with partial shade. Alternatively, stake the plant for some height to create all kinds of interest. Garden Size: 6'H x 4'W Dwarf: 3-5%/year Prostrate Zone 4

canadensis 'Horsford Contort' Tiny needles grow thickly along the twisted branches and coiled, contorted branchlets of this unique, surprisingly attractive tree. The curious branching pattern accounts for the plant's nickname "Pig Tails", which accurately describes the look of *Tsuga canadensis* 'Horsford Contorted'. Site the conversation-piece plant in a container or near patio-seating for fun. Garden Size: 3'H x 2'W Dwarf: 2-4%/year Broad Upright Zone 4

canadensis 'Moon Frost' Bright, white, new growth with older, inner foliage that retains a light tone combine to give *Tsuga canadensis* 'Moon Frost' a distinctly white appearance. In winter, foliage of the seedling, developed by Ed Wood, takes on a blush of pink. A compact globe when young, 'Moon Frost' broadens and increases its growth rate with age, but remains a reliably small, dwarf plant. Garden Size: 6'H x 6'W Dwarf: 3-6%/year Globe Shaped Zone 4

ULMUS parviflora 'Hokkaido' (Dwarf Chinese Elm) Everything about *Ulmus parviflora* 'Hokkaido' is tiny: tiny leaves cover tiny twigs and create a full size plant of tiny dimensions. Naturally congested growth and a stocky trunk give this small tree the appearance of age, a quality valued in miniature landscapes, railroad gardens and bonsai. The plant develops thick, corky bark with age. Site it in full to partial sun with moist, well-drained soil. Don't over water in winter, and don't let it dry out or scorch in intense summer sun. Garden Size: 1'H x 1'W 1-2%/year Broad Upright – Small Zone 5

CLIMBING While no rose is a true climber, these produce long canes which can be trained on fences, trellises, and walls. We offer only repeat-blooming varieties that flower on both old and new wood. Zone 5-9, unless otherwise noted.

'Climbing Iceberg' A long-lived, flower-happy climbing rose, bearing sprays of medium-sized, white flowers. Very continuous flowering. Light, sweet fragrance. Vigorous, bushy growth. Requires less light than most climbers. H 12', Zone 4-9. 1968

'Don Juan' Large, double blooms with velvety red rose petals. Intensely fragrant flowers appear single or in clusters with a lovely tea shape. Profusely blooms in early spring, and moderately, thereafter. Orange hips appear in the fall adding extra interest and food for the birds. Needs lots of room. 8-13', 1958.

'Eden' Large, old fashioned, fully double 4 1/2", cupped blooms (petals 100). The blooms are an unusual blend of pastel pinks, creams and yellows. Vigorous bushy, disease-resistant plant. A versatile repeat blooming climber. H 8-10' x 6'. 1997.

'Fourth of July' A large-flowered rose, featuring profuse clusters of sweetly scented, semi-double blooms (to 4.5" dia.) which are red and white striped. Repeat bloomer. H 10-14',

Roses

1999

'New Dawn' One of the most popular climbers! Medium sized, silvery blush-pink flowers, are produced in attractive clusters. Sweet, fruity fragrance. Shade tolerant, 10-15 ft., Zone 4-10, 1930

'Skys The Limit' This rose is hardier and more disease resistant than most other yellow climbing roses. It bears heavy, repeat flushes of large 3 1/2" buttery blossoms with a fruity fragrance. 10'-12'. 2007

'Tropical Lightning' Here's a color combo that is rarely seen in climbing roses. Deep, smoky orange roses are streaked in creamy yellow and feature a soft blush of coral with hints of purple in the mix. Exhibition-quality variety that bears nicely pointed fragrant blooms, and plenty of them. From late spring to fall, abundant clusters of 3-4 double roses. H 8-10', Zone 4-9. 2016

'Zephirine Drouhin' (Antique) A climbing Bourbon that may be the most consistently blooming, large flowered climbing rose, with the added benefit that it is thorn-less. The 4" blooms (petals 16) are deep rose-pink, fragrant, and produced in great quantities on a continual blooming bush. H 10-12' x 6', 1868.

DAVID AUSTIN'S ENGLISH ROSES After fifty years of intensive breeding, David Austin's English Roses combine the forms and fragrances of old roses with the repeat-flowering of modern roses. They are very easy to grow, healthy and reliable. English Roses may be grown as magnificent, shapely shrubs or trained as short climbers. Zone 5-9

'Charlotte' The blooms start off beautifully cupped, later opening out to form a rosette shape. Medium-strong Tea Rose fragrance. For those with particularly cold winters, one of the hardiest. 4 ft. x 3 ft.

'Grace' Highly Fragrant! An outstanding garden plant producing many charming, pure apricot rosettes. Delicious, warm tea fragrance. Very healthy and repeat flowers extremely well. H 4' x 4', 2001.

'Graham Thomas' The tea-rose fragrance will drift through your garden from these cup-shaped rich yellow blooms. Modern bush or climber, 5-10'X5-10'. 1983

'Jubilee Celebration' Rich salmon-pink with tints of gold on the underside of the petals. Very fragrant. Modern bush, 4'X4'. 2011.

'Lady of Shalott' The buds are a rich orange-red changing to salmon pink on the upper side with a golden-yellow reverse. Forms a large, bushy shrub with slightly arching stems. 4'X3.5'. Zone 5-10

'Munstead Wood' The buds are a light crimson and as the flower opens the color becomes deeper and more intense. Very fragrant. Modern bush, 3'X3'. Zone 5-10.

'Olivia Rose Austin' Pink flowers that have a strong fragrance with fruity hints. 3.5' x 3'. Very disease resistant. Named after David Austin's granddaughter.

'The Alnwick Rose' Pretty rich pink buds open to deeply cupped blooms of soft pink in color with paler edges repeatedly throughout the summer into autumn. Old Rose fragrance with just a hint of raspberry. 4'x3', 2001

FLORIBUNDA Floribunda roses are ideal for borders or containers. With a cluster of flowers topping each stem, Floribunda roses provide an almost constant show of color, and bloom more freely than hybrid teas and grandifloras. Zone 5-9

'Angel Face' Exceptionally Fragrant! Clusters of deep-lavender semi-double (3.5") ruffled blooms with a ruby blushed edge. Continual blooming rose. H 3' x 3', 1968.

'Brilliant Pink Iceberg' Long pointed buds open to rich cerise-pink petals with creamy accents. A mild honey fragrance. This shrub blooms continuously and heavily over the season.

Roses

Very disease resistant. Modern bush, 3-5'. 2001.

'Burgundy Iceberg' Bred for hardiness and exceptional disease-resistance, this prolific bloomer has deep wine-purple blossoms. A compact variety that makes a perfect specimen in the smaller garden. Honey fragrance. Modern bush, 4'. 2003

'Easy To Please' A lovely, easy to grow rose, that repeat blooms all summer long! This fuchsia pink rose produces clusters of perfectly shaped blooms with an intoxicating clove and cinnamon fragrance. Disease resistant. H 3-4' x 3-4'. 2017

'Ebb Tide' Dusky deep purple buds with a swirling center open into very double, old fashioned 3 1/2" flowers. So intensely clove scented that you could lose your balance while enjoying it. Repeat bloomer. H 4' x 4'. 2004

'Julia Child' Personally chosen by the award winning chef herself, this rose combines old fashioned style with a delicious licorice fragrance. It features fully petaled butter-gold flowers, and a rounded, compact habit. 3-4', Zone 4-9, 2004.

'Sexy Rexy' Just about the most profuse blooming rose. Clusters and sprays jam-packed with perfect, camilla-like pink 3 1/2" blooms. This is a fabulous continual blooming compact bush, very vigorous. H 3' x 2.5', 1987.

'Sparkle and Shine' This intensely colorful rose descends from noted award winning roses Julia Child and Sun Flare. Clusters of brilliant yellow blossoms compliment a rounded and bushy plant. Blooms resist fading and disease resistance is strong. H 3-4' x 3-4'. 2011.

GRANDIFLORA Tall elegant plants that bloom repeatedly during the season, they generally feature clustered blossoms with stems which are slightly shorter than those of hybrid tea roses. Zone 5-9

'Annas Promise' Anna's Promise was named after Downton Abby's head housemaid, Anna Bates, and shows off blooms with a pink blush and copper reverse with a strong grapefruit and apple scent. Blooms throughout the season. Modern bush, 5-6'X4'. 2013

'Easy Elegance Sweet Fragrance' Buds of coral and orange with a deep yellow base swirl open to full, fragrant, apricot blossoms. Blooms mature to salmon-pink, adding interest with the range of colors. Long stems are perfect for cutting. Disease resistant. Own root. H 2-4' x 2-3'. 1991

'Queen Elizabeth' Pink, moderately fragrant, large 3-4" ruffled flowers, in small clusters. Blooms in flushes throughout the season. Tall, bushy and thornless (mostly), 5-10'X 2-3'. 1954

'Strike It Rich' Elegant buds of deep, golden yellow swirled with ruby red on long stems. Long lived flowers retain their color. Strong sweet spice fragrance. 5-6'.

HYBRID TEAS Hybrid Teas Roses are tall, elegant plants producing the classic long-stem rose with individual blossoms and flower repeatedly during the season. Hybrid Tea Roses are a Cultivar Group of roses, created by cross-breeding two different types of roses.

'Peace' Said to be the most popular rose of the 20th Century. 'Peace' has very fragrant, double, 6" flowers of a light yellow to cream color, slightly flushed at the petal edges with crimson-pink. A vigorous, strong bush. Continually blooming. 4'X3'. 1945.

'Sedona' Large coral blend blossoms with a strong pear scent. Early Spring blooms to 5 inch in size. Modern bush, 5'. Zone 5-9. 2010

KNOCK OUT SERIES These roses were developed by William Radler, a Wisconsin botanist, who was looking for a hardy, disease resistant rose bush. What he developed was a rose with stunning flower power, an easy to grow bush that will bloom from early spring untill frost. The most disease resistant rose on the market today! These will grow to 3' high and stay in a relatively tidy mound. No special care required! Zone 4-9

Roses

'Double Knock Out' Double-red petal power.

'Double Pink Knock Out' Clusters of one to five 3 1/2" bubble-gum pink, double flowers. Light tea rose fragrance. 3-4'X3-4'. 2006.

'Knock Out' Tidy shrub with cherry-red blooms.

'Pink Knock Out' Single petals in a beautiful shade of bright pink.

LANDSCAPE Landscape Roses are selected from a variety of classes, based on their ease of care. Landscape Roses are disease-resistant, require little pruning, grow quickly to fill a space and provide a long seasonal show of color. Most Landscape Roses are grown on their own root. Zone 4-9

'Bonica' This variety bears dainty clusters of small to medium-sized, rose pink flowers, with a light fragrance. If the flowers are not dead-headed they will be followed by a wonderful crop of bright red hips, which last long into the winter. Hardy, repeats well and has little disease. H 4' x 5'. 1981

'Carefree Sunshine' Carefree Roses have outstandingly disease-resistance. Clear yellow, single blooms appear in abundant clusters from spring to fall. Continual Bloom, 4x4, 2001

'Carefree Wonder' This easy to grow rose produces semi-double cupped blooms of china-pink with a creamy white reverse. A disease-resistant compact bush that blooms continually. 4x3', 1990

polyanthas 'The Fairy' One of the easiest roses to grow, this old-fashioned charmer produces sprays of small, double-pink flowers through first frost. Compact, bushy, 2 1/2'X4'. Zone 5-10. 1932

rugosa 'Linda Campbell' Features fragrant, bright red, semi-double blooms (to 3" across) in clusters of 5-15 blooms. Flowers in June and throughout the summer with an excellent repeat. Nearly thornless, good for hips. H 6' x 6-8', 1991

rugosa 'Purple Pavement' Large, ruffled blossoms with a purple-red color and strong fragrance. In the fall, the blossoms turn to large hips, and the foliage turns to shades of yellow and maroon. Repeat bloomer. Hardy bush, 3-6'X3-6'. Zone 3. 1986

'Sea Foam' A compact shrub that produces a large number of double creamy-white, 2.5", blooms. Many rose growers have also found this variety useful as a ground cover when trimmed properly. H 2-3" x 6'. 1964

BASIL *ocimum basilicim* Wonderfully aromatic foliage on a bushy plant. Leaves are used in cooking and teas (digestive aid). Some basil is grown for their ornamental value. Prefers full sun and rich, well-drained soil. Annuals

'Amethyst' The darkest purple basil available with ample, flavorful leaves. Nice thick turned down leaves like the classic sweet genovese. 60 days .

'Boxwood' This compact, small-leaved herb looks like a typical boxwood, and makes a highly ornamental and fragrant edging for the patio or a container by the patio door. Perfect for your fresh or cooked culinary dishes. H 12 to 16".

'Spicy Globe' Very compact (6" high, 12" around) and mound forming, ideal for containers. Intense, spicy flavor packed in tiny spicy leaves.

'Sweet' Perhaps the most popular and widely used culinary herb. It is a tender annual, aromatic plant with a spicy odor and flavor. We grow a couple of different 'sweet' varieties dependent upon the time of the season and the weather conditions. They are compact, 12-14", will thrive well in containers and the garden.

'Sweet Mammoth' 'Sweet Mammoth' has a much stronger, fuller flavor than 'Genovese' sweet basil. Huge leaves, growing as big as your hands, are perfect for sauces, pesto and even fresh on a sandwich. Great for pots and growing indoors, plants have a shorter habit. H

Herbs

15-20"

'Thai Cardinal' Thai basil with larger leaves. Flat, 2-3" long leaves that are larger than typical Thai types; purple stems and dark, purple-red flower bracts. Cinnamon/clove flavor with hints of anise. Slower growing and slow to bolt. Has demonstrated very good downy mildew tolerance. 80 days

BAY SWEET *laurus nobilis* An aromatic, evergreen shrub with shiny green leaves favored in Italian cooking. Grown in containers that can be brought indoors to overwinter. Full sun to partial shade and average, well-drained soil. Tender perennial.

BORAGE *officinalis* 'Herb of Gladness' This herb is usually associated with good spirits and well being. An airy plant with thick soft hollow stems to 3' and decorated in an abundance of star-shaped wedgewood blue flowers with black anthers. The bristly leaves when chopped have a refreshing cucumber-like flavor and aroma. The flower is a nice addition to summer salads or they float perfectly on the surface of summer drinks. Sun, average, well-drained soil. Annual, will reseed

CATNIP *nepeta cataria* A spreading herb with small, downy foliage that is admired by cats. Spikes of white flowers. Nice cut or dried flower and a useful tea (digestive aid, sleeping aid, general tonic). Full sun to partial shade and alkaline, well-drained, sandy soil. Perennial, 30"

CHAMOMILE ROMAN *anthemis nobilis* A low-growing carpet of feathery foliage bearing sweetly scented daisies used in teas and cosmetics. Full sun and light, dry soil. Perennial, 6"

CHERVIL 'Vertissimo' Slow bolting vigorous plants have a mild, sweet anise flavor. Popular for salads, micro mix and garnishing (related to parsley). Prefer cooler months of spring and fall but will tolerate part shade to full sun conditions. Average, well-drained soil. 60 days Annual

CHIVES *allium* Very pretty in an herb or perennial border. Grow for fresh taste, easily cut fresh when ready to use it. Full sun and average well drained soil. Perennial, 1'

'Geisha' (Garlic) Clumps of grassy foliage with a mild garlic flavor. Pure white edible flower heads appear in the late summer.

'Onion' Clumps of grassy foliage with a mild onion flavor. Lovely pink edible flower heads appear in the spring and are long lasting.

CILANTRO-CORIANDER *coriandrum sativum* Leaves are used in Mexican cuisine, seeds are used in Asian and Indian cuisine. Strong flavor, easy to grow in full sun to partial shade and average, well-drained soil. 3rd best selling herb behind Basil and Parsley. Annual, 2'

DILL FERNLEAF *anethum graveolens* Compact form. Flat umbels of yellow flowers atop feathery foliage. Leaves and seeds are used in cooking. Harvest seeds before they are fully mature. Full sun and average, well-drained, moist soil. Annual, 18"

FENNEL *foeniculum vulgare* Fennel is a lovely herb that can be used for many different types of gardens. Try growing it in your garden, medicinal garden and simply for attracting butterflies to your garden, also stunning as a backdrop or focal point. Full sun, average well drained soil. Annual.

'Orion' (Florence) Feathery, green foliage on this dwarf, bulb forming variety. Excellent sliced in salads or sauteed as a side dish. Bolt resistant. 1-2'

'Purpurescens' (Bronze) Feathery, bronze foliage with seeds that are licorice flavored and

Herbs

used in cooking. Seeds aid in digestion. An herb with great ornamental value. 5'

GARLIC A strong-smelling pungent-tasting bulb, used as a flavoring in cooking and in herbal medicine. The plant, closely related to the onion, that produces a bulb.

LAVENDER *lavandula* An ornamental, aromatic herb famous for its enchanting scent and everlasting flowers above silvery foliage. Lavenders may overwinter if given very well-drained, sweeter soil (added lime) and a protected spot (near a stone wall, foundation, etc.) Cultivate in a generous amount of lime twice a year. They prefer full sun and alkaline, well drained soil. Zone 5

angustifolia Also known as Fragrant Lavender or English Lavender (although not native to England). Very fragrant, yields an essential oil which can be used in salves, perfumes etc..

'Hidcote' Compact bushy shrubs that bloom mid-summer with deep purple spikes. 12-16".

'Super Blue' Large rich blue blooms on short flower spikes all summer. Excellent heat and cole tolerance with exceptional landscape performance. H 10-12".

'Sweet Romance' This new lavender has deep blue flowers and a great compact growth and flowering habit, as well as an extended season of flowering. 12-18"

intermedia A cross between *L. angustifolia* and *L. latifolia*, producing larger rounded, branching shrubs. July-August.

'Phenomenal' In trails this has been one of the hardiest lavenders seen throughout Europe and the U.S.. 'Phenomenal' is said to have excellent winter survival. Tolerance to heat and humidity and resists common root and foliar diseases. Silvery foliage, elegant flower presentation and irresistible fragrance. Both ornamental and edible. H 24-32".

'Provence' One of the hardiest and most fragrant Lavenders. Used in France's perfume industry. Attractive to bees, butterflies and hummingbirds. A large cultivar, 2-3; tall and wide.

LEMON BALM *melissa officinalis* A coarse, bushy relative of the mints with green leaves and clusters of white flowers. The leaves have a strong lemon scent and flavor and are used in teas (mild sedative), cooking, and potpourris. Full sun to partial shade and average, soil. Perennial, 18-24"

LEMON GRASS *cymbopogon flexuosus* 'East Indian' A clump-forming grass with lemon scented leaves used in teas, Asian cuisine, and potpourris. Thrives in moist soil and full sun. Overwinter indoors. Tender perennial, 2'-4'.

LEMON VERBENA *aloysia triphylla* A leggy subshrub with wonderfully aromatic, lemon-flavored leaves used in teas, cooking, and potpourris. Cut back to encourage branching. Overwinter this tender, deciduous plant indoors. Full sun and rich, moist soil. Tender perennial 3-4'

MARJORAM *origanum* 'Sweet' Marjoram is a tender perennial which forms a dense mound. The small, grey-green, aromatic leaves are used in cooking. The flavor is similar to Oregano, but milder and sweeter. Grow as an annual or overwinter indoors. Full sun and light, dry, well-drained soil.

MINT *mentha* An easy to grow perennial with a wide variety of scents and flavors. Many are spreading and invasive, so choose their spot in the garden with care. Use root barriers or grow in containers. All may be used in teas and cooking. Mints prefer full sun to partial shade and rich, moist, well-drained soil. Poor soils will slow the spreading growth of most mints. A potential groundcover for difficult areas, can be mowed regularly. Zone 4

Herbs

piperita

'**Chocolate**' Delightful 'Peppermint Patty' scent! Wonderful flavoring for deserts or to pop in a glass of water. H 18-24"

'**Peppermint**' A powerful peppermint flavor and aroma. Contains menthol, which is used medically as a digestive aid. H 8-15".

spicata 'Kentucky Colonel' (Spearmint) A larger green leaved variety with extra strong flavor. H 2-3'

villosa 'Mojito Cocktail' This is the true mint used in Mojitos; it's more mild in flavor and scent than some other mints. H 12-18"

OREGANO *origanum vulgare* A large and varied genus of aromatic, perennial herbs. Oregano forms mounds of foliage covered with numerous flowers. Greek Oregano is the best for culinary purposes. The others may be used, but have a mild flavor. All are attractive garden plants. Grow in full sun and well-drained soil.

'**Golden Creeping**' Forms a carpet of golden-yellow leaves. A nice ground cover or container plant. 6"

'**Greek**' The best culinary Oregano. Strong flavored, dark green leaves and white flowers. 18"

PARSLEY *petroselinum crispum* A biennial with nutrient rich, dark green leaves. Useful in cooking and as a breath freshener. Full sun to part shade, average soil.

'**Giant of Italy' (Italian)** Flat leaves with strong flavor. Best parsley for drying. 1'

'**Moss Curled**' Decorative, curly leaves with mild flavor. 8-12"

ROSEMARY *rosmarinus officinalis* A tender perennial (Zones 7-9), evergreen, shrubby herb with needle-like foliage. Rosemary is a popular culinary herb, use fresh, frozen or dried. Prefers full sun and well-drained, alkaline soil. Drought and heat tolerant. Rosemary is tender in our climate so overwinter indoors in a cool but sunny location. If growing in containers, use a porous soil mix and do not over water.

'**Huntington Carpet**' Vigorous trailing habit with exceptional dark blue flowers. A much sought after ornamental selection. 3-6" high, 2' spread

'**Tuscan Blue**' Bushy, upright and spreading. Large leaf; bright lavender-blue flowers. 3'

SAGE *salvia* A perennial with hairy, aromatic foliage and attractive, edible, blue flowers. Prefers full sun and well-drained soil kept on the dry side. Pretty enough for decorating the herb or annual garden, or in combination planters.

apiana 'White' Used to make smudge sticks in Native American ceremonies. Bushy plants with thick stems & dusty gray-green foliage. Can be used medicinally, as incense, and is great for bee and wildlife forage. Tender perennial, 16-36"

elegans Also described as 'Hummingbird Highway', native to Mexico, these pineapple sages have both aromatic and culinary uses. Tender perennial.

'**Honeydew**' Melon scented, heart shaped leaves on shorter stockier plant than Pineapple Sage. Earlier flowering in the same intense scarlet flowers. Hummingbird Magnet! 2-3'

'**Pineapple Golden Delicious**' A bright golden yellow leaved variety of Pineapple sage. These golden leaves set off the intensely colored red flowers which appear in late summer. 2'

officinalis These are small perennial evergreen subshrubs with woody stems grown for centuries for its food and healing properties. Also beautiful as an ornamental plant.

'**Berggarten**' A popular culinary sage with large, dark and wide leaves. 2'

'**Extrackta' (Common)** A culinary sage with narrow, green grey leaves and lovely blue

Herbs

flowers. Also used in fresh and dried flower arranging. 16-24"

'Purpurascens' (Purple) The purple foliage of this sage intensifies in cooler weather. 2'

SAVORY SUMMER *satureja hortensis* Bushy plants with upright stems lined with pairs of narrow, aromatic, peppery-thyme flavored leaves. It is a characteristic ingredient of "herbes de Provence", a standard mixture of dried herbs sold in most French food stores. It is also widely used as a seasoning for grilled meats and barbecues, as well as in stews and sauces. Good container plant. Grow in full sun and well-drained soil. Annual, 12-18"

STEVIA *rebaudiana* (Sweetleaf) The edible leaves are many times sweeter than sugar. Grows faster in hot weather. Small, white flowers in tight clusters. H 36"

TARRAGON FRENCH *artemesia dracunculus* Upright stems lined with aromatic, narrow, dark, shiny leaves. The sweet anise flavor makes this cultivar the best for culinary use. Particularly good with shell fish, fish, chicken and turkey. Full to partial shade and rich, well-drained soil. Perennial, 24-36"

THYME *thymus* Thyme is one of the best known and most widely used culinary herbs. It is quite easy to grow and is commonly found as a decorative as well as functional plant in many gardens. Thyme prefers full sun to partial shade and light, dry, well drained soil. Perennial.

citriodoros Many have mounding foliage, are edible and are very fragrant. Also, said to be deer resistant. If you would like to landscape with edible plants, these are a few to consider.

'Bertram Anderson' Compact, spreading with oval, fragrant, bright golden leaves.

Broad lemon scented leaves, it has small pink flowers in the summer. Very hardy. Can be used in teas. H 8-12", Zones 4-9

'Lemon Golden Upright' Intensely lemon scented foliage is green with gold variegation and a bushy upright habit. It has lovely lavender flowers, very decorative, and used in culinary ways. Not winter hardy. 6-10". Zone 6-8

'Mayfair' (lemon) A vigorous, low-growing lemon thyme that forms a dense carpet of lemon-scented foliage. Produces mauve blooms in late spring. .25-.5'H x .25-1'W. Zone 4-9

'Silver King' Brightest variegation of any white and green thyme. Lemon scented leaves. Pink flowers. Upright, yet slightly lax plant. Lovely in containers. 4", Zone 5-9

doerfleri 'Pink Ripple' Grown for its highly fragrant lemon scent. This plant has light green foliage covered with large upright flower-heads the color of cotton candy, early to mid summer. 4-6" tall, often used as a groundcover. Zones 5-9

'Highland Cream' A unique creeping thyme with bright cream and gold foliage with a touch of green in the middle. White to soft pink blooms in the summer. Likes good drainage. 2-4", hardiness uncertain. Zone 4-8

praecox The meaning of praecox is "very early". The following thymes will bloom early in the gardening season! All will make exceptional ground covers, for between pavers and edging.

'Albiflorous' (White Moss) Soft aromatic creeping foliage is covered with white flowers creating a snow-like effect in early summer. Plant near paving stones or pathways with light foot traffic. 2" Zones 5-8

coccineus (Creeping Red Flowered) A mat forming variety with tight, dark green foliage and tiny, dark rose flowers. Great for use between stepping stones. 2-4" Zones 4-8

'Minus' Dense, very low growing, dark green foliage. Superb among rock walls and walkways. Lavender pink flowers. 1" Zones 5-8

pseudolanginosus 'Wooly' Low growing "wooly mats" of silvery foliage on thin stems with rosy pink blooms. Needs good drainage. Great for pathways. 2" Zones 5-9

Herbs

serphyllum These varieties are low growing plants with tiny leaves, showing a fine texture. Creeping groundcovers native to Europe. Many thrive in hot, dry conditions.

'Elfin' Slow and flat growing, creeping groundcover reaches 1 inch tall and 6 to 10 inches wide. Super miniature silver-green foliage provides an interesting texture. Has tiny pink flowers in summer. Zone 4-9

'Magic Carpet' A low maintenance lawn alternative! This thyme forms a low 'carpet' of delicious lemon scented dark green leaves smothered in pink flowers from early spring through midsummer. Grows rapidly. 2" Zones 4-8

'Pink Chintz' Pink flowers float over a mat of grey-green foliage. Extra drought tolerant and long blooming. 1-2" Zones 5-8

unclassified 'Dot Wells Upright' A fast spreading bush -type thyme with lavender flowers. A popular culinary thyme, it is very hardy and has excellent flavor. 12" Zones 5-9

vulgaris The most common type of thymes.

'English' Grey-green leaves and mauve flowers on an upright plant. Very Flavorful! Best variety for culinary use. Tender perennial. 12-18"

'Wedgewood' Wedgewood Thyme is another larger leaved English-style thyme. Aromatic, semi-upright herb has small green leaves with chartreuse streaks and lavender flowers. Ideal for ground cover, edging or rock gardens. It also has culinary and medicinal uses. 11-12", Zone 5-9

ARTICHOKE 'Imperial Star' Firm, succulent fruit with mild, sweet flavor in late summer. Typically 6-8 mature buds are 3-4" in diameter. 85 days

ARUGULA 'Astro' Grown for its serrated or cut leaf type and its high yields. The slow-bolting, vigorous plants can be cut at the baby or mature stage. Astro has a distinctly nutty flavor and attractive medium green color. 38 days

BROCCOLI 'Green Magic' Summer-to-Fall broccoli has semi-domed, tight heads with medium-small beads. Widely adaptable. 57 days

BRUSSEL SPROUTS 'Jade Cross' Vigorous, extra-early, produces 1" sprouts with excellent flavor. Tolerates heat. 90 days

CABBAGE The only easily stored green vegetable. Delicious and nutritious. A very good source of dietary fiber, vitamins A, C, B6 and potassium.

'Ruby Ball' Firm, 6-8 inch round heads have a mild, sweet flavor and weigh a manageable 3-4 pounds. We have seen Ruby Ball stand unfazed in the garden for 6 weeks without splitting. 78 days

'Stonehead' Densely packed medium sized, green round heads averaging 4-6 inches. An excellent variety producing cabbage with creamy white hearts and lovely crisp texture. Compact variety useful for smaller garden spaces. Excellent holding capacity. Disease resistant. Matures in only 50 days.

CAULIFLOWER 'Snow Crown' The standard of early cauliflower. A vigorous grower with pure white heads up to 8" wide and weighing up to 2 lbs. 50 days.

CELERY 'Tango' Each smooth stalk of this early, productive celery is especially tender, sweet, and never stringy. Cut individual stalks for an extended harvest. 80 days

COLLARDS 'Tiger' A leafy green vegetable in the same family as cabbage, kale and broccoli. Many health benefits including cancer preventive properties, cholesterol lowering ability and antioxidant benefits. An excellent source of vitamins C, A, E and Manganese. Expect a crop of hardy, upright plants packed with slightly savoyed, thick, blue-green leaves.

Vegetables

'Tiger' stands out for flavor and high ratio of blade to stalk. Plants eagerly regrow. 20-25", 55-60 days

CUCUMBERS Warm temperatures and well-drained soil are essential for good growth. Some added lime is appreciated.

'Burpless Diva' A fantastic tasting AAS winner, 'Divya' is distinctly tender, crisp, sweet, bitter-free, and virtually seedless. Looks like a regular salad cucumber but with a much smoother, thin, no-peel skin. Does not require pollination to set fruit. Disease tolerant. 58 days.

'Gateway' (Slicing) A long, dark green, 8.5 to 9 inch, delicious cucumber that stands up to downy mildew and other diseases better than other slicers. Gateway's disease resistance package is unbeatable. 55 days

'Pickling Little Leaf' This high-yielding variety has distinctive bright emerald green fruit for salads and pickling. Short, space saving vines and small leaves provide easy visibility for harvesting. Pick fruits at a small size to maintain good color and shape. 57 days.

'Tyria' (English) Here is the English Cucumber you have all been asking for! A long European style, seedless cucumber, average 14" long, lightly ribbed, beautiful, dark green fruits. Bitter free. Trellis for straight fruits. 56 days

EGGPLANT Native to India and the Far East, plant when night temperature reach 55-60.

'Orient Express' Outstanding early productivity. Attractive, slender 8-10", glossy black fruits in the long Oriental style. Tender, delicately flavored, and quick cooking. 58 days.

'Satin Moon' The high quality flesh of the purple-black fruits has excellent flavor and a firm texture. Oval fruit up to 8", 50 days

KALE brassica oleracea Very nutritious and beautiful in the garden. High in Vitamin A, C, and thiamine. 50-65 days

'Lacinato' (Dinosaur) An Italian heirloom that dates back to the 18th century. Blue green strap like leaves are 3" wide by 10-18" long with heavily savoyed edges. Excellent flavor that is enhanced by frost. Best eaten when leaves are small and tender. 62 days from transplant.

'Mix' Sold in mixed packs of three tasty varieties: 'Red Russian', 'Lacinato', and 'Winterbor'. 30 days for baby, 65 days to mature.

'Prizm' Tender bite, nutty flavor. Densely packed plants loaded up with short, tightly-ruffled, deep-green leaves with nearly stemless stalks. Grows well in window boxes or pots on your patio. 40 days

'Red Russian' A cold hardy delicate flavorful variety of Kale. Its leaves are frilly and oak leaved in shape and red veined greenish purple in color. Enjoy in fresh salads, steamed, stir fried alone or with other veggies. 25 days baby, 50 days mature.

LEEKS 'American Flag' An easy to grow, mild flavored variety producing 10" long tasty leeks. Superior quality and flavor. Use in soups, stews and salads. Prefer well drained limed soil, rich in organic matter. 95 days

LETTUCE Lettuce is hardy and can be planted as early as the soil can be worked. It is a cool season crop and makes its best growth when temperatures are between 60-65 degrees. Plant every 3 weeks for a continuous supply. Careful variety selection is important for hot weather crops.

butterhead-boston-bib Highest eating quality. Large ruffly outer leaves surrounding a soft, folded, and blanched heart.

'Adriana' (green) Heat tolerant, dark green butterhead. Heads are full and dense with good flavor. Good disease resistance and tolerance to bolting and tip burn. 48 days

Vegetables

'**Alkindus**' (red) Gorgeous butterhead attracts attention with glossy leaves that contrast dynamic red with bright apple green. Performs well in the spring, summer and fall. 45 days

iceberg 'Great Lakes' Adaptable iceberg. Medium sized, glossy green, firm heads. White interior, juicy and mild. 75 days

leaf lettuce types Easiest to grow. The heads of this type do not close tightly, but form an open rosette. You pick as needed for salad without harvesting the whole plant.

'**All Star Gourmet**' A mix of different colors and interesting textures. Good shelf life. Very popular mix! 28 days

'**New Red Fire**' (red) Large loose heads are green at the base and dark red at the ruffled edges. Suitable for both cool and warm conditions and retains its crisp fresh flavor throughout the season. 55 days to full size.

'**Starfighter**' (green) Produces high yields of uniform, medium sized heads of dark green, slightly savoyed leaves. Heat tolerant and disease resistant. 52 days

romaine The leaves are thick, crisp and juicy with sweetness unmatched by other lettuce types.

'**Red Rosie**' (red) Attractive, light red romaine. 'Red Rosie' has an upright habit. The leaves are red more than half way down and then fade to green, creating a unique 'half and half' look. Resistant to downy mildew. 56 Days

'**Sparx**' (green) High-yielding, upright, dense heads produce long, uniform hearts with good flavor. Heat tolerant. Ideal for spring, summer, or fall harvests. 58 days from germination.

summer crisp Easy to grow, relatively heat tolerant and harvestable from baby to full size.

'**Magenta**' (red) Shiny slightly puckered, red tinged leaves form a whorled conical head with a crispy heart. Ideal for spring and summer planting with good taste and tolerance to disease. 48 days

'**Nevada**' (green) Bright green leaves with an upright whorl. Resists tipburn, bottom rot and bolting and its great taste stays mild. Heavy heads. Leaves are thick, juicy and flavorful. 48 days

MELONS Southern exposure and sweet, light, well drained soil is ideal for growing melons. You'll know when they are ripe when skin color begins to 'warm' and the fruit slips easily from the vine.

cantaloupe 'Sarahs Choice' Sweet and juicy! Its flavor, combined with its attractive oval fruits and ideal 3-lb. size, make this a great choice to grow. 76 days

watermelon 'Sugar Baby' The standard of small watermelons. Round 6-8" fruits average 8-10 lbs. Ripe melons are almost black and have great flavor and crack resistant rinds. 76 days

MESCLUN 'Mix' The term Mesclun comes from the french word meaning a mix of tender young salad greens. A great balance of color, texture and flavor. Very nutritious and delicious! Cut the young greens early while they are still nice and tender, they are meant to harvest young, then the greens will grow again for a continuous supply. Harvest every 3 weeks.

OKRA 'Jambalaya' A super quick, very productive and delicious variety. This compact plant has meaty, light green pods that are 4-5" long and tapered. Use in soups, stews, casseroles or fry it whole for a new taste sensation. An attractive ornamental also. 50 days

ONIONS Any fertile, well-drained, loose soil in full sun will produce healthy bulbs.

Vegetables

allium cepa 'Green Banner' (Bunching) Bunching onion does not form a real bulb.

Vigorous, early maturing variety that produces high quality bunches. Tops are strong and very dark green. Outstanding performer in spring and fall plantings.

'Cabernet' (Red) Early yields of red onions. Medium-large, globe-shaped with deep-red color. 4-6 months storage. 100 days

'Yellow Sweet Spanish' Mildly flavored, early, medium-large onions with long storage capability. 115 days

PAC CHOI 'Mix' Quick growing, cool season green, luscious crisp stems. Can be grown as a baby leaf, or left to mature with thick succulent stems. Slow to bolt. Rich in vitamins A, C, Folate, Calcium and Iron, with antioxidant benefits. 4 complementary varieties included in this mix. 45 days

PEPPERS There are two major classes of peppers; hot and sweet. They require well drained, fertile soil with abundant amounts of phosphorus and calcium to do best, they also like even temperature and warm nights for good fruiting.

HOT 'Spicy food is a delicious treat especially if you are into heat', usually that spice comes from some sort of pepper. Peppers come in all sorts of sizes, shapes, colors and varying degrees of heat. We've ranked the taste of our hot peppers from mildly hot (1) to hottest (5).

ANAHEIM Early maturity, huge yields of large, flat, smooth, thick walled and pungent fruits up to 9" long. Turning from light green to red when mature. 74-76 days. Heat Index 1.

ANCHO-POBLANO 'Trident F1' These plants produce high yields of extra large 5" long by 2 1/2" wide fruits. Mildly hot, they turn from glossy black-green color to a red brick color. Suited for multiple harvests where it has the ability to maintain fruit size. Excellent for making chili powder, sauces, roasting and the classic Mole sauce. 80-85 days. Heat Index 2

CHILI PEPPER 'Cayenne Long Red Thin' A fiery hot pepper with great flavor. Plant bears long, red fruits that are often curled, no thicker than a pencil, 5" long and 1/2" thick. Fruits turn from dark green to bright red when mature. Especially good for pickles, hot sauces and drying. Wonderful in chili and salsas. 72 days. Heat Index of 2

CHILI PEPPER 'Super Chili' Plants produce high yields of 1 1/2" long by 1/2" wide peppers. They grow upright in clusters, are VERY HOT, and turn from light green to red when mature. Plants produce 3X as many peppers as regular chili peppers. 75 days. Heat Index 5

HABANERO 'Burning Bush F1' Wrinkled, lantern shaped 'Chichen Itza'-type peppers are produced on early maturing, sturdy and productive plants. Matures 15 to 25 days earlier than other habaneros. Green to mature orange in color. 3x1-1/2", 85 days. Heat Index 4

HOT SPECIALTY PEPPER 'Mad Hatter F1' These unusually shaped peppers resemble a bishops crown. Fruits average 2 1/4" diameter on big bushy plants. Moderately sweet flesh with floral and citrus notes and a touch of heat near the seed cavity. Heat Index 1. 85 days, 105 red ripe.

JALAPENO 'Jalapeno M' A very early maturing hot jalapeno, compact plants with sturdy branches produce many small green peppers that will slowly turn to red as the fruit matures. They are hottest when they are red ripe. The short, sausage shaped, blunt fruits are 2-3"x1", are thick walled and juicy. Use fresh, pickled or in sauces. 60 days green, 83 days red. Heat Index of 2

SERRANO 'Serrano' Serrano is a type of chili pepper that originated in Mexico. They have thin walls and don't need to be peeled or steamed before using making it the easiest

Vegetables

chili to use in salsa. Green in color and ripens to red, orange or yellow, 1-2" long by 1/2" wide. It is said that these chilies are 5X hotter than jalapenos. 85-90 days. Heat Index 3

SWEET BELL Colorful, crisp and sweet, bell peppers are one of the most nutrient and antioxidant packed vegetable there is; full of vitamins C, A, E, B6 and six carotenoids. At only 28 calories for one cup, you don't have to be afraid to indulge. Peppers are most nutritious when fully ripened.

'Better Belle 11' Andy's favorite! An extra early pepper. It produces very high yields of medium to large fruits. Very strong branching plants with good leaf cover. When fully ripe these peppers will turn red. 66 days green

'Golden California Wonder' Amazing bright yellow peppers. Sweet, juicy and tasty! Mild and delicious, these peppers are 3 3/4" long and 3 1/2" wide. Peppers turn from an emerald green to a terrific golden color. Great for stuffing, stir-fry and fresh in salads. An open pollinated, Heirloom variety dating back to the 1920's. 72 days.

'Mini Bell Cupid Mix F1' Early, sweet, mini bell mixture of Red and Yellow fruits. Fruits are blocky to slightly pointed, avg. 2" X 1 3/4", and are particularly sweet when red. Large, well-branched plants protect the fruits from sunscald. 55 days green, 75 days red.

'Orange Blaze' Very sweet, early to mature and did we mention ORANGE? Intense high impact orange that electrifies salads and stir fries. Gourmet style lobed fruits are 3 to 4 inches long and 1 1/2 inches wide. Flavor and color peak at the same time. 65 to 70 days

'Red Beauty' King of the Red Bells! Also known as 'Red Baron', this variety is mature relatively early in the season with excellent red qualities. Smooth, blocky, thick fleshed fruits are medium large (4x3.5") and plentiful. Good for eating fresh, roasting and stuffing. green to red in 70-72 days

SWEET SPECIALTY Not the traditional blocky bell shape, but just as tasty. Also, equally nutritious as the Bell types. These varieties resemble the old fashioned frying pepper.

CUBANELLE 'Biscayne F1' (Italian Frying) Early, productive Cubanelle. 6" x 2 1/4", cylindrical fruits famous for frying. Unripe color is pale green. 65-70 days

ITALIAN 'Carmen' An Italian variety bred especially for roasting and grilling. The walls are thinner with lower water content, making the sweet flavor more concentrated. Horn shaped 6" x 2 1/2" tapering to a point. Green maturing to a dark crimson red. 80 days from transplant

PUMPKIN Give them plenty of room and fertile soil with generous amounts of organic matter.

'Cargo' Robust hybrid with strong handles and deep orange color. Intermediate resistance to powdery mildew. 20-25 lb. fruits, 100 days

maxima 'Super Moon F1' Enjoy the ghostly white, smooth skins of these medium sized Halloween pumpkins. Expect two to four fruits per plant, each weighing 25-30 lbs. Tolerant to powdery mildew, fruits are early maturing. Enjoy the tasty orange flesh in soups and pies. 90 days

RHUBARB 'Victoria' Super delicious! A vigorous grower producing giant stalks that are a crimson red, shading to green from the inside. The tender skin requires no peeling. Needs little care. Yields increase every year. A permanent investment! Requires sun and well, drained, rich soil. H 2-3'.

SPINACH 'Avon' Heavy, continuous yield of thick-textured, crinkled and glossy, deep green leaves which are rich in vitamins and versatile in the kitchen. Withstands heat and cold.

Vegetables

Slowest to bolt. 42 days.

SQUASH A versatile, popular fruit that can be prepared many different ways; raw, sautéed, grilled, steamed, broiled, boiled and fried. It is low in calories and high in nutrients and antioxidants.

summer Summer Squash of all types should be harvested when fruits are immature and rinds are soft.

'Dunja' (Zucchini) Dark green variety which has delivered excellent fruit quality and very good yields. Open plants and small spines make for an easy harvest. Virus tolerant, produces 7-8" smooth cylindrical fruit. Powdery mildew resistant. 47 days

'Multipak' (Yellow Zucchini) Produces a bumper crop of handsome straight neck fruits. Vigorous bush plants, pick often for best yield. 50 days.

winter 'Early Butternut' One of the earliest varieties available, this squash is tan colored and averages 2½-3½ lbs. The flesh is smooth textured and has a delicious sweet, nutty flavor and is high in vitamins. A smaller variety with excellent flavor and powdery mildew resistance. One of the best keepers. Winter Squash should be left on the vine until the fruit is fully mature and the rind is hard and tough. 85-90 days.

STRAWBERRIES Red, juicy and conical shaped, the strawberry is a member of the Rose family and has grown wild for years. Strawberries are the only fruit with seeds on the outside. **'Allstar'** A top performing variety. This easy care plant is highly disease resistant, cold hardy and very vigorous, giving you crops of large, glossy firm berries with exceptional sweetness. Ripens in June. Self-pollinating. 10" X 8-16", Zone 4-8,

fragaria x ananassa 'Berry Basket Ruby Ann' The showiest strawberry for hanging baskets. Plants are covered in waves of very early, brilliant ruby red flowers . Blooms are followed by medium size, mild, sweet fruits. Flowers and fruit are produced all summer long.

SWISS CHARD 'Bright Lights' A delicious green with a distinctive mild flavor. Vitamin rich, filled with nutrition! A very colorful veggie with endless ornamental possibilities, stems of gold, pink, orange, purple, red and white with bright and pastel variations. A must try! 28 days baby, 55 days bunching. Cool and mild weather is preferred, although chard has some heat tolerance.

TOMATILLO 'Super Verde' Extra large fruits are firm, 2-1/2 ounces each, have strong husks and above average shelf life. Sturdy plants have excellent vigor, cover and fruit set. Indeterminate. Easy to cook, use in fresh salsa, chili and tacos. 75 days

TOMATOES Disease Tolerance:EB=Early Blight, LB=Late Blight, V=Verticillium, F=Fusarium Wilt Race 1, F1 & 2 =Fusarium Wilt Race 1 and Race 2, N = Nematodes, T = Tobacco Mosaic virus. Growth Habit: I = Indeterminate (pole or stake, fruit ripens throughout the summer); D = Determinate (bush, fruit ripens all at the same time)

CHERRY A small variety of garden tomato, it has been cultivated since the early 1800's. Popular in salads or as a snack. Very sweet.

'Matts Wild Cherry' The wild tomato with luscious taste! These small tomatoes are packed with more taste than you can believe. Multitudes of 5/8 to 3/4" deep red round fruits, smooth texture and lots of sweet flavor. Fantastic in salsa! An heirloom. 60 days, some resistance to EB & LB. (I)

'Midnight Snack' 2017 All-America Selections Edible-Vegetable Winner. Unique indigo-type cherry tomato ripens to red with beautiful glossy black-purple overlay when exposed to sunlight. Coloration comes from the accumulation of anthocyanin pigments; same reason blueberries are blue and contain healthy antioxidants. Indeterminate. 65-70

Vegetables

days from transplant.

'Rosy Finch' Delicious and attractive. Brightly colored, deep rose pink, 1" round, excellent tasting cherries. Plants are perfect for hanging baskets and mixed patio containers. Dwarf plants are compact, well-branched and have exceptionally high yields. Determinate. 55 days

'Sun Gold' (F1) 'Garden Candy' Intense fruity flavor! Exceptionally sweet bright tangerine-orange cherry tomato leaves us craving for more! Vigorous plants start yielding early and bear right through the season. The taste can't be beat! 57 days (FTMV) (I)

'Sweet 100' (F1) This tomato variety is true to its name! Plants are loaded with supersweet fruits. 65 days (FV)(I)

GRAPE 'Fantastico' (F1) 'Fantastico' is a must for anyone looking for an early maturing, high yielding grape tomato, with built-in Late Blight Resistance. Bred for small gardens, determinate 'Fantastico' will work great in containers as well as the veggie garden. Long clusters of fruits are held toward the outside of the plant for easy harvest and are crack resistant. A unique determinate bush tomato with well flavored half ounce fruits, high yielding, producing up to 12 lbs of ripe fruit. 50 days

HEIRLOOM An heirloom tomato is generally considered a tomato variety that has been passed down through several generations because of its valued characteristics.

'Brandywine' One of the best tasting tomatoes! Large fruits often over 1 lb., have a deep pink skin and smooth red flesh. A medium tall, potato-leaf plant is best staked. Flavor has been described as "Very rich, loud and distinctively spicy". An Amish heirloom 78 days (I)

'Defiant' (F1) Bred for both disease resistance and flavor. This mid-sized slicer has high resistance to late blight and intermediate resistance to early blight combined with great flavor. The 6-8 oz., globe shaped fruit are smooth, firm with good texture. High yielding medium sized plants are very adaptable. 70 days, (AB, F2, LB, V) Determinate

'Mountain Merit' (F1) A Late Blight Resistant Slicer! This is a medium-large, 8-10 oz., red slicer with one of the best disease packages around for a variety of field conditions. 75 days, (F3, LB, N, TSWV) Determinate

'Mrs Maxwells Big Italian' Given seed by a friend from Italy, Mrs. Maxwell grew and saved them year after year selecting the largest, earliest and most crack resistant - the results are this heirloom beauty! Vigorous potato leaved plants produce 1 to 2 lb., dark pink beefsteak fruits with incredible flavor. Excellent for using fresh or for canning. Indeterminate. 80 days

'Old Brooks' Smooth, blemish-free fruits known for their superior resistance to blossom end-rot as well as to early and late blights. Gourmet quality flesh, with a fine, even texture. The taste is somewhat tangy, which proves to be an asset in home canning. Good all-around variety. Medium-Large, 75-85 days, Indeterminate.

'Prudens Purple' Large to very large (Many over 1 lb.) fruits are flattened and smooth and resist cracking. Vivid, dark, pink skin with crimson flesh. Contains only a few seeds. Medium tall potato-leaf plants. 67 days (I)

'Rainbow Blend' Eight popular heirloom varieties in a range of fruit colors, shapes and sizes. Includes 'Aunt Ruby's German Green', 'Black Krim', 'Black Prince', 'Big Rainbow'(Bi-Color), 'Brandywine'(Red), 'Cherokee Purple', 'Kelloggs Breakfast'(Orange), 'Midnight Snack'(Purple), 'Mortgage Lifter' (Pink), 'Yellow Brandywine', and 'Great White'. 80-100 days, assorted sizes

HUSK CHERRY 'Goldie' Small orange berry with a husk. This old-fashioned tomato family member bears 1/2- 3/4" sweet golden berries inside papery husks. The flavor is quite sweet. Plants are profusely branching, prolific, and drop ripe fruits. Fruits can be eaten raw,

Vegetables

dried like raisins, frozen, canned, or made into preserves, cooked pies, and desserts. 75 days

PASTE -SAUCE 'Plum Regal' (F1) A productive plum tomato with great late blight resistance. Medium-size plants produce high yields of blocky, 4 oz. plum tomatoes. Fruits have a deep red color with good flavor. Good disease resistance package. Intermediate resistance to early blight. Determinate, 75 days, (EB,LB,V,F,T). Typically meatier and less juicy, these are the best choice for canning, sauces, salsas and juice. With less juice, sauce making time is half that of salad types and with higher solids the flavor is doubled.

PATIO 'Bush Champion 11' (F1) One of the best varieties for small space gardens and containers. Compact plants grow to just 24" tall, producing extra-early yields of big 8-12oz. fruits with excellent flavor. Widely adaptable, can be grown staked, but not essential. Resists Grey Leaf spot and Alternaria. Determinate (V,F1,F2)

SALAD-SLICING Slicing Tomatoes are large round varieties which hold more juice and seeds. Perfect for eating raw in a wide variety of ways.

'Big Boy' (F1) Vigorous plants producing 16 oz. fruits! Excellent yields. 78 days (I)

'Brandyboy' This is one of the tastiest tomatoes you can grow! A hybrid of the classic Brandywine, Brandyboy has the benefits of a heirloom-incredible taste, smooth and thin skin-without the drawbacks. Producing loads of large, 5-in.(7-10 oz.) pink fruits. 78 days. (VFNT-I)

'Damsel F1' Late blight resistant and heirloom quality flavor. Damsel produces avg. 10-12 oz., globe-shaped fruits with beautiful, pink skin. Compact indeterminate. 73 days

'Early Girl Improved' (F1) Early slicing cultivar. Tasty 4-6 oz. fruit that continue all summer! High yields 57 days (VF1&2, I)

'Fourth of July' Be the first on your block to have fresh tomatoes! One of the earliest-producing varieties available, yielding small luscious fruits until late summer or early fall. 4 oz. fruits. 49 days. (I)

'Jet Star' (F1) Early producing 6-8 oz. pure red fruits with great flavor. Best Seller! High yields all season long. 70 days (VF1&2T,I)

'Stellar F1' A great tomato for those in areas with high disease pressure. Compact plants have the highest level of resistance to late blight and Septoria Leaf Spot currently available in a tomato. Produces loads of round, red 5 to 7 ounce fruits that make perfect slices for sandwiches and salads. Good for container gardens, but truly exceptional when planted in the ground. Determinate. 70-75 days. VFFLB

'Supersteak' (F1) Big improved beefsteak type. Rich, full flavor. Vigorous plants. 80 days (VFN) (I)

YELLOW These tomatoes are very colorful and generally will contain less acid content than a red tomato.

'Lemon Boy' (F1) Colored eye catching tomato with a wonderful flavor. This will produce a medium sized fruit 7 to 8 oz.with sunny yellow skin. If you are looking for a tomato with a lower acid content this would be the one. High yields . 72 days (VF1&2N,I)

'Yellow Pear' Enormous amounts of very tasty pear shaped yellow tomatoes. Colorful in salads or salsas. An heirloom variety that dates back to Europe 1700's. 70 days (D)
